SECURITIES AND EXCHANGE COMMISSION

SEC FORM 17-Q

QUARTERLY REPORT PURSUANT TO SECTION 17 OF THE SECURITIES REGULATION CODE AND SRC RULE 17(2)(b) THEREUNDER

1. For the quarterly period ended March 31, 2014

2. Commission identification number CE02536 3. BIR Tax Identification No. 003-828-269-V

4. Exact name of issuer as specified in its charter ABOITIZ EQUITY VENTURES, INC.

5. Province, country or other jurisdiction of incorporation or organization Philippines

6. Industry Classification Code: [ ] (SEC Use Only)

7. Address of issuer's principal office Postal Code

32nd Street, Bonifacio Global City, Taguig City, Metro Manila, Philippines 1634

8. Issuer's telephone number, including area code

(02) 886-2800

9. Former name, former address and former fiscal year, if changed since last report

N.A.

10. Securities registered pursuant to Sections 8 and 12 of the Code, or Sections 4 and 8 of the RSA

Title of each Class	Number of shares of common stock outstanding and amount of debt outstanding (as of March 31, 2014)
Common stock, P1.00 par value	5,521,871,821
Total debt	₱ 97,853,656,000

11. Are any or all of the securities listed on a Stock Exchange?

Yes [x] No [ ]

If yes, state the name of such Stock Exchange and the class/es of securities listed therein:

Philippine Stock Exchange	Common

12. Indicate by check mark whether the registrant:

(a) has filed all reports required to be filed by Section 17 of the Code and SRC Rule 17 thereunder or Sections 11 of the RSA and RSA Rule 11(a)-1 thereunder, and Sections 26 and 141 of the Corporation Code of the Philippines, during the preceding twelve (12) months (or for such shorter period the registrant was required to file such reports)

Yes [**x**] No [ ]

(b) has been subject to such filing requirements for the past ninety (90) days.

Yes [**x**] No [ ]

PART I--FINANCIAL INFORMATION

Item 1. Financial Statements.

Please refer to the financial statements and schedules attached herewith.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of the financial condition and results of operations of Aboitiz Equity Ventures, Inc. ("AEV" or the "Company" or the "Parent Company") and its subsidiaries should be read in conjunction with the unaudited condensed consolidated financial statements and accompanying disclosures set forth elsewhere in this report.

TOP FIVE KEY PERFORMANCE INDICATORS

Management uses the following indicators to evaluate the performance of the registrant and its subsidiaries:

1. EQUITY IN NET EARNINGS OF INVESTEES

Equity in net earnings (losses) of investees represents the group's share in the undistributed earnings or losses of its associates for each reporting period subsequent to acquisition of said investment, net of goodwill impairment cost, if any. Goodwill is the difference between the purchase price of an investment and the investor's share in the value of the net identifiable assets of investee at the date of acquisition. Equity in net earnings (losses) of investees indicates profitability of the investments and investees' contribution to the group's consolidated net income.

Manner of Computation: Investee's Net Income (Loss) x Investor's % ownership - Goodwill Impairment Cost

2. EARNINGS BEFORE INTEREST, TAXES, DEPRECIATION & AMORTIZATION (EBITDA)

The Company computes EBITDA as earnings before extra-ordinary items, net finance expense, income tax provision, depreciation and amortization. It provides management and investors with a tool for determining the ability of the group to generate cash from operations to cover financial charges and income taxes. It is also a measure to evaluate the group's ability to service its debts and to finance its capital expenditure and working capital requirements.

3. CASH FLOW GENERATED

Using the Statement of Cash Flows, management determines the sources and usage of funds for the period and analyzes how the group manages its profit and uses its internal and external sources of capital. This aids management in identifying the impact on cash flow when the group's activities are in a state of growth or decline, and in evaluating management's efforts to control the impact.

4. CURRENT RATIO

Current ratio is a measurement of liquidity, calculated by dividing total current assets by total current liabilities. It is an indicator of the group's short-term debt paying ability. The higher the ratio, the more liquid the group.

5. DEBT-TO-EQUITY RATIO

Debt-to-Equity ratio gives an indication of how leveraged the group is. It compares assets provided by creditors to assets provided by shareholders. It is determined by dividing total debt by stockholders' equity.

KEY PERFORMANCE INDICATORS (KPI)

(Amounts in thousands except financial ratio data)

	JAN–MAR 2014	JAN–MAR 2013
EQUITY IN NET EARNINGS OF INVESTEES	**1,524,386**	2,762,975
EBITDA	**9,637,454**	9,257,042
CASH FLOW GENERATED:		
Net cash flows from operating activities	**7,436,553**	4,939,638
Net cash flows from (used in) investing activities	**(4,493,911)**	3,113,034
Net cash flows from (used in) financing activities	**320,092**	(11,533,736)
Net Increase (Decrease) in Cash & Cash Equivalents	**3,262,733**	(3,481,064)
Cash & Cash Equivalents, Beginning	**36,118,190**	33,730,531
Cash & Cash Equivalents, End	**39,396,297**	30,241,322
	MAR. 31, 2014	**DEC. 31, 2013**
CURRENT RATIO	**2.93**	2.64
DEBT–TO–EQUITY RATIO	**0.98**	1.02

All the KPI values were within management's expectation during the period in review.

Management teams of the different businesses continued to effectively handle their respective operations and financial requirements. As a result, profitability had been sustained and financial position remained strong and liquid.

Associates continued to generate substantial earnings and enhance the consolidated bottom line, despite the 45% decline in their income contribution to the Group. Consolidated EBITDA, which grew by 4%, translated into additional cash inflows coming from subsidiaries' operations and from dividend payments of associates. The internally–generated funds were then used to finance capital expenditures and settle maturing financial obligations.

With the increase in cash and growth in equity during the current period, the financial position of the Group further strengthened, as indicated by the improvement in the financial ratios at the end of March 2014.

REVIEW OF JAN–MAR 2014 OPERATIONS VERSUS JAN– MAR 2013

RESULTS OF OPERATIONS

For the first quarter of 2014, AEV and its subsidiaries posted a consolidated net income of ₱4.87 billion, a 29% YoY decrease. This translates to an earnings per share of ₱0.88 for the period in review. In terms of income contribution, power group still accounted for the bulk at 73.0%, followed by the banking, food and real estate groups at 16.6%, 7.7% and 2.8%, respectively.

The Group generated a non-recurring net gain of ₱471 million (versus ₱1.32 billion in 1Q2013) mainly from the ₱634 million gain generated from the sale of AEV's investments in Abojeb Group and in Cebu International Container Terminal, Inc. (CICTI), a 20% owned non-operating associate. This was partly offset by the ₱163 million foreign exchange loss on the revaluation of dollar-denominated loans and placements. Stripping out these one-off items, the Group's core net income for the current period amounted to ₱4.40 billion, down 20% YoY.

BUSINESS SEGMENTS

The individual performance of the major business segments is discussed as follows:

Power

Aboitiz Power Corporation (AP or AboitizPower) ended the quarter with an income contribution of ₱3.21 billion, a 9% decrease from last year's ₱3.53 billion.

AP's generation group reported a 10% YoY dip in earnings contribution to AEV, from ₱3.05 billion to ₱2.74 billion, attributed to the higher fuel cost brought about by the implementation of the Geothermal Resource Sales Contract (GRSC) for the Tiwi-MakBan plants, as well as the expiration of the Pagbilao plant's income tax holiday. As compared to 2013 levels, average selling prices increased by 8% as spot market prices grew 16% YoY due to higher demand for electricity brought about by the entry of the summer season as well as outages of several baseload plants toward the latter part of March. Likewise, average selling prices under bilateral contracts increased by 6% YoY due to the group's dollar-linked contracts and the entry of the its oil-fired barges in Navotas, which began operations last November 2013. The rise in selling prices positively affected the revenues of both generation subsidiaries and associates.

Generation group's attributable net generation for the period in review grew by 10% YoY, from 2,450 gigawatthours (GWh) to 2,688 GWh due to the 12% YoY growth in power sales through bilateral contracts resulting from the Pagbilao plant's higher contracted levels with contestable customers through Open Access. Meanwhile, spot market sales remained flat at a little above 500 GWh for the quarter. On a capacity basis, the group's attributable sales increased by 25% YoY from 1,419 MW to 1,780 MW as a result of higher ancillary volumes and increased bilateral energy sales.

During the period, the group added 14 MW to the Mindanao grid with the start of commercial operations towards the end of February 2014 of its Tudaya 1 and 2 run-of-river hydro plants. Meanwhile, works are ongoing for two other projects, namely the 14 MW Sabangan run-of-river hydro plant and the 300 MW Davao coal plant, both of which are expected to be completed in 2015.

On the other hand, AP's distribution group registered a 17% YoY drop in earnings contribution to AEV, from ₱576 million to ₱475 million. Although the group's attributable electricity sales for the quarter increased by 5% to 1,000 GWh from 956 GWh a year ago, the increase in sales was not enough to offset the higher costs registered by Visayan Electric Company, Inc. (VECO) resulting from the lag in the recovery of its cost of purchased power. Davao Light & Power Company, Inc. (Davao Light) and Cotabato Light & Power Company (Cotabato Light) also incurred additional costs due to the running of their embedded plants to cover for the shortfall in the Mindanao grid during the period.

Banking

Income contribution from this industry group fell 59%, from ₱1.79 billion to ₱731 million for the period in review.

UBP's first quarter net income for 2014 was lower at ₱1.54 billion (vs ₱4.00 billion in 2013) mainly due to the 66% drop in total other income to ₱1.75 billion largely in view of exceptionally higher trading gains posted during the first quarter of 2013, despite higher service charges, fees and commissions driven by strong growth in commercial loans. Net interest income rose by 25% to ₱2.56 billion anchored on the robust expansion in earning assets coupled with the continuous reduction in average costs of interest-bearing liabilities. The overall decrease in revenue was partially offset by the 24% decline to ₱2.3 billion in operating expenses.

