

SYSTEMATIC INVESTMENT PLAN (SIP)

SMALL STEPS FOR
YOUR BIG DREAMS!

A SIP is the smartest way to invest in mutual funds. It is a periodic investment (usually monthly) in a mutual fund for a fixed time frame.

BENEFITS OF A SIP

SIPs help you reach your goal systematically - If you know your goal and time-frame, you can plan your investments with clarity and invest the required amount systematically.

SIPs are lighter on your wallet - You can start with as little as Rs. 1,000 a month. That works out to saving less than Rs. 35 a day!

SIPs inculcate investing discipline - SIP investments take place on auto-pilot, and this makes sure that you invest every month for your goals.

SIPs help you grow wealth with the power of compounding - The eighth wonder of the world, with compounding, you earn returns on your investment and the gains you make on your investment. So, the longer your money stays invested, the more it multiplies! (A SIP of Rs. 1,000 a month for 30 years, could earn you Rs. 35 lakh at assumed annual returns of 12% for equity mutual funds).

SIPs give you flexibility - With SIPs, you can choose your investment amount, the number of months you want to invest, the frequency of your investments and the date you'd like to invest on.

SIPs average out investment costs: They invest the same amount across markets lows and highs. So, when markets are low, you get more units for the same amount and vice versa. This averages out your investment costs.

SIP variants give you more power: From Step-up SIPs that increase your SIP amount at fixed intervals to Flexi-SIPs that allow you to change your SIP amount every month, there's a SIP that's perfect for you.

WHY START A SIP WITH FUNDSINDIA?

FundsIndia offers the most convenient and powerful SIP platform for mutual fund investments in India! We offer four kinds of SIPs:
