

BATTERY MANUFACTURER SELECTS OUR MANAGED SECURITY FOR INTEGRATED CYBER DEFENSE

THE CHALLENGE

- Their security infrastructure, including firewall, email security system etc weren't working in collaboration with each other.
- Not able to understand security log behaviour and act on relevant alerts.

AIRTEL'S SOLUTION

Airtel provided a managed security service. This ensured the co-relation of internal device logs and security threats happening globally with the help of threat intelligence for proactive alerts, and avoiding any cyber attacks.

BUSINESS IMPACT

- Helped in proactive action: The service constantly scanned security threats in the external world and sent preventive action alerts.
- Integrated Security and Smart Threat Management: Logs from different security devices are studied. Threat patterns are shared across the network.