Food

Income contribution from Pilmico Foods Corporation (PFC or Pilmico) and its subsidiaries amounted to ₱339 million, up 4% YoY, mainly attributed to the improved margins of the Flour division and increase in volume sales and average selling price of the Farms division. On the other hand, the Feeds division posted a weaker performance during the first quarter as higher input costs continued to be a challenge.

Real Estate

The first quarter income contribution of Aboitiz Land, Inc. amounted to ₱121 million, 181% higher than ₱43 million last year. Revenues of ₱664 million mainly came from the industrial segment which generated 54% of the sales. With the 100% consolidation of the recently acquired Lima Land, Inc. (LLI), the industrial segment becomes the main contributor to revenues. Residential segment contributed 44% to total revenues, with commercial and property management segments accounting for the remaining 2%.

MATERIAL CHANGES IN LINE ITEMS OF REGISTRANT'S STATEMENTS OF INCOME AND OF COMPREHENSIVE INCOME

For the period ended March 31, 2014, consolidated net income allocable to the equity holders of AEV registered a 29% decline, reaching ₱4.87 billion from the ₱6.85 billion posted in the same period last year.

Operating profit for the current period amounted to ₱6.47 billion, a 21% increase YoY, as the ₱7.95 billion increase in revenues surpassed the ₱6.82 billion rise in costs and expenses. This increase was mainly attributed to the performance of power, food and real estate groups and the fresh profit contribution of VECO which was consolidated starting December 2013.

Power subsidiaries reported a 20% YoY increase in operating profit from ₱4.88 billion to ₱5.85 billion substantially due to the consolidation of VECO's positive margins amounting to ₱764 million in the first quarter of 2014. With AP's step acquisition of VECO into a subsidiary in 2013, VECO's accounts started to be consolidated into the Group's financial statements only in the fourth quarter of 2013. Contributing to the increase in profit was the growth in margins reported by Therma Luzon, Inc. (TLI) as a result of lower fuel costs and higher average selling prices. Meanwhile, food and real estate groups also reported an increase in operating income by 14% (₱587 million vs ₱517 million) and 138% (₱141 million vs ₱59 million), respectively.

Share in net earnings of associates dropped by 45% YoY (₱1.52 billion vs ₱2.76 billion in 1Q2013) principally due to the decline in income contribution of UBP resulting from lower trading gains. SN Aboitiz Power-Magat, Inc. (SNAP-Magat) also reported a decrease in ancillary service revenue at the back of low water levels while STEAG's decline was due to the unscheduled plant shutdown starting end of Feb 2014.

The increase in net interest expense and income tax provision and the decrease in other income more than offset the increase in operating profit and as a result, pulled down the Group's overall profitability. The 26% YoY rise in net interest expense (₱1.77 billion vs P1.41 billion in 1Q2013) was

attributed to the higher level of long-term debt of AEV parent and Therma Power, Inc. subsidiaries in the last quarter of 2013 and new debt availment in the first quarter of 2014.

Other income declined by 48% YoY (₱853 million vs ₱1.63 billion in 1Q2013) mainly due to foreign exchange (FX) losses (₱252 million losses vs ₱165 million gains in 1Q2013), resulting from the restatement of the dollar-denominated debt of the power group under a depreciating peso scenario as of the end of the current period, vis-à-vis an appreciating peso scenario as of end of 2013. Gains generated from the sale of Abojeb and CICTI were also lower at ₱634 million versus ₱1.3 billion gain reported in the same period last year from the sale of City Savings Bank, Inc. (CitySavings) shares.

The 218% increase in provision for income tax (₱981 million vs ₱309 million in 1Q2013) was mainly due to the expiry of TLI's income tax holiday (ITH) at the end of 2013.

The 5% YoY increase in net income attributable to non-controlling interests was largely due to the effect of VECO consolidation starting at the end of 2013. In 1Q2013, VECO was still treated as an equitized investment.

AEV's consolidated comprehensive income attributable to equity holders correspondingly decreased by 27%, from ₱5.32 billion in 1Q2014 to ₱7.30 billion in 1Q2013. The 29% drop in consolidated net income accounted for this decline.

CHANGES IN REGISTRANT'S RESOURCES, LIABILITIES AND SHAREHOLDERS' EQUITY

Assets

Compared to year-end 2013 level, consolidated assets increased 3% to ₱253 billion as of March 31, 2014, due to the following:

a. Cash & Cash Equivalents increased by 9% (₱39.40 billion vs ₱36.12 billion as of December 31, 2013) mainly due to internally-generated funds from operation and cash dividend collection from associates.

b. Investments in and Advances to Associates increased by ₱979 million (₱48.89 billion vs ₱47.91 billion as of December 31, 2013) mainly due to the recording of ₱1.52 billion share in earnings of associates and ₱398 million share of a banking associate's fair valuation gain on its AFS investments during the current period. This increase was partially reduced by the ₱942 million cash dividends received from associates during the period.

c. Gross of depreciation expense, the resulting ₱4.55 billion combined increase in Property Plant and Equipment (PPE) and Land and Improvements (LI) was mainly due to the following: 1.) ₱3.69 billion on-going construction of Davao coal, Tudaya and Sabangan hydro power plants; 2.) ₱180 million rehabilitation of Navotas power barges; and 3.) ₱722 billion capital expenditures spent by the rest of the subsidiaries. This was partly offset by the deconsolidation of Abojeb assets amounting to ₱99 million.

d. Other Noncurrent Assets (ONCA) increased by 8% (₱9.06 billion vs ₱8.37 billion as of December 31, 2012) mostly due to the ₱548 million build-up of deferred input VAT by the power group arising from the ongoing construction of its coal power plant.

The above decreases were tempered by the following increases:

a. Trade and Other Receivables, inclusive of non-current portion, decreased by 9% (₱16.01 billion vs ₱17.53 billion as of December 31, 2013) mainly due to the deconsolidation of

Abojeb's receivables amounting to ₱308 million and the decrease in power subsidiaries' trade receivables due to higher collection.

b. Inventories decreased by 5% (₱8.30 billion vs P8.76 billion as of December 31, 2013) mainly due to the deconsolidation of Abojeb and decrease in food group inventory.

c. Derivative assets decreased by 34% (₱20 million vs ₱31 million as of December 31, 2013) mainly due to realized mark-to-market gains of settled investments.

d. Pension Asset decreased by 10% (₱90 million vs ₱100 million in December 2013) due to accrual of defined benefit expense during the current period.

e. Deferred Income Tax Assets (DTA) decreased by 34% (₱400 million vs ₱610 million in December 2013) mainly due to the ₱475 million reversal of deferred tax benefit on NOLCO set up in December 2013, resulting from the application of this NOLCO against the generated taxable income during the current quarter. This was partly offset by the ₱264 million reclassification of deferred tax liability on accumulated FX gain from DTA to Deferred Income Tax Liability.

Liabilities

Consolidated short-term bank loans reduced by 7% (₱3.69 billion vs ₱3.96 billion in December 2013) while long-term liabilities increased by 3% (₱94.43 billion vs ₱91.67 billion as of December 31, 2013). The decrease in short-term loans was mainly due to the deconsolidation of Abojeb's ₱282 million account. The ₱2.7 billion rise in long-term debt was due to additional loan availment by Therma South, Inc. (TSI).

Trade and other payables, inclusive of noncurrent portion, were lower by 10%, from ₱18.96 billion to ₱16.99 billion, mainly due to the ₱1.78 billion decrease in power subsidiaries' trade payables and the deconsolidation of Abojeb's ₱250 million payable accounts.

Income tax payable increased by 66%, from ₱444 million to ₱737 million, due to the recording of the additional income tax liability for the current period as a result of the expiry of TLI's ITH.

Pension liability decreased by 10%, from ₱705 million to ₱636 million, mainly due to the deconsolidation of Abojeb's ₱70 million account.

Deferred income tax liabilities (DTL) rose by 21%, from ₱1.37 million to ₱1.66 billion, mainly due to the reclassification of ₱264 million deferred tax provision on accumulated FX gain from DTA to DTL.

Equity

Equity attributable to equity holders of the parent increased by 5% from year-end 2013 level of ₱96.93 billion to ₱101.87 billion, mainly due to the following: a.) ₱4.87 billion increase in Retained Earnings resulting from the net income recorded during the current period; b.) ₱398 million share in a banking associate's unrealized mark-to market gains on its AFS investments; and c.) ₱61 million increase in share of cumulative translation adjustments recorded by associates using US dollars as functional currency. This was partially countered by the ₱375 million acquisition of non-controlling interest generated from the purchase of the remaining 40% share in LLI.

MATERIAL CHANGES IN LIQUIDITY AND CASH RESERVES OF REGISTRANT

For the first quarter ended 2014, the Group continued to support its liquidity mainly from cash generated from operations, additional loans availed and dividends received from associates.

Compared to the cash inflow in 1Q2013, consolidated cash generated from operating activities in 1Q2014 increased by ₱2.43 billion to ₱7.37 billion, mainly due to the growth in earnings before interest, depreciation and amortization (EBIDA) recorded by subsidiaries during the current period and the higher collection of trade receivables.

The current period ended up with ₱4.43 billion net cash used in investing activities versus ₱3.11 billion provided last year. This was mainly due to the ongoing plant constructions and rehabilitation works and additional investments in subsidiaries and associates compared to the net proceeds generated from the sale of CSB investment in the same period last year.

Net cash from financing activities was at ₱320 million, versus ₱11.53 billion used in 1Q2013. This increase was attributed to the net debt availment in 1Q2013, vis-a-vis net debt prepayment in 2013.

For the period in review, net cash inflows surpassed cash outflows, resulting in a 9% increase in cash and cash equivalents, from ₱36.12 billion as of year-end 2013 to ₱39.40 billion as of March 31, 2014.

