3LPM Aerator Specification

3 LPM Product Highlights

Our Standard Tap aerators are water saving fixtures, which will improve wash coverage area, without splash. These 3 Liters flow rate per minute aerators will fit in any standard faucets with an attachment ring of 24MM dia. These faucet aerators are water efficient and will reduce 75%* flow rate from standard taps, and hence save water.

* saving depends on existing flow rate and daily usage

Product Details

- All solid plastic ABS material for longer durability.
- Precision manufacturing with consistent pin holes at the bottom, for better spray and user experience.
- Shower spray with wider-angle design to cover entire hand with less water designed for hand-wash taps.
- Top filter cap attachment, to reduce dust particles entering aerator core.
- Easy to clean with warm water to remove any deposits
- Works with high pressure and low-pressure water flow.
