MANAGEMENT DISCUSSION AND ANALYSIS

5.1 Reporting Changes

5.1.1 Adoption of Indian Accounting Standards (IndAS) 116 'Leases' w.e.f. April 01st, 2019

The Ministry of Corporate Affairs (MCA) issued the Companies (Indian Accounting Standards) Amendment Rules, 2019 on March 30th, 2019 notifying the leasing standard IndAS 116 'Leases', which replaces the existing standard (IndAS 17). **IndAS 116 is applicable to Companies from financial year beginning on or after April 1st, 2019.** The Company's financial results presented in this report for the first quarter ended June 30th, 2019 are in accordance with the

new leasing standard IndAS 116. This standard is adopted in full from IFRS 16 without any carve out and will make the financials of Indian companies comparable with global peers. Under the earlier standard IndAS 17, operating leases were treated as revenue expenses whereas the finance leases were capitalized and amortized over the period of the lease with corresponding liabilities recorded as finance lease obligation.

1.1 Overview:

- IndAS 116 removes distinction between Finance and Operating lease.
- All leases to be recognized in the Balance sheet as Right of Use (RoU) Asset and Lease Liability.
- Operating lease payments currently expensed to be split as Depreciation on ROU asset and Interest on lease liability.
- Exemptions available for immaterial and short term leases (less than 12 months) have been availed.

With the above changes, the financial statements and the related ratios for the current quarter ended June 30th, 2019 are not comparable with the previous periods. For better understanding and benefit of the reader, Segment wise impact of adoption of IndAS 116 is detailed below.

5.1.2 Digital TV Services

Subsequent to the new tariff order (NTO), the service providers are responsible only for re-transmission and are not in a position to control content and pricing. Accordingly, the Gross revenue is only to the extent of net value retained i.e. customer payments received net of broadcaster's fee (erstwhile content charges) w.e.f quarter ended June 30th, 2019.

5.1.3 Mobile Services India

M2M (Machine-to-Machine) Customer Base and Revenue, which was hitherto reported as a part of Mobile Services, has been reclassified to Airtel Business w.e.f quarter ended June 30th, 2019. The impact of the same on Mobile Services ARPU is Rs 2.

5.2 India & SA

1. Key Industry Developments

A. Telecom Regulatory Authority of India (TRAI) released clarifications / reconsideration of its **'Recommendations on Auction of Spectrum in various bands'** to Department of Telecommunications (DOT) on July 8th, 2019. Key features of the same were:

- TRAI recommended Reserve Price (per MHz) of 800 MHz & 900 MHz paired band in circles where spectrum is becoming available.
- The minimum amount of spectrum that an existing licensee is required to bid in 900 MHz and 1800 MHz bands be revised downwards from 0.6 MHz to 0.2 MHz.
- The entire administratively allocated spectrum in 800 MHz, 900 MHz and 1800 MHz bands (except for BSNL & MTNL) whose validity is going to expire by December 31st, 2021 may be auctioned in the forthcoming auction.
- No roll out obligations should be mandated for spectrum in 3300-3600 MHz band. Further, lock-in period for spectrum in this band for becoming eligible for spectrum trading should be same as in other bands i.e. 2 years instead of the earlier recommended 5 year period.
- TRAI recommended that in case a telecom service provider (TSP) acquires spectrum in 3300-3600 MHz band in more than one licensed service area (LSA), same frequency spots should be assigned to it in all those LSAs, subject to feasibility.

B. **TRAI released a consultation paper on KYC of DTH Set Top Boxes on July 19th, 2019.** Key proposals include:

- Filling of KYC form and verification of Aadhar Card may be mandatory for any customer purchasing DTH equipment. In order to check location, in accordance with customer ID /Card ID, location-based services would have to be active in DTH Set-Top-Boxes.
- GPS enabled Set-Top-Box (STB) with geo-fencing to Indian coordinates only may be used to restrict the illegal DTH run in other countries.

2. Key Company Developments

A. **Digital Innovations & Customer Delight:** Airtel continues to deliver personalized experience and innovative products with best in class service experience to its customers. A plethora of benefits were extended under the #AirtelThanks program:

- #AirtelThanks program was extended to **Home Broadband customers** for plans of Rs 1099 and

above. The benefits include three months subscription gift from Netflix, one-year Amazon Prime membership with full entertainment and online shopping benefits, access to premium content from ZEE5 and Airtel TV.

