

Unicorn Glitterluck

ENGLISH

A Party for Rosalie

A cooperative movement and collecting game for 2 to 4 players between 4 and 99 years old.

Author: Kristin Mückel
Illustration: Stephanie Roehe
Length of the game: Approx. 15 minutes

Yippee! A new baby unicorn named Rosalie is coming to Cloudland! The unicorns Glitterluck, Stardust, Marvel Flower, and Magic Swirl want to give Rosalie a fantastic reception and throw a huge welcoming party. They invite all their friends and collect incredibly large cloud crystals. But they must hurry since everything at the party is supposed to be ready before Rosalie arrives.

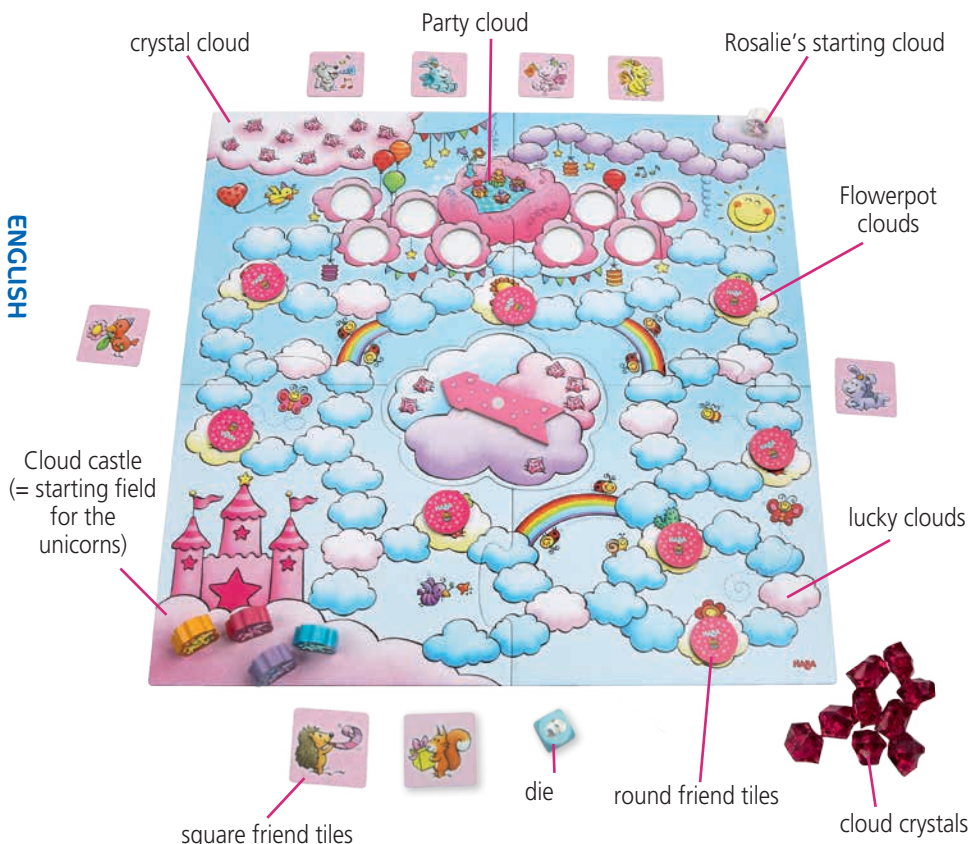

Contents

4 unicorns: Glitterluck (hot pink), Stardust (yellow), Marvel Flower (purple), and Magic Swirl (turquoise), 1 baby unicorn – Rosalie (pink), 1 die, 1 game board with spinning arrow, 8 round friend tiles, 8 square friend tiles, 10 cloud crystals, 1 set of instructions

Before the first game: Press the round tiles carefully out of the game board.

Preparation

Complete the game board jigsaw puzzle and place it in the middle of the table. Each child chooses a unicorn and places it on the cloud castle on the lower left edge of the game board (= start). Extra unicorns are put back into the box. Place Rosalie, the baby unicorn, on her purple starting cloud on the upper right hand corner of the board.

Shuffle the 8 round and 8 square friend tiles face down. Distribute the round tiles face down on the yellow eight flowerpot/cactus clouds. Each player takes one of the square tiles and places it face up in front of them. If only two players, each player takes two of the square tiles. Place the remaining square friend tiles face up on the table, near the crystal cloud on the upper left corner. Have the cloud crystals and the die ready to play.

How to play

Take turns and play in a clockwise direction. The cooperative goal of the game is to find all eight friends and collect all 10 cloud crystals. The player who last dreamed about a unicorn may begin and roll the die first. If you cannot agree then the youngest player begins.

What does the die show?

• One, two, or three clouds

Move your unicorn forward or backward on the game board based on the number of clouds rolled. Several unicorns may occupy the same cloud. In order to land on a yellow flowerpot cloud or a pink lucky cloud, you may voluntarily forfeit die points rolled.

- **The glitter cloud**

Fly to any one of the yellow or pink clouds. When all the cloud crystals and all the friends are gathered on the party cloud, you may fly directly to the big pink cupcake party cloud.

- **The baby unicorn Rosalie**

Rosalie hops one cloud ahead.

Where has your unicorn landed?

Pink lucky cloud

Spin the lucky wheel and see what it is showing you: 1, 2 or 3 cloud crystals. Place the corresponding number of crystals on the pictures in the crystal cloud in the upper left corner of the game board.

Clouds with rainbows

You may use the rainbow slide as a shortcut (forwards or backwards) during your turn, even if your turn does not end there.

Yellow flowerpot cloud

Turn over the round friend tile! If a friend tile is no longer there, he or she is already celebrating on the party cloud and you do nothing.

→ Is the turned over round friend also pictured on your square friend tile? Great – place the round friends tile face up in one of the eight pink clouds around the cupcake party cloud then place your square tile face down next to the other square friend tiles near the top of the board.

→ Does the turned over friend match one of the face-up square friend tiles near the top of the game board? Great – place the friend tile in one of the eight pink clouds around the party cloud and turn over the corresponding square tile and use the matching tiles in order to place the round friend tiles near the other tiles at the top of the board.

→ Does the round friend tile match one of the other players square friend tile? Too bad – you must turn the tile back over again and put it back on the same yellow flowerpot cloud. Your fellow player who has the matching square friend tile is the only one who may place it onto one of the pink clouds by the cupcake party cloud.

Then the next child takes their turn.

End of the game

The game ends ...

- When all players have cooperatively collected all 8 friends into the party cloud and placed all 10 cloud crystals on the crystal cloud. The unicorns now joyfully gallop to the pink cupcake party cloud. When a glitter cloud is rolled, you may fly directly to the party cloud. The surprise party for baby Rosalie has succeeded and you have all won together. The party can now begin!

Or

- Baby Rosalie reaches the party cloud before everything for the surprise party has been prepared. Regrettably not everything is ready for the party and therefore you have all unfortunately lost. But don't dismay, try again right away!

Dear Children and Parents,

After a fun round, you suddenly discover that a part of this HABA game is missing and nowhere to be found. No problem! At www.haba.de/Ersatzteile you can find out whether this part is still available for delivery.