FINANCIAL RATIOS

Backed by strong operating cash inflows, liquidity was adequately preserved. Current ratio was higher at 2.93x, from 2.64x at the start of the year, since the increase in current assets was complemented by the decrease in current liabilities. Likewise, both debt-to-equity and net debt-to-equity ratios improved to 0.98:1 (versus year-end 2013's 1.02:1) and 0.46x (versus year-end 2013's 0.48x), respectively. This improvement was mainly due to the substantial increase in equity surpassing the modest rise in total liabilities.

OUTLOOK FOR THE UPCOMING YEAR/KNOWN TRENDS, EVENTS, UNCERTAINTIES WHICH MAY HAVE MATERIAL IMPACT ON REGISTRANT

The Philippines' strong GDP growth, the roll-out of the government's Public-Private Partnership Program, as well as the robustness and liquidity of the country's financial system, provides AEV and its business units opportunities to sustain growth over the long-term. To complement the business units' various initiatives, AEV also formed the AEV Business Development Team, whose key objectives are to scan the market for opportunities, and if deemed acceptable from both a risk and return basis, develop and execute the project.

Nevertheless, some challenges facing its subsidiary AboitizPower will impact on the holding company's financial performance in 2014.

New Business Development

AEV seeks to capture opportunities in sectors in which it believes it could further leverage on its core competencies, are scalable, and with strong recurring profits and cash flow. To this end, the Company formed a Business Development Team in late 2011 to evaluate new business opportunities that don't fall squarely into the Company's traditional core business areas of power, banking, and food. Earlier, AEV disclosed a couple of initiatives which it hopes will serve as new avenues of growth in the years to come.

1. **Production of Liquid Biomethane**

   In June 2012, AEV partnered with British company GazAsia Ltd. to build a plant that produces liquid bio-methane fuel from organic wastes derived from municipal solid wastes and other forms of organic wastes.

AseaGas Corporation (AseaGas), the company that will undertake this project, will employ existing and proven technology to produce bio-methane gas and liquefy it for transportation purposes. It will apply for registration with the Department of Energy as a Renewable Energy (RE) developer in order to avail of the incentives under the RE Law. The company's income will be derived from the sale of bio-methane fuel for vehicles.

AEV's wholly-owned subsidiary AseaGas will invest $47 million for an initial plant with capacity of around 9,000 metric tons of bio-methane per year. The company already started ground breaking for the first plant last March 18, and project is expected to be completed by December 2015. Should the pilot project be successful, then operations could be easily scaled up.

2. Davao Bulk Water Supply Project

AEV has agreed to enter into a joint venture with J.V. Angeles Construction Corp. (JVACC) to jointly construct both a raw water treatment facility with RE component and conveyance system which will deliver 300 MLD of treated bulk water to Davao City, the third largest city in the Philippines.

AEV, through its affiliate Hedcor, Inc., will provide the technical and operational expertise for the hydro-electric component of the project. On the other hand, JVACC will bring to the partnership its 48 years of experience in construction and development of water-related infrastructure.

JVACC submitted an unsolicited proposal to the local water agency in early 2013. Together with AEV as part of the JVACC consortium, the group is presently undergoing the Competitive Challenge period under the 2008 NEDA JV Guidelines. The final structure of the joint venture company shall be determined in due course by the parties involved.

Power (Generation Business)

1. Ancillary Services

SN Aboitiz Power (SNAP) a partnership between AboitizPower and SN Power Invest AS (SN Power), is currently providing ancillary services to National Grid Corporation of the Philippines (NGCP) under an Ancillary Services Procurement Agreement (ASPA). The ASPA for Magat expired last November 5, 2012 while Binga's ASPA expired on June 25, 2013.

The company earlier disclosed that its affiliates, SN Aboitiz Power – Magat, Inc. (SNAP-Magat), and SN Aboitiz Power – Benguet, Inc. (SNAP-Benguet), have respectively signed ASPAs with NGCP for the provision of regulating, contingency, and dispatchable reserves from the Magat and Ambuklao Hydroelectric Power Plants. Another affiliate, Therma Luzon, Inc. (TLI), which runs the Pagbilao Coal Plant, also signed an ASPA with the NGCP covering both firm and non-firm capacities for contingency reserve. The ASPAs of Magat and Ambuklao shall be valid for three years once the approval of the Energy Regulatory Commission (ERC) for the contract has been secured. On the other hand, TLI's ASPA is valid for a period of five years from the date of approval by the ERC. The issuance of a provisional authority (PA) from the ERC paved the way for the implementation of the new ASPAs for the Magat, Ambuklao and Pagbilao plants starting July 26, 2013.

For Magat, ERC provisionally approved the ASPA rates with some revisions. SNAP filed a Motion for Reconsideration (MR) for the Magat ASPA, which remains unresolved while the final approval is still pending.

The ERC also issued a PA on the Ambuklao ASPA signed by SNAP and NGCP. SNAP filed an MR Reconsideration with the ERC on the PA. Both the MR and the Final Approval of the Ambuklao ASPA are still pending with the ERC. In the meantime, both parties have yet to implement the Ambuklao ASPA due to ongoing discussions on the technical parameters of the service to be rendered.

SNAP-Benguet also signed an ASPA for the provision of non-firm capacities for regulating reserve, contingency reserve, dispatchable reserve and blackstart capability from the Binga hydroelectric power plant. As of February 2014, SNAP-Benguet received the order from the ERC provisionally approving the ASPA between the company (Binga) and NGCP. SNAP filed an MR on the methodology of payment.

AboitizPower believes that the implementation of the new ASPAs will result in a significant reduction in the company's ancillary revenues due to the restructuring of the pricing mechanism for ancillary services, which is currently linked to spot market rates. On the other hand, the addition of the Ambuklao and Pagbilao plants as licensed ancillary service providers will help offset the expected decline in ancillary revenue.

2. **Conversion of AP Renewables, Inc.'s (APRI) existing steam contract to a Geothermal Resource Sales Contract**

On May 26, 2013, APRI's current steam supply contract with the Philippine Geothermal Production Corporation (PGPC, formerly known as Chevron) shifted to a Geothermal Resource Sales Contract (GRSC). The change is due to an existing provision under the government's existing contract with Chevron when the Tiwi-Makban facilities were bidded out under the former's privatization program. Under the GRSC, the effective steam price of APRI payable to PGPC will be at a premium to coal. Due to competition from coal plants, the contracts of APRI mimic that of coal plants, including the proportion of fuel to total cost of power.

To ensure that APRI will continue to remain competitive in the market, a two-month interim agreement supplementing the GRSC was implemented on August 14, 2013. This will result in a lower fuel cost during off-peak hours, thus allowing AboitizPower to maximize sales even during this period. The agreement is currently being extended every two months. Ultimately, the company aims to close a more permanent agreement with the steam supplier that will also enable the full development of the existing steam field and maximize utilization of the Tiwi-Makban plants.

3. **Expiration of Income Tax Holiday**

Several of the AboitizPower's plants were eligible for an income tax holiday (ITH) upon their acquisition by the Company. Upon the expiration of the ITH, the respective plants will now be assessed a corporate income tax in accordance with the relevant laws. In 2014, the ITH of Therma Luzon Inc. (TLI) and SNAP-Magat will expire.

SNAP-Magat

The Board of Investments approved SNAP-Magat's application to avail of the one-year bonus ITH under Executive Order No. 226 (Omnibus Investments Code of 1987) which pushed the original expiration from July 11, 2013 to July 11, 2014. After the lapse of SNAP Magat's ITH this year, it is now liable to pay income tax, which would be whatever is higher between 30% regular corporate income tax based on net income or 2% minimum corporate income tax based on gross income.

Therma Luzon, Inc.

On February 26, 2010, the BOI approved the Company's application as a New Independent Power Producer Administrator of the 700 MW Pagbilao Coal Fired Thermal Power Plant Project under Energy with Non-Pioneer Status under the Omnibus Investments Code of 1987. On April 21, 2010, the BOI granted the Company's request for the adjustment of the commencement of its ITH availment period from February 26, 2010 to January 1, 2010.

Among other incentives, the BOI granted the company an ITH for a period of four (4) years without extension from January 1, 2010 or actual start of operation, whichever is earlier but in no case earlier than the date of registration. The ITH incentives shall be limited only to the sales/revenue generated from the sale of electricity of the power plant. Based on this schedule, TLI will now be subject to a 30% corporate income tax beginning January 2014.

4. Continued growth in the Power Group's attributable capacity

Notwithstanding the challenges over the short-term, 76%-owned subsidiary AboitizPower has built the necessary foundation to sustain its growth trajectory over the long term. Over the next several years, AboitizPower looks to expanding its portfolio of generation assets by implementing the following projects.

- Greenfield and Brownfield developments

  600 MW (net) Coal-Fired Power Plant in Subic. This is a project by Redondo Peninsula Energy, Inc. (RP Energy), a joint venture among Meralco PowerGen Corporation (MPGC), Aboitiz subsidiary Therma Power, Inc. (TPI) and Taiwan Cogeneration International Corporation (TCIC). AboitizPower, through TPI will have an equity interest of 25% in RP Energy. The project involves the construction and operation of a 2x300 MW (net) circulating-fluidized-bed (CFB) coal-fired power plant located within the Subic Bay Freeport Zone. On November 15, 2012, RP Energy was issued an amended Environmental Compliance Certificate to cover two high-efficiency 300-MW (net) units with main steam reheat systems. Site preparation is substantially completed. The EPC contract has been awarded to Hyundai with Foster Wheeler and Toshiba as major subcontractors/suppliers of the CFB boilers and turbine-generators, respectively.

