

SAVIER- A PERFECT INSECTICIDE FOR MOSQUITO & STORED GRAIN PEST

Mosquito bites causes itching and rash. They Spread various disease like dengue malaria etc. Whereas Weevils and other stored grain pest attack many crops destroying the quality of food grains and crops. **SAVIER** is a synthetic pyrethroid insecticide with long lasting residual effectiveness against mosquitoes, weevils, moths, beetles and other insect pests of stored grains/seeds. **SAVIER** contains Deltamethrin 2.5% w/w as an active ingredient in wettable form.

OUTSTANDING FEATURES OF SAVIER

- ★ **SAVIER** kills the insects with contact action which offers broad spectrum activity against range of mosquito species and so it gives effective control of malaria.
- ★ **SAVIER** owing to its longer residual action at very low dose is proven cost effective compared to DDT, BHC and Malathion. It is found effective in both, indoors and outdoors
- ★ **SAVIER** is recommended and certified by National Anti Malaria Programme (NAMP) as Mosquito Adulticide.
- ★ **SAVIER** is very effective against stored grain pest.
- ★ **SAVIER** is cost effective due to low dosage and less rounds.
- ★ **SAVIER** is odourless, non greasy and non irritant.
- ★ **SAVIER** is odorless, non-staining, no greasy and non irritant.
- ★ **SAVIER** offers high degrees of safety compared to other conventional insecticides at the recommended dosages. It is safe to non target animals and human beings.

RECOMMENDATION FOR MOSQUITO CONTROL

TARGET PESTS	DOSAGE
Adult Mosquitoes	12.5-25 mg a.i. per m ² (50-100 gm / 100 sq.m.) (In practice 250-500 gms in 10 litres of water to cover 500 m ² area)
Stored Grain Pests: Khapra Beetle, Red Flour Beetle, Saw toothed grain beetle, Rice Moth, Almond Moth, Lesser grain borer, Rice weevil of Wheat and Rice Crops	30 mg a.i. /sq.m. (1.2 gm/sq.m.) (In practice 36 gms in 1 litre of water to cover 30 sq.m.)

DIRECTION FOR USE

- ★ Before starting wear rubber gloves.
- ★ Take clean water in a bucket. Add required quantity of SAVIER and stir well.
- ★ Transfer above solution to your sprayer. Add required quantity of water to make the ready to use spray dilution. Stir well and close the lid of sprayer.
- ★ Use knapsack sprayer, stirrup pump or bottle charger for spraying operations in infested areas.
- ★ **For Mosquito Control:**
- ★ Spray the suspension to the point of minimal run off to cover all infested areas like walls, ceilings, corners, cracks and crevices.
- ★ **For Stored Grain Pests:**
- ★ Spray the empty godowns, covering stored grains in all the areas including walls and ceilings.
- ★ Spray the solution over empty bags and let them dry.
- ★ Spray solution over Grains Field stacks in the Godowns or Storage areas for preventive measures.

FIRST AID

- ★ If swallowed, induce vomiting by tickling the back of throat. Repeat it until the vomitus is clear. Do not induce vomiting if the patient is unconscious.
- ★ If clothing and skin are contaminated, remove the clothes and wash the contaminated skin with copious amount of soap and water.
- ★ If eyes are contaminated, flush with plenty of saline/clean water for about 10 to 15 minutes.
- ★ If inhaled, remove the patient to fresh air.
