

Dragon Tree

The dragon tree is a tropical plant with upright, bold canes and bright strap-like leaves. It does well in low light conditions and its wide leaves are long, and arc gracefully from the stalky stem.

Location

semi-indoor

Ease of Care

easy to grow

Light

they can tolerate medium light conditions. we recommend placing them in partial shade with decent exposure to sunlight

Watering

let the soil dry between waterings. during winter, reduce watering. too much water can kill the plant.

Special Feature

unique appearance

Toxicity

mildly toxic if ingested

Sad Plant Signs

slow growth:
dim light

drooping leaves:
underwatered

simple beauty