  Hyundai has not been notified to proceed with the works, however, because of the filing with the Supreme Court of a petition for a Writ of Kalikasan and environmental protection order by an ad hoc group of individuals and organizations. The petition was remanded to the Court of Appeals for a hearing. The Court of Appeals denied the issuance of Writ of Kalikasan for lack of merit, but nonetheless, nullified RP Energy's Environmental Compliance Certificate and land lease with SBMA on grounds of DENR non-compliance with procedural requirements and SBMA failure to secure LGU approvals/endorsements, respectively. This decision is the subject of three Petitions for Review on Certiorari to the Supreme Court filed by RP Energy, DENR and SBMA that may require the first semester of 2014 to resolve. In view of the legal dispute, the commercial operation of the power plant is now estimated to begin in mid to late 2017.

  300 MW CFB Coal-Fired Power Plant in Davao. AboitizPower, through 100%-owned subsidiary Therma South, Inc. (TSI), is putting up a 2x150 MW CFB coal-fired power plant in Davao, which is the biggest load center in the island of Mindanao. The project broke ground in May 2012. The EPC contract for the power block was awarded to Formosa Heavy Industries (FHI) with FHI supplying the CFB boilers and Fuji as major subcontractor/supplier of the turbine-generators. The EPC contract for the balance of plant equipment and their integration with the power block was awarded to a consortium of Black & Veatch Corporation and Leighton Contractors (Philippines), Inc. Commissioning and testing of the

first unit is expected to begin during the fourth quarter of 2014. The facility is expected to become fully operational within the first half of 2015, thereby providing Mindanao with the much-needed reliable, competitively-priced and environmentally-safe baseload power.

400 MW (net) Pulverized Coal-Fired Power Plant in Pagbilao, Quezon. AboitizPower, through wholly owned subsidiary Therma Luzon, Inc. (TLI), and TeaM (Philippines) Energy Corporation (TeaM Energy), whose shareholders are Marubeni Corporation (Marubeni) and Tokyo Electric Company (TEPCO), have formed Pagbilao Energy Corporation (PEC) to own Unit 3. The terms and conditions of the joint investment are finalized in a definitive shareholder agreement between the Parties. Unit 3 is located within the premises of the existing 735-MW (net) Pagbilao Units I and II Coal-Fired Thermal Power Plant in Quezon province.

Marubeni and TEPCO are shareholders of TeaM Energy Corporation, which owns and operates the Pagbilao Units I and II under a build-operate-transfer contract with the National Power Corporation (NPC). On the other hand, TLI is the Administrator of the Energy Conversion Agreement between TeaM Energy and NPC under an Independent Power Producer Administration Agreement with the Power Sector Assets and Liabilities Management Corporation (PSALM), which manages the assets and IPP contracts of NPC.

On April 25, 2014, PEC entered into a contract with a contractor consortium comprised of Mitsubishi Hitachi Power Systems Ltd, Daelim Industrial Co, Ltd, DESCO, Inc. and Daelim Philippines, Inc. to provide the engineering, procurement and construction (EPC) services required for the project. Notice to Proceed with the works was issued to the consortium on April 30, 2014. The closing of the debt financing for the project is scheduled for May 7, 2014. Commercial operations of Unit 3 are targeted prior to year-end 2017.

300-MW (net) CFB Coal-Fired Project in Toledo City, Cebu. AboitizPower, through 100%-owned subsidiary, Therma Visayas, Inc. (TVI), is developing a 2 x 150-MW (net) coal-fired power project in Toledo City. The project site was acquired in December 2011. The Environmental Compliance Certificate for the project was issued in May 2013.

Technical specifications, contract drawings, contract conditions, and requests for EPC proposals were issued on July 15, 2013, with a submittal deadline of November 15, 2013, thereafter extended to November 29, 2013. The evaluation of the three EPC proposals received has been completed. EPC contract award to the winning bidder and issuance of a limited notice to proceed (NTP) with engineering design and site preparation construction is expected on or before May 31, 2014, with the NTP with all EPC activities to follow by October 2014. Turnover of the first unit is targeted for the year-end 2017, with the second following three months thereafter.

7 MW Tudaya 1 Hydro Power Plant Project. Hedcor Sibulan, Inc. (Hedcor Sibulan) started the construction of Tudaya 1 which is located upstream of the existing Sibulan A pondage in the third quarter of 2012. Tudaya 1 is now commercially operating after receiving the Certificate of Compliance from the Energy Regulatory Commission. The energy produced by Tudaya 1 is sold to Davao Light through the power supply agreement signed in 2007.

6.6 MW Tudaya 2 Hydro Power Plant Project. AboitizPower's wholly owned subsidiary Hedcor Tudaya, Inc. (Hedcor Tudaya) has started the construction of Tudaya 2 located downstream of the existing Sibulan B. The project is now commercially operating. The plant, which is intended to sell through the Feed-in-tariff (FIT) mechanism, is now awaiting its FIT eligibility certificate. A composite team from the Department of Energy validated the eligibility of Tudaya 2 as a FIT-eligible plant.

14 MW Sabangan Hydro Power Plant Project. This involves the construction and operation of a hydropower plant facility in Mt. Province, a province located in Northern Luzon. This project will be undertaken by a wholly owned subsidiary of AboitizPower, Hedcor Sabangan, Inc. The project, which is the first to be constructed in Mt. Province, will take approximately 24 months to construct and has commenced construction in May 2013.

68 MW Manolo Fortich Hydropower Plant Project. Hedcor Bukidnon, Inc (Hedcor Bukidnon) is currently undertaking the feasibility studies of Manolo Fortich, which is composed of the 43 MW Manolo Fortich 1 and 25 MW Manolo Fortich 2. Hedcor Bukidnon has completed the MOA with the local government units. It is currently completing the permits and licenses until end of May 2014, after which a 24-month construction period will follow.

12 MW Hedcor Tamugan Hydro Power Plant Project. In 2010, AboitizPower's wholly owned subsidiary, Hedcor Tamugan, Inc. (Hedcor Tamugan) has reached an agreement with the Davao City Water District on the use of the Tamugan river. Originally planned as a 27.5 MW run-of-river facility, Hedcor Tamugan submitted a new proposal, which involves the construction of a 12 MW hydropower plant. Hedcor Tamugan is waiting for the Davao City council to approve the project. Once approval and permits are secured, the two-year construction period will commence.

Other Greenfield and Brownfield developments. AboitizPower, together with its subsidiaries and associate company, is conducting feasibility studies for potential Greenfield and Brownfield projects.

- AboitizPower is actively exploring the viability of developing wind power projects and photovoltaic solar projects consistent with the company's focus on environmental sustainability and diversified power generation technologies, among others.

- SNAP is continuing its focus on growth through Greenfield development with new opportunities being sought and 380 MW of projects undergoing feasibility studies.

  The company, in partnership with the National Irrigation Administration (NIA) commenced the rehabilitation and raising of the Maris dam. The project aims to rehabilitate the re-regulating Maris dam downstream of the Magat dam in order to modernize its operations and provide operational flexibility for both irrigation and power generation purposes.

  Additionally, SNAP secured renewable energy service contracts (RESC) from the Department of Energy (DOE) at the close of 2013 for a twin mini-hydro facility project along the Maris Canal. Under Maris Main Canal 1 Project, a 6-MW hydroelectric power plant will be constructed at the Ramon, Isabela side of the irrigation canal while a 1.75-MW hydro facility at the Alfonso Lista, Ifugao side will be developed under Maris Main Canal 2 Project. Both plants are "run-of-river-type" facilities that will make use of the same water that will flow through the canal for irrigation requirements.

- Hedcor is conducting feasibility studies for potential hydropower projects located in Luzon and Mindanao. Based on current findings, Hedcor sees the potential of building plants with capacities ranging from 20 MW to 60 MW. When the projects pass the evaluation stage and once permits are secured, the two-year construction period for the hydropower plant facilities will commence.

5. Participation in the Government's Privatization Program for its Power Assets

AboitizPower continues to closely evaluate the investment viability of the remaining power generation assets that PSALM intends to auction off.

AboitizPower is also keen on participating in PSALM's public auction for the Independent Power Producer (IPP) Administrator contracts, which involves the transfer of the management and control of total energy output of power plants under contract with NPC to the IPP administrators.

Power (Distribution Business)

AboitizPower remains optimistic that it will realize modest growth on its existing distribution utilities. It continually seeks efficiency improvements in its operations to maintain healthy margins.

On December 13, 2006, the ERC issued the Rules for Setting Distribution Wheeling Rates (RDWR) for privately-owned distribution utilities entering Performance Based Rate (PBR) for the second and later entry points, setting out the manner in which this new PBR-setting mechanism for distribution-related charges will be implemented. PBR replaces the Return on Rate Base (RORB) mechanism which has historically determined the distribution charges paid by customers. Under PBR, the distribution-related charges that distribution utilities can collect from customers over a 4-year regulatory period is set by reference to projected revenues which are reviewed and approved by the ERC and used by the ERC to determine a distribution utility's efficiency factor. For each year during the regulatory period, a distribution utility's distribution charges are adjusted upwards or downwards taking into consideration the utility's efficiency factor as against changes in overall consumer prices in the Philippines.

The ERC has also implemented a Performance Incentive Scheme whereby annual rate adjustments under PBR will take into consideration the ability of a distribution utility to meet or exceed service performance targets set by the ERC, such as the average duration of power outages, the average time of restoration to customers and the average time to respond to customer calls, with utilities being rewarded or penalized depending on their ability to meet these performance targets.

Cotabato Light's 2nd Regulatory Period ended on March 31, 2013. A reset process should have been initiated 18 months prior to the start of the 3rd Regulatory Period covering April 1, 2013 to March 31, 2017. The reset process, however, has been delayed due to the issuance of an Issues Paper on the Implementation of PBR for Distribution Utilities under the RDWR by the ERC in 2013. This paper aims to revisit various matters relating to the reset process. The ERC has solicited comments from industry participants and has been holding public consultations on the Issues Paper.