- Airtel offered **free access to online courses** from the globally renowned online educator - Shaw Academy. Shaw Academy offers courses focused on developing practical skills and popular subjects include music, language, fitness etc. **Airtel Platinum customers** will get free access to one-year courses worth Rs 6,000 as part of their plan benefits.
- B. **Strategic Alliances & Partnerships:** Airtel has entered into multiple partnerships with an aim to provide seamless customer experience with greater value proposition to end users.
- **Airtel and OYO Hotels & Homes** collaborated to launch OYO Store on Airtel Thanks App. Airtel customers can seamlessly book accommodations on the Airtel Thanks app and make the booking payments via Airtel Payments Bank.
 - **Airtel joined hands with HDFC Life Insurance** to launch a prepaid bundle at Rs. 249. The bundle comes with an in-built **life insurance cover (term plan) of Rs. 4 lakhs** from HDFC Life along with unlimited voice calling and 2GB data/day.
- C. **Network Expansion & Transformation:** Airtel remains committed to deliver a world-class network experience to the high value customer.
- As part of its strategy to offer high speed 4G across the country, the company has **phased out its 3G services** in Kolkata and further augmented its 4G services, Airtel has **deployed state-of-the-art L900 technology** in the 900 MHz band to complement its 4G services in the 2300 MHz and 1800 MHz bands.
 - Airtel deployed the superior **LTE 2100 MHz spectrum band across Delhi-NCR, Haryana, Himachal Pradesh, Jammu & Kashmir.** This will further augment Airtel 4G quality and experience, boost network capacity, significantly improve outdoor coverage and drive more voice traffic on VoLTE to serve its customers in all these regions.
 - Airtel has **launched 4G services in Lakshadweep Islands.** With this, Airtel has become the first mobile operator to launch high-speed data services on the tropical archipelago.

D. Mergers & Acquisitions

- Airtel and Hughes Communications India Ltd. (HCIL)**, a subsidiary of Hughes Network Systems, LLC (HUGHES) entered into an agreement to combine their VSAT (Very Small Aperture Terminal) operations in India. The combined entity will benefit from enhanced scale, improved operational efficiencies and wider market reach. The combined entity will be well positioned to leverage the demand for secure connectivity in a rapidly growing digital economy. The transaction is subject to approvals by relevant authorities.
- Merger of Consumer Mobile Business of Tata Teleservices (Maharashtra) Limited and Tata Teleservices Limited with Bharti Airtel Limited and Bharti Hexacom Limited** - Following the Hon'ble TDSAT's order directing the DoT to take the merger on record and approval of the schemes of arrangement by Hon'ble NCLT, Delhi and Hon'ble NCLT, Mumbai, the schemes of arrangement have become effective from July 1st, 2019. Consequently, all customers, assets, spectrum and agreed liabilities of the Consumer Mobile Businesses of TTSL and TTML stand merged with Airtel effective July 1st, 2019.

E. Awards and Recognition

- Airtel bagged top honors at the Frost and Sullivan ICT Awards.** Airtel Business has been awarded as the “Enterprise Data Service Provider of the Year” and the “Enterprise Telecom Service Provider of the Year” in the large enterprise segment.
- Airtel Finance shared services team has bagged the coveted **Digital Initiative Award** by HDFC bank in the Large Customer Category.

5.3 Africa

A. Key Company Developments

- Airtel Africa Plc on June 28th, 2019 opened the markets of London Stock Exchange to mark the occasion of the pricing of its initial public offering. The group raised gross proceeds of USD 750 Mn from a mix of new institutional and existing Airtel Africa investors.
- Airtel Africa Plc on July 9th, 2019 announced the secondary listing on the main board of The Nigerian Stock Exchange (“NSE” or “the Exchange”).
- In Nigeria the Central Bank has approved the name “Smart Cash” to be used for the Airtel payment service bank.
- Airtel Nigeria won the Business Day “Next Bulls” Award for contribution to economy and job creation. Nigeria’s

leading Business and Economic Newspaper, “Business Day” in collaboration with the Nigerian Stock Exchange has honored Airtel Nigeria for its contributions to the economy and for creating employment opportunities across the country.

- A new bill has been debated in Kenyan parliament, which requires Telcos to form a separate group for any business they engage outside core telecom services. Airtel Kenya has already initiated separation of money business from core telecom business.
- In Zambia, Finance Ministry has proposed to replace the current VAT system of 16% with a Sales Tax of 9% for domestic supplies. The date of implementation earlier proposed was July 1st, 2019 which has been delayed to Sep 1st, 2019, to allow for parliamentary participation in the enactment of the legislation. Consultation with ZRA about specifics is ongoing.
- Airtel Niger is now the first operator to launch 4G network in the country. The 4G Launch is expected to be a growth driver for Niger economy, and will accelerate equitable and inclusive economic growth. The launch of Airtel's 4G is seen as an important step in the country's digitization process to provide broadband service everywhere in the country.
- As per new regulation initiated by Central Bank (in Congo B, Chad and Gabon), Mobile Money entities can apply for e-money licenses directly without any need of partnering with banks. Pre-condition for application of licenses is minimum share capital of CFA 2 Bn. Final regulation is expected to come into force in Q2'20.

