

# Aloe Vera

This is commonly grown as a houseplant, and is known for its leaves which contain a soothing gel used on sunburns and other skin irritations. This tropical succulent features fleshy lance-shape leaves with jagged edges that grow out from a basal rosette.

## Location

indoor and semi-indoor

## Ease of Care

easy to grow

## Light

these can adapt to areas that get partial sunlight and partial shade.

## Watering

let the soil dry between waterings.  
if growing in a water vase, change the water weekly.

## Special Feature

herbal benefits

## Toxicity

toxic for pets

## Sad Plant Signs

yellowing leaves:  
too much sunlight

soft, fragile stem:  
poor water quality

The groundwork of all happiness is health