In March 2013, VECO and Davao Light filed their rate translation application for the fourth regulatory year from July 1, 2013 to June 30, 2014. The ERC set the distribution, supply and metering charges of Davao Light and VECO in its Decisions dated June 24, 2013. In the case of VECO, since its implementation of the rate translation in the third regulatory year was delayed by five months, recovery for the under-recovery was included in its MAP recalculation for the fourth regulatory year. A motion for reconsideration was filed by VECO on July 26, 2013 for the ERC to amend its rate design to fully achieve the correct Annual Revenue Requirement for the fourth regulatory year. The said motion was decided upon by the ERC in an Order dated December 9, 2013 (docketed January 16, 2014) modifying the approved rates in the previous Decision. The under-recoveries arising therefrom may be recovered in the next rate filing under the K-factor (correction factor) of the Maximum Average Price formula.

For SEZ's and SFELAPCO's second regulatory year covering October 1, 2012 to September 30, 2013, SEZ was able to implement the new rate schedule in January 2013 while SFELAPCO's

implementation began in April 2013. Consequently, the resulting under-recoveries from the lag starting from October 1, 2012 were included by SFELAPCO and SEZC as under-recoveries in its rate filings in the third regulatory year. The said applications are under the ERC's review as of year-end 2013.

Market and Industry Developments

1. Open Access and Retail Competition

Per EPIRA, the conditions for the commencement of the Open Access and Retail Competition are as follows:

(a) Establishment of the WESM;
(b) Approval of unbundled transmission and distribution wheeling charges;
(c) Initial implementation of the cross subsidy removal scheme;
(d) Privatization of at least 70% of the total capacity of generating assets of NPC in Luzon and Visayas; and
(e) Transfer of the management and control of at least 70% of the total energy output of power plants under contract with NPC to the IPP administrators.

Under the Open Access and Retail Competition, an eligible contestable customer, which is defined as an end-user with a monthly average peak demand of at least 1 MW for the preceding 12 months, will have the option to source their electricity from eligible suppliers that have secured a Retail Electricity Supplier license (RES) from the ERC.

Commencement of Open Access

In June 2011, ERC declared December 26, 2011 as the Open Access Date to mark the commencement of the full operations of the competitive retail electricity market in Luzon and Visayas. However, after careful deliberation, the ERC acknowledged that not all the necessary rules, systems and infrastructures required for the implementation of the Open Access and Retail Competition have been put in place to meet the contemplated timetable for implementation. In October 2011, the ERC announced the deferment of the Open Access Date. In September 2012, the ERC declared the start of Open Access on December 26, 2012. Open Access commercial operations under an interim development system have been implemented starting June 26, 2013.

The implementation of Open Access starting June 26, 2013 enabled AboitizPower to increase its contracted capacity through the delivery of power to affiliate and non-affiliate RES companies. AboitizPower has two wholly owned subsidiaries (i.e. Aboitiz Energy Solutions, Inc. and AdventEnergy, Inc.) that are licensed RES. Open Access allowed Aboitiz Energy Solutions, Inc. and AdventEnergy, Inc. to enter into contracts with the eligible contestable customers. Moreover, Open Access also facilitated AboitizPower to contract with other RES companies. Currently, AboitizPower has signed contracts equivalent to approximately 300 MW through its RES companies.

The ERC issued Resolution 22 Series of 2013

ERC issued revised licensing regulation for RES companies operating in the Retail Supply Segment last December 19, 2013. Items amended include the following:

- Restriction for Generator, IPPA and DU affiliates in securing license as a RES company;
- Transfer of live Retail Supply Contracts (RSCs) for RES with expired license to another licensed RES;

- Determination of full retail competition to be made by ERC not later than June 25, 2015;
- Contracted capacities of RES affiliates to be included in the grid limitations imposed on Generation Companies;
- End-user affiliate RES limited to supplying up to 50% of its total contestable customer affiliates;
- RES companies are limited to procuring up to 50% of its generation requirements from affiliate Generation Companies;
- Annual submission of 5-year Business Plan; and
- Submission of live Retail Supply Contracts for review by the ERC.

Since Resolution 22 Series of 2013 limits the retail suppliers and creates non-assurance of renewal of RES license for existing retailers, then the Retail Electricity Suppliers Association (RESA) challenged its legality at the Pasig RTC. Trial is currently on-going to clarify legality of such issuance.

2. Interim Mindanao Electricity Market (IMEM)

The Department of Energy (DOE) issued Department Circular No. 2013-05-0008 "Promulgating the Interim Mindanao Electricity Market Implementing Rules". Correspondingly, DOE also issued DC No. 2013-09-0020 approving pertinent IMEM Manuals.

The IMEM has the following features:

- Day-ahead pricing and scheduling;
- Zonal pricing
- IMEM is for available resource capacity after taking out bilateral contract quantities
- In-Day Market is for imbalances or deviation from day-ahead schedules only
- Deviations from day-ahead schedule will be subject to penalties and incentives

The IMEM started on December 3, 2013 and the first IMEM billing period ended on December 25, 2013. The first IMEM billing period has not been fully settled and succeeding billing periods were still not billed by PEMC. Since then, the IMEM has been under market intervention due to transmission issues effective March 14, 2014.

3. Price Hike Issue for November and December 2013 Billing Months

Due to the maintenance shutdown of Malampaya Natural Gas Field, the dispatch of Natural Gas-fired power plants were affected which caused the increase in the WESM prices in November and December 2013 Billing Months. The Supreme Court issued a Temporary Restraining Order (TRO) in GR Nos. 210245 and 201255, pegging the generation charge of Meralco to PhP5.6673/kWh. The TRO should have ended last February 2014, however was extended until April 2014. The extended TRO also includes the generators non-collection of the increase in generation charge.

Issuance of ERC Case No. 2014-021MC

ERC issued ERC Case No. 2014-021 MC "In the Matter of the Prices in the Wholesale Electricity Spot Market (WESM) For the Supply Months of November and December 2013 and the Exercise by the Commission of its Regulatory Powers to Intervene and Direct the Imposition of Regulated Prices therein without Prejudice to the ongoing Investigation on the Allegation of Anti-Competitive Behavior and Possible Abuse of Market Power Committed by some WESM Participants" on March 3, 2014. The ERC issued an Order to VOID the WESM Prices in Luzon for November and December billing periods and declares the imposition of regulated prices in lieu thereof, in the exercise of its police power.

The ERC Order adjusted prices retroactively. Regulated prices are calculated based on the load weighted average of the ex-post nodal energy prices and meter quantity of the same day same interval that have not been administered from December 26, 2012 to September 25, 2013. The Order includes the availment of oil-based plants of additional compensation to cover their full Fuel and Variable O&M Costs. Several subsidiaries and affiliates of AboitizPower, most notably SNAP Magat, SNAP Benguet, APRI, and TLI, will be affected by the decision as they had exposure to the spot market during the November-December period either as purchasers (as in the case of TLI), or as sellers.

4. Reserve Market

The DOE issued Department Circular No. DC2013-12-0027, "Declaring the Commercial Launch for the Trading of Ancillary Service in Luzon and Visayas under the Philippine Wholesale Electricity Spot Market" dated December 2, 2013. The said Department Circular sets the responsibility of the Philippine Electricity Market Corporation (PEMC), NGCP, NEA and all WESM Members with regards to the operation of the Reserve Market.

The trial operations started on February 26, 2014, and PEMC is still reviewing its results before certifying for market readiness. The Pricing and Cost Recovery Mechanism of the Reserve Market is still under review by the ERC under ERC Case # 2007-004RC. The last hearing was on March 13, 2014.

The tentative launching of the Reserve Market is on May 26, 2014 for three (3) reserve categories, namely: Frequency Regulation, Contingency Reserve and Dispatchable Reserve. The Reserve Market will also include the scheduling of the ancillary services under ASPA with NGCP.

Financial Services

UnionBank's initiatives on strengthening its customer franchise will continue to be at the forefront as it prioritizes customer satisfaction through enhanced retail focus, superior innovation and product customization, and stronger sales management approach. UnionBank will continue to invest in technology, cultivate partnerships and rationalize branch network expansion in strategic areas to maximize growth channels with respect to both deposits and loan accounts.

UnionBank will continue to focus on improving the performance of its earning assets portfolio, with loan asset acquisition in the retail, middle-market and corporate sectors. The bank will implement a disciplined asset allocation built on good governance and effective risk management to ensure momentum of recurrent income stream. At the same time, UnionBank is focusing on improving its deposit liabilities mix by targeting low-cost funds (i.e. CASA).

Likewise, UnionBank will continue to enhance operating efficiencies through cost containment efforts and improvements in its business processes and systems to align with international standards and best practices, and increase in manpower productivity with the help of functional and developmental trainings as well as appropriate matching of job, skills and capabilities.

CitySavings, the newly acquired subsidiary thrift bank of UnionBank, will continue with its unique focus as the preferred Teachers' Bank in the Philippines, particularly expanding its customer franchise in areas outside of its present coverage. It will continuously enhance its products and services to strengthen its market position in its present niche and tap other civil servant market segments.

The combined unique strengths of UnionBank and CitySavings' management team as well as its attainted technological and financial capabilities will catapult both to greater heights towards elevating the lives of its stakeholders and the communities it serves.

Food Manufacturing

For the Farm's business, Pilmico's goal is to increase its sow capacity by 30% by 2014, with 70% of the finishing farms owned and operated by the company. In support of this initiative, construction of a new nursery farm has been completed. Additionally, it will continue to expand the existing breeder farm and increase the capacity of the growing-finishing farms. For Feeds, the 2nd Iligan Feedmill Plant is planned for completion on January 2015. This will double Iligan Feedmill's capacity and will allow Pilmico to absorb growth targets in the next 10 years.

Aside from the expansion and improvement of the company's facilities in Iligan and Tarlac, and farms in Luzon, projects to ensure sustainability and reduce the company's carbon footprint are being eyed. A biogas project for two farms is projected to produce 300,000 kWh annually, whereas the construction of biomass boilers will reduce fuel cost in steam production.