Results for the quarter ended Jun 30, 2019

5.5.1 Bharti Airtel Consolidated

As on Jun 30, 2019, the Company had 403.7 Mn customers, a decrease of 10.9% as compared to 456.6 Mn in the corresponding quarter last year. Total minutes of usage on the network during the quarter were 803 Bn, representing a growth of 7.6% as compared to 747 Bn in the corresponding quarter last year. Mobile Data traffic grew 94.2% to 4,344 Bn MBs during the quarter as compared to 2,236 Bn MBs in the corresponding quarter last year.

Consolidated revenues for the quarter stood at Rs 207,379 Mn, up 4.7% (up 6.8% on a comparable basis) compared to Rs 197,992 Mn in the corresponding quarter last year.

India revenues for the quarter stood at Rs 153,446 Mn, up 2.8% (up 5.5% on a comparable basis) compared to Rs 149,300 Mn in the corresponding quarter last year. There has been healthy and equitable growth across all segments.

Consolidated net revenues, after netting off access costs, cost of goods sold and license fee, increased by 3.0% to Rs 161,438 Mn as compared to Rs 156,800 Mn in the corresponding quarter last year.

There is a decrease in consolidated opex (excluding access costs, costs of goods sold and license fees) by 13.6% Y-o-Y to Rs 77,258 Mn for the quarter ending Jun 30, 2019. On a comparable basis, consolidated opex for the quarter increased by 3.0% to Rs 92,116 Mn primarily on the back of increased investments in strengthening our network.

Consolidated EBITDA of Rs 84,926 Mn during the quarter, increased by 24.2% compared to Rs 68,370 Mn in the corresponding quarter last year. EBITDA margin for the quarter was at 41% as compared to 34.5% in the corresponding quarter last year. On a comparable basis, EBITDA for the quarter was Rs 69,395 Mn (up 1.5% Y-o-Y) and EBITDA margin was 32.8% (down 1.7% Y-o-Y). India EBITDA margin for the quarter was at 39.5% (30.3% on comparable basis) as compared to 32.9% in the corresponding quarter last year.

Depreciation and amortization expenses were at Rs 67,587 Mn vis-à-vis Rs 51,452 Mn in the corresponding quarter last year (up 31.4% Y-o-Y). On a comparable basis, depreciation and

amortization expenses were Rs 58,299 Mn (up 13.3% Y-o-Y) primarily due to the impact of sustained capex spends aimed at enhancing our 4G capacities. EBIT for the quarter was at Rs 16,046 Mn as compared to Rs 16,801 Mn in the corresponding quarter last year and the resultant EBIT margin was 7.7% as compared to 8.5% in the corresponding quarter last year. On a comparable basis, EBIT was Rs 9,802 Mn (down 41.7% Y-o-Y) and the resultant EBIT margin was 4.6% (down 3.9% Y-o-Y). Net finance costs for the quarter were at Rs 31,815 Mn, higher by Rs 10,550 Mn (up 49.6% Y-o-Y) as compared to the corresponding quarter last year. On a comparable basis, net finance cost was at Rs 26,841 Mn up 26.2% Y-o-Y. Increase has been largely on account of higher interest on borrowings and derivative and forex loss.

The resultant loss before tax and exceptional items for the quarter ended Jun 30, 2019 was Rs 15,298 Mn as compared to loss of Rs 2,850 Mn in the corresponding quarter last year. On a comparable basis, resultant loss before tax and exceptional items was Rs 16,159 Mn.

The consolidated income tax expense for quarter ended Jun 30, 2019 was (negative) Rs 5,830 Mn as compared to (negative) Rs 2,490 Mn in the corresponding period of last year. The decline is primarily led by drop in profits in India. The underlying effective tax rate (ETR) in India for quarter ended Jun 30, 2019 was at 34.8% vs 34.75% for the full year ended March 31, 2019. The tax charge in Africa for the quarter ended Jun 30, 2019 was at \$ 48 Mn as compared to \$ 46 Mn in the corresponding period of last year, increase is primarily on account of change in profit mix of the countries.

