

Cactus

These have overwhelming popularity in the garden design world. Cactus and succulents can be easily integrated with other drought-tolerant trees, shrubs, perennials, and ornamental grasses for a beautiful and natural-looking garden design.

Location

indoor to semi-indoor

Ease of Care

easy to grow

Light

these can adapt to areas that get partial sunlight and will also survive quite dim situations.

Watering

let the soil dry between waterings. during winter, reduce watering. too much water can kill the plant.

Special Feature

unique foliage

Toxicity

toxic if ingested

Sad Plant Signs

wilting leaves:
placed in high temperatures

soft, fragile stem:
root rot, overwatered

It always seems impossible until it's done
