

Case Study: India

False Higher Education Degree

Overview

An applicant seeking employment as a medical professional submitted his academic credentials to the DataFlow Group for verification. The presented documents indicated that he had completed a Master's Degree in Emergency Medicine - offered by one of the top ten hospitals in India in collaboration with a renowned university based in the United States of America.

Following extensive research conducted by the DataFlow Group, it became apparent that the mentioned hospital is neither permitted nor recognized by relevant governing authorities to offer Master's Degrees in Emergency Medicine. The authorities also came forward and declared such post graduate courses in modern medicine as illegal and initially void.

DataFlow Group Solutions

In order to determine the accuracy and authenticity of the Applicant's documents, the DataFlow Group conducted:

- **Online Research** - The DataFlow Group boasts an expert research team that specializes in the extraction of critical information from worldwide online databases
- **Primary Source Verification** - The DataFlow Group has emerged as the leading international provider to solely focus on background screening and immigration compliance solutions using Primary Source Verification
- **Cross Checking** - The DataFlow Group leverages an expansive network of over 60,000 issuing authorities throughout more than 200 countries and territories to verify the authenticity of various documents

Operational Excellence

-  Global Outreach Covering 200+ Countries
-  Worldwide Network of 60,000+ Issuing Authorities
-  Unique Set of Customised Services
-  Fast Turnaround Time
-  International Partnerships and Affiliations
-  Qualified Experts and Researchers with Multilingual Capabilities

Technological Leadership

-  Cutting-Edge Online Process Flow
-  Robust Platforms
-  Industry Leading Information Security
-  Fast and Accurate Data
-  Proprietary Databases
-  Advanced Ecosystem and Robust IP-Based Delivery Framework

Result

Based on research findings, the DataFlow Group marked the case as 'Negative' - ultimately showing that claiming higher education from a well-known hospital does not automatically guarantee that the degree nor the applicant are genuine.