Net loss before exceptional items for the quarter ended Jun 30, 2019 was Rs 14,002 Mn as compared to loss of Rs 3,004 Mn in the corresponding quarter last year. After accounting for hit of Rs 14,454 Mn towards exceptional items (net of tax) (details provided below in 5.5.2), the resultant net loss for the quarter ended Jun 30, 2019 came in at Rs 28,660 Mn, compared to profit of Rs 973 Mn in the corresponding quarter last year and Rs 1,072 Mn in the previous quarter.

The capital expenditure for the quarter was Rs 50,468 Mn as compared to Rs 82,167 Mn in the corresponding quarter last year. The consolidated operating free cash flow during the

5.6 Bharti's Three Line Graph

The Company tracks its performance on a three-line graph.

The parameters considered for the three-line graph are:

1. Total Revenues i.e. absolute turnover/sales
2. Opex Productivity – this is computed by dividing operating expenses by the total revenues for the respective period. Operating expenses is the sum of (i) employee costs (ii) network operations costs and (iii) selling, general and administrative costs. This ratio depicts the operational efficiencies in the Company
3. Capex Productivity – this is computed by dividing revenue for the quarter (annualized) by gross cumulative capex (gross fixed assets and capital work in progress) till date i.e. the physical investments made in the assets creation of the Company. This ratio depicts the asset productivity of the Company.

Given below are the graphs for the last five quarters of the Company:

SECTION 10

KEY ACCOUNTING POLICIES AS PER Ind-AS

- **Property, plant and equipment**

Property, plant and equipment are stated at cost, net of accumulated depreciation and impairment loss. All direct costs relating to the acquisition and installation of property and equipment are capitalised.

Depreciation is recorded on a straight-line basis over the estimated useful lives of the assets.

Assets	Years
Building	20
Building on leased land	20
Network equipment	3-25
Customer premises equipment	5 – 6
Assets taken on finance lease	Period of lease or 10 years, as applicable, whichever is less
Computer equipment	3
Furniture & Fixture and office equipment	2 – 5
Vehicles	3 – 5
Leasehold improvements	Period of the lease or 10/20 years, as applicable, whichever is less
Leasehold Land	Period of the lease

Land is not depreciated. The useful lives, residual values and depreciation method of PPE are reviewed, and adjusted appropriately, at-least as at each reporting date so as to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets.

Costs of additions and substantial improvements to property and equipment are capitalised. The costs of maintenance and repairs of property and equipment are charged to operating expenses.

- **Goodwill**

Goodwill arising on the acquisition of an entity represents the excess of the cost of acquisition over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the entity recognized at the date of acquisition.

Goodwill is not subject to amortization but is tested for impairment annually and when circumstances indicate, the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit is less than their carrying amount an impairment loss is recognized. Impairment losses relating to goodwill are not reversed in future periods.

On disposal of a subsidiary, the attributable amount of goodwill is included in the determination of the profit or loss recognized in the statement of profit and loss on disposal.

- **Other Intangible assets**

Identifiable intangible assets are recognised when the Group controls the asset, it is probable that future economic benefits attributed to the asset will flow to the Group and the cost of the asset can be measured reliably.

The intangible assets that are acquired in a business combination are recognised at its fair value there at. Other intangible assets are recognised at cost. These assets having finite useful life are carried at cost less accumulated Amortisation and any impairment losses. Amortisation is computed using the straight-line method over the expected useful life of intangible assets.

The Group has established the estimated useful lives of different categories of intangible assets as follows:

a. Licenses (including spectrum)

Acquired licenses and spectrum are amortised commencing from the date when the related network is available for intended use in the relevant jurisdiction. The useful lives range from two years to twenty five years.

The revenue-share based fee on licenses / spectrum is charged to the statement of profit and loss in the period such cost is incurred.

b. Software: Software are amortised over the period of license, generally not exceeding three years.

c. Bandwidth: Bandwidth is amortised on straight-line basis over the period of the agreement.

d. Other acquired intangible assets: Other acquired intangible assets include the following:

Rights acquired for unlimited license access: Over the period of the agreement which ranges upto five years.

Distribution network: One year to two years

Customer base: Over the estimated life of such relationships which ranges from one year to five years.

Non-compete fee: Over the period of the agreement which ranges upto five years.

The useful lives and amortisation method are reviewed, and adjusted appropriately, at least at each financial year end so as to ensure that the method and period of amortisation are consistent with the expected pattern of economic benefits from these assets. The effect of any change in the estimated useful lives and / or amortisation method is accounted prospectively, and accordingly the amortisation is calculated over the remaining revised useful life.

