Besides, SUPPORi is entirely made of mesh. Therefore, you feel very comfortable even in the summer. SUPPORi bears the baby's weight at the edge of his/her shoulder. This helps prevent shoulder stiffness.

we have a large selection to choose from! It is lightweight and compact, which allows you to get your child into the sling quick and easy. The baby carrier can be used from when the child can sit up by themselves, up 13 kg [28lb]. When the child is in the sling, you should always have a hand behind their back and follow their movements. THE NOTICE FROM EVELYNE OF PAROLE DE MAMANS:

This baby carrier is very light, reminiscent of a scarf. It can be worn in water: an asset for the holidays, especially since it does not take up space in your bag. I can wear it under a jacket or coat – that's very practical!
