

dPassive Tokenomics

We will issue a DAO governance and utilities token coin “dPassive Token” [DPS]. A strict limit of 300 million DPS will be created. dPassive protocol will eventually run on Binance Smart Chain, Ethereum and Polkadot blockchain.

Allocation

%	Amount (dPassive)	Participation
10%	30,000,000	IDO / IFO for products development.
45%	135,000,000	Community and Eco-system Fund and will be governed by the community proposal
35%	90,000,000	Reserved for Liquidity mining
10%	30,000,000	Team (Refer to Lock-in Vesting Schedule)
5%	15,000,000	Pre-sales to Investors (Lock-in for 8 Months)

DPS Distribution for the Team

DPS lock-in for pre-sale to investor

Full Release: (15 Million, lock-in for 8 Months) 100%

dPassive Value & the Burn

dPassive Value

You can use dPassive to pay for any fees on our platform, including and not limited to:

- Minting Fees
- *Exchange Fees
- Redemption Fees
- Any other Fees

*All exchange transaction on the platform will be charged a **0.3%** (**0.25%** go to liquidity providers and **0.05%** fees will be the revenue of the platform)

When you use DPS to pay for fees, you will receive a significant discount:

%	Discount
1 st Year	50%
2 nd Year	25%
3 rd Year	12.5%
4 th Year	6.75%
5 th Year	No Discount

The Burn

Every year, we will destroy the DPS based on the revenue generated from our platform until we destroy 25% of all the DPS. All transactions will be on the blockchain. We will eventually destroy 75 Million DPS, leaving 225 Million DPS.