Further, the cost of intangible assets under development includes the borrowing costs that are directly attributable to the acquisition or construction of qualifying assets and are presented separately in the balance sheet.

- **Investment in Joint Ventures and Associates**

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

Joint ventures and associates are accounted for from the date on which Group obtains joint control over the joint venture / starts exercising significant influence over the associate.

Accounting policies of the respective joint venture and associate are aligned wherever necessary, so as to ensure consistency with the accounting policies that are adopted by the Group under Ind-AS. The Group's investments in its joint ventures and associates are accounted for using the equity method. Accordingly, the investments are carried at cost as adjusted for post-acquisition changes in the Group's share of the net assets of investees. Losses of a joint venture or an associate in excess of the Group's interest in that joint venture or associate are not recognized. However, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the joint venture or associate.

At each reporting date, the Group determines whether there is objective evidence that the investment is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of investment and its carrying value.

- **Leases**

Effective April 1, 2019, the Group adopted Ind AS 116 'Leases' using the modified retrospective method, under which the cumulative effect of initial application is recognised in retained earnings at April 1, 2019. Accordingly, the comparative information has not been restated. The Group recorded the lease liability at the present value of the lease payments, discounted at the incremental borrowing rate and the right-of-use asset at its carrying amount as if the standard had been applied since the commencement date of the lease, but discounted at the Group's incremental borrowing rate at the date of initial application.

The Group, at the inception of a contract, assesses the contract as, or containing, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether the contract involves the use of an identified asset, the Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and the Group has the right to direct the use of the asset.

Group as a lessee

On initial application of Ind AS 116, the Group recognised a lease liability measured at the present value of all the remaining lease payments, discounted using the lessee's incremental borrowing rate at April 1, 2019 whereas the Group has elected to measure right-of-use asset at its carrying amount as if Ind AS 116 had been applied since the lease commencement date, but discounted using the lessee's incremental borrowing rate at April 1, 2019. The Group has elected not to recognise a lease liability and a right-of-use asset for leases for which the lease term ends within twelve months of April 1, 2019 and has accounted for these leases as short-term leases. The lease payment associated with these lease are recognized as an expenses on a straight line basis over the lease term.

For new lease contracts, the Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease agreements in which it is the lessee in the statement of financial position. The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease, if this rate cannot be readily determined, the Group uses its incremental borrowing rate. Lease liabilities include the net present value of fixed payments (including any in-substance fixed payments), any variable lease payments that are based on consumer price index ('CPI'), the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Subsequently, the lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments including due to changes in CPI or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or when the lease contract is modified and the lease modification is not accounted for as a separate lease. The corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the related right-of-use asset has been reduced to zero.

Right-of-use assets are measured at cost comprising the amount of the initial measurement of lease liability, any lease payments made at or before the commencement date less any lease incentives received, any initial direct costs, and restoration costs.

Subsequent to initial recognition, right-of-use asset are stated at cost less accumulated depreciation and any impairment losses and adjusted for certain remeasurements of the lease liability. Depreciation is computed using the straight-line method from the commencement date to the end of the useful life of the underlying asset or the end of the lease term, whichever is shorter. The estimated useful lives of right-of-use assets are determined on the same basis as those of the underlying property and equipment.

In the statement of financial position, the right-of-use assets and lease liabilities are presented separately.

When a contract includes lease and non-lease components, the Group allocates the consideration in the contract on the basis of the relative stand-alone prices of each lease component and the aggregate stand-alone price of the non-lease components.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for short term leases that have a lease term of 12 months or less and leases of low value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Group as a lessor

Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Amounts due from lessees under a finance lease are recognised as receivables at an amount equal to the net investment in the leased assets. Finance lease income is allocated to the periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the finance lease.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight line basis over the lease term.

When a contract includes lease and non-lease components, the Group applies Ind AS 115 to allocate the consideration under the contract to each component.

The Group enters into 'Indefeasible right to use' ('IRU') arrangements wherein the right to use the assets is given over the substantial part of the asset life. However, as the title to the assets and the significant risks associated with the operation and maintenance of these assets remains with the Group, such arrangements are recognised as operating lease. The contracted price is recognised as revenue during the tenure of the agreement. Unearned IRU revenue received in advance is presented as deferred revenue within liabilities in the statement of financial position.