Property

After 20 years of nurturing communities for Cebuanos, AboitizLand's primary thrust for 2014 is to grow the business on a national scale while intensifying its market position in Cebu. In support of this challenge, AboitizLand will build the team which will focus on growing the business at the national level. The company will also continue to strengthen its organization in Cebu by attracting the best talents and applying the latest technology available.

Residential business unit will continue to be the major revenue contributor to AboitizLand. Residential sales and revenue for 2014 will exceed the record it set in 2013 as the company looks toward launching new projects in both Cebu and Luzon.

The expansion of the Industrial business unit of AboitizLand started in 2013 when it acquired 60% ownership of Lima Land, Inc., the developer of Lima Technology Center (Lima) industrial park in Malvar, Batangas. The remaining 40% was acquired by the Company in February 2014. This acquisition gave AboitizLand a firm foothold in the Luzon industrial real estate market. Lima's 150-hectare expansion is now underway and this will augment the company's revenue and profit levels for 2014 onwards. AboitizLand now owns and operates three industrial zones including Mactan Economic Zone II and West Cebu Industrial Park.

On the commercial side, the momentum generated from the success of The Outlets at Pueblo Verde will continue with an expansion of this commercial development.

AboitizLand continuously explore new real estate businesses to complement its existing residential, commercial and industrial projects. The 50-50 JV with Ayala Land took into effect in February 2014 with the signing of the agreement and incorporation of the JV company, Cebu District Property Enterprise, Inc. (CDPEI). In 2015, CDPEI will start to develop the 15-hectare Subangdaku property into a city center with residential, commercial, retail and office components.

PART II--OTHER INFORMATION

There are no significant information on the company which requires disclosure herein and/or were not included in SEC Form 17-C.

J. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments comprise cash and cash equivalents, AFS investments, bank loans, long-term debt, obligations under finance lease and non-convertible, cumulative, redeemable preferred shares. The main purpose of these financial instruments is to raise finances for the Group's operations and its investments in existing subsidiaries and associates and in new projects. The Group has other financial assets and liabilities such as trade and other receivables, trade and other payables and customer deposits which arise directly from operations.

The main risks arising from the Group's financial instruments are interest rate risk resulting from movements in interest rates that may have an impact on outstanding long-term debt; credit risk involving possible exposure to counter-party default on its cash and cash equivalents, AFS investments and trade and other receivables; liquidity risk in terms of the proper matching of the type of financing required for specific investments; and foreign exchange risk in terms of foreign exchange fluctuations that may significantly affect its foreign currency denominated placements and borrowings. The Board of Directors reviews and agrees policies for managing each of these risks and they are summarized below.

Interest rate risk. The Group's exposure to market risk for changes in interest rates relates primarily to its long-term debt obligations. To manage this risk, the Group determines the mix of its debt portfolio as a function of the level of current interest rates, the required tenor of the loan, and the general use of the proceeds of its various fund raising activities. As of March 31, 2014, 5.49% of the Group's long-term debt had floating interest rates ranging from 1.31% to 2.75%, and 94.51% are with fixed rates ranging from 3.50% to 7.68%. As of December 31, 2013, 5.84% of the Group's long-term debt had floating interest rates ranging from 1.31% to 2.75%, and 94.16% are with fixed rates ranging from 3.50% to 7.68%.

The following table set out the carrying amount, by maturity, of the Group's financial instruments that are exposed to interest rate risk:

As of March 31, 2014

	< 1 year	**1 - 5 years**	**> 5 years**	**Total**
Floating rate - long-term debt	**264,857**	**1,370,152**	**498,878**	**2,133,887**
Fixed rate - long-term debt	**922,428**	**8,687,330**	**27,155,623**	**36,765,381**
	1,187,285	**10,057,482**	**27,654,501**	**38,899,268**

As of December 31, 2013

	< 1 year	1 - 5 years	> 5 years	Total
Floating rate - long-term debt	281,211	1,336,500	495,004	2,112,715
Fixed rate - long-term debt	935,258	8,169,731	24,983,284	34,088,273
	1,216,469	9,506,231	25,478,288	36,200,988

Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until the maturity of the instrument. The other financial instruments of the Group that are not included in the above tables are non-interest bearing and are therefore not subject to interest rate risk.

Interest expenses recognized during the comparative periods are as follows:

	JAN-MAR 2014	JAN-MAR 2013
Long term debt	**253,680**	320,372
Bank loans	**31,047**	57,113
Customers' deposits	**715**	215
Obligations under finance lease	**1,570,381**	1,194,414
Long-term obligation on PDS and others	**37,829**	8,256
Payable to preferred shareholder of a subsidiary	**-**	6,027
Advances from related parties	**1,884**	398
	1,895,536	1,586,795

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's profit before tax (through the impact on floating rate borrowings) as of March 31, 2014 and 2013:

	Increase/decrease in basis points	Effect on income before tax
MAR 31, 2014	**200**	**(10,523)**
	(100)	**5,262**
MAR 31, 2013	100	(5,894)
	(100)	2,947

Foreign exchange risk. The foreign exchange risk of the Group pertains significantly to its foreign currency denominated borrowings, including obligations under finance lease. To mitigate the risk of incurring foreign exchange losses, foreign currency holdings are matched against the potential need for foreign currency in financing equity investments and new projects. As of March 31, 2014 and December 31, 2013, foreign currency denominated borrowings account for 30.80% and 31.79%, respectively, of total consolidated borrowings.

	MARCH 31, 2014		DECEMBER 31, 2013	
	US Dollar	**Peso Equivalent[1]**	US Dollar	Peso Equivalent[2]
Current Financial Assets				
Cash and cash equivalents	**65,153**	**2,919,823**	61,080	2,711,647
Trade and other receivables	**1,774**	**79,504**	17,430	773,793
Total Financial Assets	**66,927**	**2,999,327**	78,510	3,485,439

	US Dollar	**Peso Equivalent**	US Dollar	Peso Equivalent
Current Financial Liabilities				
Bank loans	**0**	**0**	6,350	281,908
Trade and other payables	**2,295**	**102,867**	9,363	415,677
Long-term debt	**47,616**	**2,133,889**	48,801	2,166,528
Obligations under finance lease	**624,883**	**28,004,132**	627,812	27,871,714
Total Financial Liabilities	**674,794**	**30,240,887**	692,326	30,735,828
Net foreign currency denominated assets (liabilities)	**(607,867)**	**(27,241,560)**	(613,817)	(27,250,388)

[1]USD1 = 44.82
[2]USD1 = 44.40

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rates, with all other variables held constant, of the Group's profit before tax as of March 31, 2014.

	Increase (decrease) in US dollar rate	Effect on income before income tax
US dollar denominated accounts	5%	(1,362,078)
US dollar denominated accounts	-5%	1,362,078

The increase in US dollar rate represents the depreciation of the Philippine peso while the decrease in US dollar rate represents appreciation of the Philippine peso.

There is no other impact on the Group's equity other than those already affecting the consolidated statement of income.

Equity price risk. Equity price risk is the risk that the fair value of traded equity instruments decrease as the result of the changes in the levels of equity indices and the value of the individual stocks.

As of March 31, 2014 and 2013, the Group's exposure to equity price risk is minimal.

Credit risk. For its cash investments, AFS investments and receivables, the Group's credit risk pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these assets. With respect to cash and AFS investments, the risk is mitigated by the short-term and or liquid nature of its cash investments mainly in bank deposits and placements, which are placed with financial institutions of high credit standing. With respect to receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Group's policy to enter into transactions with a diversity of credit-worthy parties to mitigate any significant concentration of credit risk. The Group ensures that sales are made to customers with appropriate credit history and has internal mechanism to monitor the granting of credit and management of credit exposures. The Group has no significant concentration risk to a counterparty or group of counterparties.

Liquidity risk. Liquidity risk is the risk that an entity in the Group will be unable to meet its obligations as they become due. The Group manages liquidity risk by effectively managing its working capital, capital expenditure and cash flows, making use of a centralized treasury function to manage pooled business unit cash investments and borrowing requirements. Currently the Group is maintaining a positive cash position, conserving the Group's cash resources through renewed focus on working capital improvement and capital reprioritization. The Group meets its financing requirements through a mixture of cash generated from its operations and short-term and long-term borrowings. Adequate banking facilities and reserve borrowing capacities are maintained. The Group is in compliance with all of the financial covenants per its loan agreements, none of which is expected to present a material restriction on funding or its investment policy in the near future. The Group has sufficient undrawn borrowing facilities, which could be utilized to settle obligations.

In managing its long-term financial requirements, the policy of the Group, is that not more than 25% of long term borrowings should mature in any twelve-month period. As of March 31, 2014 and December 31, 2013, the portion of the total long-term debt, inclusive of customers' deposits, that will mature in less than one year is 1.98% and 2.06%, respectively. For its short-term funding, the policy of the Group is to ensure that there are sufficient working capital inflows to match repayments of short-term debt.

Cash and cash equivalents and trade and other receivables, which are all short-term in nature, have balances of P39,396,297 and P16,013,907 as of March 31, 2014 and P36,118,190 and P17,528,489 as of December 31, 2013, respectively. These financial assets will be used to fund short-term and operational liquidity needs of the Group.

The following table analyzes the financial liabilities of the Group into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity. The amounts disclosed in the table are the contractual undiscounted cash flows:

MARCH 31, 2014

* Excludes statutory liabilities

Capital management. Capital includes equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes during the periods ended March 31, 2014 and December 31, 2013.

Certain entities within the Group that are registered with the Board of Investments are required to raise minimum amount of capital in order to avail of their registration incentives. As of March 31, 2014 and December 31, 2013, these entities have complied with this requirement as applicable.

