

I was introduced to Kenny's REITs course by a friend and having attended it, found the content to be very comprehensive and clear. However, I did not have the time to monitor the markets and hence decided to engage Kenny's REIT advisory service. Kenny clearly explained how a REIT portfolio fits within a larger diversified portfolio of investments.

After an assessment of my risk profile and clarifying my financial goals, he helped to construct a REIT portfolio with a base core holding of selected REITs to be held for the longer term (for yield) with a satellite portfolio of tactically selected REITs to take advantage of market opportunities. He then advises me when to make the purchases and the target price to buy. So far, the performance of the portfolio has been great and in line with expectations after the course.

I would definitely recommend the REIT advisory service to people who have attended Kenny's REIT course but lack either the time to monitor the markets or the confidence and experience to build and implement a Singapore REIT portfolio.

Regards,

Chua Hock Chiang
