

## Singapore Zoo

Since 1973, Singapore Zoo has been known for having among the most beautiful wildlife park settings in the world, where animals roam freely in open and naturalistic habitats.

More than 2,800 animals representing over 300 species of mammals, birds and reptiles call Singapore Zoo home.

Many of our animal habitats incorporate special viewing features such as elevated platforms to view our giraffe exhibit underwater galleries to see the watery world of our otters, pygmy hippos and giant estuarine crocodiles, as well as glass observatories to see animals such as the predatory cheetahs and lions. On top of the fascinating perspective of the animals, you get to view them in environments that have been thoughtfully built and landscaped after their habitats in the wild.