The Group monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. The Group's policy is to keep the gearing ratio at 70% or below at the consolidated level. The Group determines net debt as the sum of interest-bearing short-term and long-term obligations (comprised of long-term debt, obligations under finance lease, redeemable preferred shares and payable to preferred shareholders of a subsidiary) less cash and short-term deposits and temporary advances to related parties.

Gearing ratios of the Group as of March 31, 2014 and December 31, 2013 are as follows:

	MAR. 31, 2014	**DEC. 31, 2013**
Bank Loans	**3,692,805**	3,959,509
Long - term debt	**94,160,851**	91,403,751

Net Debt (a)	**58,457,359**	59,245,070
Equity attributable to equity holders of the parent	**127,889,327**	122,549,471
Equity and Net Debt (b)	**186,346,686**	181,794,541
Gearing Ratio (a/b)	**31.37%**	32.59%

K. FINANCIAL INSTRUMENTS

Set out below is a comparison by category of carrying amounts and fair values of the Group's financial instruments whose fair values are different from their carrying amounts.

	MARCH 31, 2014		DECEMBER 31, 2013	
	Carrying Amount	**Fair Value**	Carrying Amount	Fair Value
Financial liabilities				
Other financial liabilities				
Obligations on power distribution system	**271,903**	**415,074**	263,865	426,172
Obligations under finance leases	**55,261,583**	**63,940,748**	55,202,763	65,573,581
Long-term debt - fixed rate	**36,765,381**	**34,060,930**	34,088,273	34,261,679
Total	**92,298,867**	**98,416,752**	89,554,901	100,261,432

As of March 31, 2014 and December 31, 2013, the group does not have any investment in foreign securities nor has it issued any traded foreign-denominated debt securities.

Fair Value of Financial Instruments

Fair value is defined as the amount for which an asset could be exchanged or a liability settled between knowledgeable, willing parties in an arm's length transaction. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate. A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring maket transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available, and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with an inactive market, its fair value is determined using a valuation technique (e.g., discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price.

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables and trade and other payables

The carrying amounts of cash and cash equivalents, trade and other receivables and trade and other payables approximate fair value due to the relatively short-term maturity of these financial instruments.

Fixed-rate borrowings

The fair value of fixed-rate interest-bearing loans is based on the discounted value of future cash flows using the applicable rates for similar types of loans.

Variable-rate borrowings and Obligations under finance lease

Where the repricing of the variable-rate interest-bearing loan is frequent (i.e., three-month repricing), the carrying value approximates the fair value. Otherwise, the fair value is determined by discounting the principal plus the known interest payment using current market rates.

Customers' deposits

The fair value of bill deposits approximates the carrying values as these deposits earn interest at the prevailing market interest rate in accordance with regulatory guidelines. The timing and related amounts of future cash flows relating to transformer and lines and poles deposits cannot be reasonably and reliably estimated for purposes of establishing their fair values using an alternative valuation technique.

Redeemable preferred shares

The fair values of the redeemable preferred shares are based on the discounted value of future cash flows using the applicable rates for similar types of borrowings.

AFS investments

The fair values of AFS investments are based on quoted market prices. The publicly-traded equity securities which are owned by the group are all actively traded in the stock market.

Obligations under Power Distribution System

The fair value of long term obligation on power distribution system is calculated by discounting expected future cash flows at prevailing market rates.

Derivative asset and liabilities

The fair value is calculated by reference to prevailing interest rate differential and spot exchange rate as of valuation date, taking into account its remaining term to maturity. The Group enters into derivative financial instruments with financial institutions with investment grade credit ratings. Derivative valued using a valuation technique with market observable inputs pertains to a foreign exchange forward contract. The most applied valuation technique is forward pricing. The model incorporates various inputs including the credit quality of counterparty and foreign exchange spot and forward rates.

Fair Value Hierarchy

The Group uses the following hierarchy for determining the fair value of financial instruments by valuation

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities
Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly
Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data

As of March 31, 2014 and December 31, 2013, the Group held the following financial instruments that are

MARCH 31, 2014

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
AFS investments	**13,234**	**13,234**	**-**	**-**
Derivative asset	**20,350**	**-**	**20,350**	**-**
Carried at fair value:				
Obligations under finance leases	**63,940,748**	**-**	**-**	**63,940,748**
Long-term debt - fixed rate	**34,060,930**	**-**	**-**	**34,060,930**
Obligations on power distribution system	**415,074**	**-**	**-**	**415,074**

DECEMBER 31, 2013

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
AFS investments	11,636	11,636	-	-
Derivative asset	30,900	-	30,900	-
Derivative liability	23	-	23	-
Carried at fair value:				
Obligations under finance leases	65,573,581	-	-	65,573,581

Long-term debt - fixed rate	34,261,679	-	-	34,261,679
Obligations on power distribution system	426,172	-	-	426,172

During the periods ended March 31, 2014 and December 31, 2013, there were no transfers between level 1 and level 2 fair value measurements and transfers into and out of level 3 fair value measurement.

Derivative financial instruments
The Group enters into non-deliverable short-term forward contracts with counterparty banks to manage foreign currency risks associated with foreign currency-denominated liabilities and purchases. It also enters into interest rate swap agreements to fully hedge its floating rate exposure on its foreign currency-denominated loans.

As of March 31, 2014 and December 31, 2013, the Group recognized derivative asset relating to these contracts amounting to P20.4 million and P30.9 million, respectively.

The movements in fair value changes of all derivative instruments for the year ended March 31, 2014 and December 31, 2013 are as follows:

	MAR 2014	DEC 2013
At beginning of period	**30,877**	(26,542)
Net changes in fair value of derivatives designated as accounting hedges	**-**	29,173
Net changes in fair value of derivatives not designated as accounting hedges	**(257)**	394
Fair value of settled instruments	**(10,270)**	27,852
At end of period	**20,350**	30,877

The gain (loss) amounting to (P0.3 million) in 2014 and P0.4 million in 2013 from the net fair value changes relating to the forward contracts are included as “Foreign exchange gains - net” under “Other income - net”. The changes in the fair value of the interest rate swap designated as a cash flow hedge were deferred in equity under “Cumulative translation adjustment.”

L. DISCLOSURES

1. Company Information and Basis of Financial Statements Preparation

Company Information

Aboitiz Equity Ventures, Inc. (the Company) was incorporated and is domiciled in the Republic of the Philippines. The Company and its subsidiaries (collectively referred to as the "Group") are engaged in various business activities mainly in the Philippines, including power generation and distribution, food manufacturing, banking and financial services, and real estate development. The Company is the publicly-listed holding and management company of the Group. The registered office address of the Company is 32nd Street, Bonifacio Global City, Taguig City, Metro Manila Philippines. The parent and the ultimate parent of the Company is Aboitiz & Company, Inc. (ACO).

Basis of Preparation

The accompanying unaudited condensed consolidated financial statements include the accounts of Aboitiz Equity Ventures, Inc. (being referred to as "the" Company") and its subsidiaries collectively referred to as "Group".

The unaudited consolidated financial statements are prepared on a historical cost basis, except for derivative financial instruments, AFS investments and investment properties which are measured at fair value, and agricultural produce and biological assets which are measured at fair value less estimated point-of-sale costs. These financial statements are presented in Philippine peso and all values are rounded to the nearest thousands, except for earnings per share and exchange rates and as otherwise indicated.

Statement of Compliance

The unaudited condensed consolidated financial statements have been prepared in accordance with Philippine Accounting Standard (PAS) 34, Interim Financial Reporting. Accordingly, the unaudited condensed consolidated financial statements do not include all of the information and disclosures required in the December 31, 2013 annual audited consolidated financial statements, and should be read in conjunction with the Group's annual consolidated financial statements as of and for the year ended December 31, 2013.

On May 6, 2014, the Audit Committee of the Board of Directors approved and authorized the release of the accompanying unaudited condensed consolidated financial statements of Aboitiz Equity Ventures, Inc. and subsidiaries.

2. Summary of Significant Accounting Policies

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year except for the new and revised PFRS and Philippine Interpretations which the Group has adopted starting January 1, 2014. Except as otherwise indicated, adoption of the following new and amended PFRS and Philippine Interpretations did not have any significant impact to the Group's consolidated financial statements:

• PAS 36, Impairment of Assets - Recoverable Amount Disclosures for Non-Financial Assets (Amendments)
These amendments remove the unintended consequences of PFRS 13 on the disclosures required under PAS 36. In addition, these amendments require disclosure of the recoverable amounts for the assets or cash-generating units (CGUs) for which impairment loss has been recognized or reversed during the period. These amendments are effective retrospectively for annual periods beginning on or after January 1, 2014 with earlier application permitted, provided PFRS 13 is also applied. The amendments affect disclosures only and had no impact on the Group's financial position or performance.

• Investment Entities (Amendments to PFRS 10, PFRS 12 and PAS 27)
These amendments provide an exception to the consolidation requirement for entities that meet the definition of an investment entity under PFRS 10. The exception to consolidation requires investment entities to account for subsidiaries at fair value through profit or loss. This amendment is not relevant to the Group since none of the entities in the Group qualifies as an investment entity under PFRS 10.

• Philippine Interpretation IFRIC 21, Levies (IFRIC 21)
IFRIC 21 clarifies that an entity recognizes a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be anticipated before the specified minimum threshold is reached.

• PAS 39, Financial Instruments: Recognition and Measurement - Novation of Derivatives and Continuation of Hedge Accounting (Amendments)
These amendments provide relief from discontinuing hedge accounting when novation of a derivative designated as a hedging instrument meets certain criteria. The Group has not novated its derivatives during the current period. However, these amendments would be considered for future novations.