- **Derivative financial instruments**

Derivative financial instruments, including separated embedded derivatives, that are not designated as hedging instruments in a hedging relationship are classified as financial instruments at fair value through profit or loss - Held for trading. Such derivative financial instruments are initially recognised at fair value. They are subsequently re-measured at their fair value, with changes in fair value being recognised in the statement of profit and loss within finance income / finance costs.

- **Hedging activities**

i. Fair value hedge

Some of the group entities use certain type of derivative financial instruments (viz. interest rate / currency swaps) to manage / mitigate their exposure to the risk of change in fair value of the borrowings. The Group designates certain interest rate swaps to hedge the risk of changes in fair value of recognised borrowings attributable to the hedged interest rate risk. The effective portion of changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the statement of profit and loss within finance income / finance costs, together with any changes in the fair value of the hedged liability that are attributable to the hedged risk. If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of the hedged item is amortised to profit or loss over the period to remaining maturity of the hedged item.

ii. Cash flow hedge

The Group designates certain derivative financial instruments (or its components) as hedging instruments for hedging the exchange rate fluctuation risk attributable to is either to a recognised item or a highly probable forecast transaction. The effective portion of changes in the fair value of derivative financial instruments (or its components), that are designated and qualify as Cash flow hedges, are recognised in the other comprehensive income and held in Cash flow hedge reserve. Any gains / (losses) relating to the ineffective portion, are recognised immediately in the statement of profit and loss. The amounts accumulated in Equity are re-classified to the statement of profit and loss in the periods when the hedged item affects profit / (loss).

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gains / (losses) existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the statement of profit and loss. However, at any point of time, when a forecast transaction is no longer expected to occur, the cumulative gains / (losses) that were reported in equity is immediately transferred to the statement of profit and loss.

iii. Net investment hedge

The Group hedges its certain net investment in foreign subsidiaries which are accounted for similar to cash flow hedges. Accordingly, any foreign exchange differences on the hedging instrument (viz. borrowings) relating to the effective portion of the hedge is recognized in other comprehensive income and held in foreign currency translation reserve, so as to offset the change in the value of the net investment being hedged. The ineffective portion of the gain or loss on these hedges is immediately recognised in the statement of profit and loss. The amounts accumulated in equity are included in the statement of profit and loss when the foreign operation is disposed or partially disposed.

- **Revenue recognition**

Revenue is recognised upon transfer of control of promised products or services to customer at the consideration which the Group has received or expects to receive in exchange of those products or services, net of any taxes / duties, discounts and process waivers. In order to determine if it is acting as a principal or as an agent, the Group assesses whether it is primarily responsible for fulfilling the performance obligation and whether it controls the promised service before transfer to customers.

(i) Service revenues

Service revenues mainly pertain to usage, subscription and activation charges for voice, data, messaging and value added services. It also includes revenue from interconnection / roaming charges for usage of the Group's network by other operators for voice, data, messaging and signalling services.

Usage charges are recognised based on actual usage. Subscription charges are recognised over the estimated customer relationship period or subscription pack validity period, whichever is lower. Customer onboarding revenue and associated cost is recognised upon successful onboarding of customer i.e. upfront. Revenues in excess of invoicing are classified as unbilled revenue while invoicing / collection in excess of revenue are classified as deferred revenue / advance from customer.

The billing / collection in excess of revenue recognised is presented as deferred revenue in the Balance Sheet whereas unbilled revenue is recognised under other current financial assets.

Certain business services revenue include revenue from registration and installation, which are amortised over the period of agreement since the date of activation of service.

Revenues from long distance operations comprise of voice services and bandwidth services (including installation), which are recognised on provision of services and over the period of respective arrangements.

(ii) Multiple element arrangements

The Group has entered into certain multiple-element revenue arrangements which involve the delivery or performance of multiple products, services or rights to use assets. At the inception of the arrangement, all the deliverables therein are evaluated to determine whether they represent distinct performance obligations.

Total consideration related to the multiple element arrangements is allocated to each performance obligation based on their standalone selling prices.

(iii) Equipment sales

Equipment sales mainly pertain to sale of telecommunication equipment and related accessories, for which revenue is recognised when the control of such equipment is transferred to the customer. However, in case of equipment sale forming part of multiple-element revenue arrangements which is not distinct performance obligation, revenue is recognised over the customer relationship period.

- **Interest income**

The interest income is recognised using the EIR method.

- **Dividend income**

Dividend income is recognised when the Company's right to receive the payment is established.

- **Exceptional items**

Exceptional items refer to items of income or expense within the statement of profit and loss from ordinary activities which are non-recurring and are of such size, nature or incidence that their

separate disclosure is considered necessary to explain the performance of the Group.

