In a statement, Mr. Gopal Vittal, MD and CEO, India & South Asia, said:
“’The sustained predatory pricing by the new operator has led to a decline in revenue growth for the second quarter in a row. The telecom industry as a whole also witnessed a revenue decline for the first time ever on a full year basis. The deteriorating health of the industry was compounded by the tsunami of incoming voice traffic from the new operator as a result of which significant investments had to be made just to carry the incoming traffic on our network. The net result of this was a revenue decline of 7.1% in Q4 even as EBITDA margins eroded by 2.9%. FY 16-17 saw a muted top line growth of 3.6% vs the double digit growth witnessed in preceding years.

Our long term commitment to provide the best experience to our customers continues to drive all our actions in every single aspect of the business. This belief coupled with brilliant execution of our people has led to acceleration in market share in an industry that is now rapidly consolidating’”.

In a statement, Mr. Raghunath Mandava, MD and CEO, Africa, said:
“Airtel Africa underlying revenues grew by 4.4% in constant currency terms during FY 16-17 with net revenues up a healthy 5.0% as we shed unprofitable lines. Revenue market shares in our key geographies continue to accelerate. Our efforts to deliver a profitable business model for Africa has resulted in EBITDA growth of 36.0% with margin expanding by +500 basis points on an underlying basis in FY 16-17. For the first time ever, African operation has delivered positive PBT in the financial year (constant currency).

Data consumption and revenues have grown by 95.5% & 23.5% respectively in FY 16-17. We remain focussed on accelerating growth through improved customer experience and superior network quality”.