• PAS 32, Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities (Amendments)
The amendments clarify the meaning of "currently has a legally enforceable right to set-off" and also clarify the application of the PAS 32 offsetting criteria to settlement systems (such as central clearing house systems) which apply gross settlement mechanisms that are not simultaneous. The amendments affect presentation only and had no impact on the Group's financial position or performance. The amendments to PAS 32 are to be retrospectively applied for

New Accounting Standards, Interpretations, and Amendments to Existing Standards Not Yet Effective as of January 1, 2014

The Group will adopt the standards and interpretations enumerated below when these become effective. Except as otherwise indicated, the Group does not expect the adoption of these new and amended PFRS and Philippine Interpretations to have significant impact on its financial statements.

• PAS 19, Employee Benefits - Defined Benefit Plans: Employee Contributions (Amendments)
The amendments apply to contributions from employees or third parties to defined benefit plans. Contributions that are set out in the formal terms of the plan shall be accounted for as reductions to current service costs if they are linked to service or as part of the remeasurements of the net defined benefit asset or liability if they are not linked to service. Contributions that are discretionary shall be accounted for as reductions of current service cost upon payment of these contributions to the plans. The amendments to PAS 19 are to be retrospectively applied for annual periods beginning on or after July 1, 2014.

• PFRS 9, Financial Instruments
PFRS 9, as issued, reflects the first phase on the replacement of PAS 39 and applies to the classification and measurement of financial assets and liabilities as defined in PAS 39, Financial Instruments: Recognition and Measurement. Work on impairment of financial instruments and hedge accounting is still ongoing, with a view to replacing PAS 39 in its entirety. PFRS 9 requires all financial assets to be measured at fair value at initial recognition. A debt financial asset may, if the fair value option (FVO) is not invoked, be subsequently measured at amortized cost if it is held within a business model that has the objective to hold the assets to collect the contractual cash flows and its contractual terms give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal outstanding. All other debt instruments are subsequently measured at fair value through profit or loss. All equity financial assets are measured at fair value either through other comprehensive income (OCI) or profit or loss. Equity financial assets held for trading must be measured at fair value through profit or loss. For FVO liabilities, the amount of change in the fair value of a liability that is attributable to changes in credit risk must be presented in OCI. The remainder of the change in fair value is presented in profit or loss, unless presentation of the fair value change in respect of the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss. All other PAS 39 classification and measurement requirements for financial liabilities have been carried forward into PFRS 9, including the embedded derivative separation rules and the criteria for using the FVO. The adoption of the first phase of PFRS 9 will have an effect on the classification and measurement of the Group's financial assets, but will potentially have no impact on the classification and measurement of financial liabilities.

On hedge accounting, PFRS 9 replaces the rules-based hedge accounting model of PAS 39 with a more principles-based approach. Changes include replacing the rules-based hedge effectiveness test with an objectives-based test that focuses on the economic relationship between the hedged item and the hedging instrument, and the effect of credit risk on that economic relationship; allowing risk components to be designated as the hedged item, not only for financial items, but also for non-financial items, provided that the risk component is separately identifiable and reliably measurable; and allowing the time value of an option, the forward element of a forward contract and any foreign currency basis spread to be excluded from the designation of a financial instrument as the hedging instrument and accounted for as costs of hedging. PFRS 9 also requires more extensive disclosures for hedge accounting.

After evaluating the impact of PFRS 9 and considering that it will not have any significant effect on the Group's operating results or financial condition, management has decided not to early adopt the said standard. It will be implemented only when it becomes effective on January 1, 2015. Thus, the interim consolidated financial statements do not reflect the impact of the said standard.

• Philippine Interpretation IFRIC 15, Agreements for the Construction of Real Estate
This interpretation covers accounting for revenue and associated expenses by entities that undertake the construction of real estate directly or through subcontractors. The interpretation requires that revenue on construction of real estate be recognized only upon completion, except when such contract qualifies as construction contract to be accounted for under PAS 11 or involves rendering of services in which case revenue is recognized based on stage of completion. Contracts involving provision of services with the construction materials and where the risks and reward of ownership are transferred to the buyer on a continuous basis will also be accounted for based on stage of completion. The SEC and the Financial Reporting Standards Council have deferred the effectivity of this interpretation until the final Revenue standard is issued by the International Accounting Standards Board and an evaluation of the requirements of the final Revenue standard against the practices of the Philippine real estate industry is completed.

3. Principles of Consolidation

The consolidated financial statements include the financial statements of the Company and the subsidiaries listed in the following table .

		MARCH 31, 2014		DECEMBER 31, 2013	
	Nature of Business	**Direct**	**Indirect**	Direct	Indirect
Aboitiz Power Corporation (AP) and Subsidiaries	Power	**76.83%**	**–**	76.83%	–

AEV Properties, Inc.	Real estate	**100**	–	100	–
Cebu Praedia Development Corporation (CPDC)	Real estate	**100**	–	100	–

For a total consideration of USD 8.3 million, AEV sold on February 12, 2014 all its interests in Aboitiz Jebsen Company, Inc., Aboitiz Jebsen Manpower Solutions, Inc., and Jebsens Maritime, Inc. (collectively the “Abojeb Group”) to PTC Holdings Corporation, Behike Holdings, Inc., Valdicava Holdings, Inc., Jebsen Invest A.S. and Furunes Holdings Inc. As a result of this sale, Abojeb Group was deconsolidated from the March 31, 2014 financial statements of the Group, and a gain amounting to P274 million was reported under “Other income – net” account in the consolidated statements of income.

4. Seasonality of Interim Operations

Operations of hydropower plants are generally affected by climatic seasonality. Seasonality and location have a direct effect on the level of precipitation. In Luzon where rainy and summer seasons are more pronounced, higher rainfall is normally experienced in the months of June to September. As such, the hydropower plants located in Luzon operate at their maximum capacity during this period. In contrast, the hydropower plants in Mindanao experience a well distributed rainfall throughout the year, with a slightly better precipitation during the months of December to April. This provides continuous water flow and thus makes it favorable to all ‘run-of-river’ hydropower plants’ operations.

Any unexpected change in the seasonal aspects will have no material effect on the Group's financial condition or results of operations. During and as of the end of the current interim period, no seasonal aspect had any material effect on the Group’s results of operations or financial condition.

5. Material Events and Changes

a. AEV Dividend Declaration

On March 11, 2014, the BOD of the Company approved the declarations of a regular cash dividend of P1.27 a share (P7.01 billion) and a special cash dividend of P0.53 a share (P2.93 billion) to all stockholders of record as of March 25, 2014, payable on April 22, 2014.

b. Joint Venture with ALI

On January 24, 2014, AEV and Aboitiz Land, Inc. (AboitizLand), a wholly-owned subsidiary of AEV, formally entered into a joint venture agreement with Ayala Land, Inc. (ALI) for the development of a 15-hectare mixed-use community in Mandaue City, Cebu.

c. Sale of Abojeb Shares

On February 12, 2014, AEV completed the divestment of its interests in the shipping and shipping related businesses with the disposition of all its interests in Aboitiz Jebsen Company, Inc., Aboitiz Jebsen Manpower Solutions, Inc., and Jebsens Maritime, Inc. (collectively the "Abojeb Group") to PTC Holdings Corporation, Behike Holdings, Inc., Valdicava Holdings, Inc., Jebsen Invest A.S. and Furunes Holdings Inc. The total consideration of this sale is equivalent to USD 8.3 million. Said divestment is part of AEV's strategy to focus on its identified core businesses such as power generation and distribution, financial services, food and real estate and infrastructure.

d. Complete Acquisition of Lima Land, Inc.

On February 21, 2014, AboitizLand acquired the remaining 360 million common shares in Lima Land, Inc. (LLI) from Marubeni Corporation ("Marubeni"), representing 40% of LLI's total issued and outstanding shares. This brings AboitizLand's ownership in LLI to 100%, following its purchase of Alsons Land Corporation's 60% interest in LLI last October 2013.

LLI is the owner and operator of LiMA Technology Center in Batangas.

Except for the above developments and as disclosed in some other portions of this report, no other significant event occurred that would have a material impact on the registrant and its subsidiaries, and no other known trend, event or uncertainty came about that had or were reasonably expected to have a material favorable or unfavorable impact on revenues or income from continuing operations, since the end of the most recently completed fiscal year. There were also no significant elements of income or loss that did not arise from the continuing operations of the registrant and its subsidiaries. Likewise, during and as of the end of the current interim period, there were no other unusual items (due to their nature, size or incidents) that affected liabilities, assets, equity, net income, or cash flows.

Other than those disclosed above, no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships with unconsolidated entities or other persons entities or other persons were created during the interim period. There were also no events that would trigger substantial direct or contingent financial obligations or cause any default or accelaration of an existing obligation.

Likewise, there were no other material changes made in such items as: accounting principles & practices, estimates inherent in the preparation of financial statements, status of long-term contracts, changes in the composition of the issuer, and reporting entity resulting from business combinations or dispositions.

Lastly, there were no changes in estimates of amounts reported in prior interim period and financial year that would have a material effect in the current interim period.

6. **Events After the Reporting Period**

There are no significant events to disclose after the March 31, 2014 reporting period.

7. Material Adjustments

There were no material, non-recurring adjustments made during the period that would require appropriate disclosures. All other adjustments are of a normal recurring nature.

8. Contingencies

The Group is a party to certain proceedings and legal cases with other parties in the normal course of business. The ultimate outcome of these proceedings and legal cases cannot be presently determined. Management, in consultation with its legal counsels, believes that it has substantial legal and factual bases for its positions and is currently of the opinion that the likely outcome of these proceedings and legal cases will not have a material adverse effect on the Group's financial position and operating results. It is possible, however, that the future results of operations could be materially affected by changes in estimates or in the effectiveness of the strategies relating to these proceedings and legal cases.

AP obtained standby letters of credit (SBLC) and is acting as surety for the benefit of certain subsidiaries and associates in connection with loans and credit accommodations.

M. SCHEDULE OF RELEVANT FINANCIAL RATIOS

	FORMULA	DEC. 31, 2013	MAR. 31, 2014
LIQUIDITY RATIOS