- **Foreign currency transactions**

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the closing exchange rate prevailing as at the reporting date with the resulting foreign exchange differences, on subsequent re-statement / settlement, recognised in the statement of profit and loss. Non-monetary assets and liabilities denominated in foreign currencies are translated into the functional currency using the exchange rate prevalent, at the date of initial recognition (in case they are measured at historical cost) or at the date when the fair value is determined (in case they are measured at fair value).

The assets and liabilities of foreign operations (including the goodwill and fair value adjustments arising on the acquisition of foreign entities) are translated into Rupees (functional currency of parent) at the exchange rates prevailing at the reporting date whereas their statements of profit and loss are translated into Rupees at monthly average exchange rates and the equity is recorded at the historical rate. The resulting exchange differences arising on the translation are recognised in other comprehensive income and held in FCTR. On disposal of a foreign operation (that is, disposal involving loss of control), the component of other comprehensive income relating to that particular foreign operation is reclassified to profit or loss.

- **Income-taxes**

Income tax is calculated on the basis of the tax rates, laws and regulations, which have been enacted or substantively enacted as at the reporting date in the respective countries where the Group entities operate and generate taxable income.

Deferred tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying values in the financial statements. However, deferred tax are not recognised if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Further, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Moreover, deferred tax is recognised on temporary differences arising on investments in subsidiaries, joint ventures and associates - unless the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The unrecognised deferred tax assets / carrying amount of deferred tax assets are reviewed at each reporting date for recoverability and adjusted appropriately.

- **Transactions with non-controlling interests**

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The differences between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity.

SECTION 11

GLOSSARY

Technical and Industry Terms

Company Related	
Asset Turnover	Asset Turnover is defined as total revenues, for the preceding (last) 12 months from the end of the relevant period, divided by average assets. Asset is defined as the sum of non-current assets and net current assets. Net current assets are computed by subtracting current liabilities from current assets. Average assets are calculated by considering average of quarterly average for the preceding (last) four quarters from the end of the relevant period. For the current quarter average assets is calculated by considering average of Opening and closing assets for the relevant period.
Average Customers	Average customers are derived by computing the average of the monthly average customers for the relevant period.
Average Co-locations	Average co-locations are derived by computing the average of the Opening and Closing co-locations for the relevant period.
Average Sharing Factor	It is calculated as the average of the opening and closing number of co-locations divided by the average of the opening and closing number of towers for the relevant period.
Average Towers	Average towers are derived by computing the average of the Opening and Closing towers for the relevant period.
Book Value Per Equity Share	Total stockholder's equity as at the end of the relevant period divided by outstanding equity shares as at the end of the relevant period.
Capex	It includes investment in gross fixed assets and capital work in progress for the period.
Capital Employed	Capital Employed is defined as sum of equity attributable to equity holders of parent and net debt.
Cumulative Investments	Cumulative Investments comprises of gross value of property, plant & equipment (including CWIP & capital advances) and intangibles including investment in associates.
Cash Profit From Operations before Derivative & Exchange Fluctuation	It is not an Ind-AS measure and is defined as profit from operating activities before depreciation, amortization and exceptional items adjusted for interest expense, interest income and non-operating expenses before adjusting for derivative & exchange (gain)/ loss.
Churn	Churn is calculated by dividing the total number of disconnections during the relevant period by the average customers; and dividing the result by the number of months in the relevant period.
Co-locations	Co-location is the total number of sharing operators at a tower, and where there is a single operator at a tower, 'co-location' refers to that single operator. Co-locations as referred to are revenue generating Co-locations.
Customer Base	Customers generating revenue through recharge, billing or any outgoing activity.
Customers Per Employee	Number of customers on networks of a business unit as at end of the relevant period divided by number of employees in the respective business unit as at end of the relevant period.
Data Customer Base	A customer who used at least 1 MB on GPRS / 3G / 4G network in the last 30 days.
Data Usage per Customer	It is calculated by dividing the total MBs consumed on the network during the relevant period by the average data customer base; and dividing the result by the number of months in the relevant period.
DTH / Digital TV Services	Direct to Home broadcast service
Earnings Per Basic Share	It is computed by dividing net income attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the period.

