

Job Vacancy DevOps Engineer

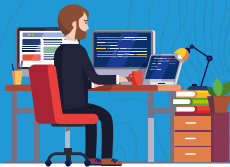

We are looking for a DevOps Engineer to help us build functional systems that improve customer experience. DevOps Engineer responsibilities include deploying product updates, identifying production issues and implementing integrations that meet customer needs. If you have a solid background in software engineering and are familiar with Python and/or NodeJS, we'd like to meet you. Ultimately, you will execute and automate operational processes fast, accurately and securely.

Job Description:

- Deploy updates and fixes.
- Investigate and resolve technical issues.
- Perform root cause analysis for production errors.
- Design procedures for system troubleshooting and maintenance
- Build tools to reduce occurrences of error and improve customer experience.

Requirements:

- Team spirit and problem-solving attitude.
- Good knowledge of Python and/or NodeJS.
- Working knowledge of databases and SQL.
- BSc in Computer Science, Engineering, or other relevant field.
- Work experience as a DevOps Engineer or other similar software engineering role.
- Knowledge of AWS cloud platform is a must, particularly in Elastic Beanstalk and RDS.
- Proficient in scripting and developing Continuous Integration/Continuous Delivery pipelines is a plus.

BRAGA (PT. Braga Teknologi Nusantara) is a company which provides location-based services to scale-up your business by integrating business process, data location into versatile, inclusive, and high performance platform.