	<p>The calculation of Net Profit/ (loss) per diluted share adjusts net profit or loss and the weighted average number of ordinary shares outstanding, to give effect to all dilutive potential ordinary shares that were outstanding during the year.</p> <p>Net profit or loss attributable to ordinary shareholders is adjusted for the after-tax effect of the following: (1) dividends on potential ordinary shares (for example, dilutive convertible preferred shares); (2) interest recognized on potential ordinary shares (for example, dilutive convertible debt); and (3) any other changes in income or expense resulting from the conversion of dilutive potential ordinary shares (e.g., an entity's contribution to its non-discretionary employee profit-sharing plan may be revised based on changes in net profit due to the effects of items discussed above).</p>
Earnings Per Diluted Share	
EBITDA	Earnings/ (loss) before interest, taxation, depreciation and amortization. It is not an Ind-AS measure and is defined as profit from operating activities before depreciation, amortization and exceptional items adjusted for CSR costs.
EBITDA Margin	It is computed by dividing EBITDA for the relevant period by total revenues for the relevant period.
EBIT	EBITDA adjusted for depreciation and amortization.
Enterprise Valuation (EV)	Calculated as sum of Market Capitalization, Net Debt and finance lease obligations as at the end of the relevant period.
EV / EBITDA (times)	Computed by dividing Enterprise Valuation as at the end of the relevant period (EV) by EBITDA for the relevant period (LTM). For current quarter, Computed by dividing Enterprise Valuation as at the end of the relevant period (EV) by annualized EBITDA for the relevant period.
Finance Lease Obligation (FLO)	Finance Lease Obligation represents present value of future obligation for assets taken on finance lease.
Gross Revenue per Employee per month	It is computed by dividing the Gross Revenue (net of inter-segment eliminations) by the closing number of employees in a given business unit and number of months in the relevant period.
Interest Coverage Ratio	EBITDA for the relevant period divided by interest on borrowing for the relevant period.
Market Capitalization	Number of issued and outstanding shares as at end of the period multiplied by closing market price (BSE) as at end of the period.
Mobile Broadband Base stations	It includes all the 3G and 4G Base stations deployed across all technologies i.e. 900/1800/2100/2300 Mhz bands.
4G Data Customer	A customer who used at least 1 MB on 4G network in the last 30 days.
Mobile Broadband Towers	It means the total number of network towers (defined below) in which unique number of either 3G or 4G Base stations are deployed, irrespective of their technologies. Total numbers of Mobile Broadband Towers are subset of Total Network Towers.
Minutes on the network	Duration in minutes for which a customer uses the network. It is typically expressed over a period of one month. It includes incoming, outgoing and in-roaming minutes.
Network Towers	Comprises of Base Transmission System (BTS) which holds the radio transceivers (TRXs) that define a cell and coordinates the radio links protocols with the mobile device. It includes all the Ground based, Roof top and In Building Solutions as at the end of the period.
Net Debt	It is not an Ind-AS measure and is defined as the long-term debt, net of current portion plus short-term borrowings, current portion of long-term debt and lease liabilities minus cash and cash equivalents. The debt origination cost and Bond fair value hedge are not included in the borrowings
Net Debt to EBITDA (Annualized)	It is computed by dividing net debt as at the end of the relevant period by EBITDA for the relevant period (annualized).

Net Debt to Funded Equity Ratio	It is computed by dividing net debt as at the end of the relevant period by Equity attributable to equity holders of parent as at the end of the relevant period.
Net Revenues	It is not an Ind-AS measure and is defined as total revenues adjusted for access charges, cost of goods sold and license fees for the relevant period.
Operating Free Cash flow	It is computed by subtracting capex from EBITDA.
Personnel Cost per Employee per month	It is computed by dividing the Personnel Cost by the closing number of employees in a given business unit and number of months in the relevant period.
Price-Earnings Ratio – P/E Ratio	It is computed by dividing the closing market price (BSE) as at end of the relevant period by the earnings per basic share for the relevant period (LTM).
Profit / (Loss) after current tax expense	It is not an Ind-AS measure and is defined as Profit / (Loss) before taxation adjusted for current tax expense.
Return On Capital Employed (ROCE)	For the full year ended March 31, 2017, 2018 and 2019, ROCE is computed by dividing the sum of net profit and finance cost (net) excluding finance charges for the period by average (of opening and closing) capital employed. For the quarterly computation, it is computed by dividing the sum of net profit and finance cost (net) excluding finance charges for the preceding (last) 12 months from the end of the relevant period by average capital employed. Average capital employed is calculated by considering average of quarterly average for the preceding (last) four quarters from the end of the relevant period. For current quarter, it is computed by dividing the sum of net profit and finance cost (net) excluding finance charges for the preceding (last) 12 months from the end of the relevant period by average capital employed (Average capital employed is calculated by considering average of opening and closing capital employed for the relevant period.).
