

# Protect your **LOVED** ones by purifying **DRINKING WATER**

## SPECIAL FEATURES

BioPlus **BAC Filters** also add essential minerals, increases **pH upto 8**, making water Alkaline.

## 5" Block Activated Carbon Filter

### About

There are many types of high-tech activated carbon filters available for filtration of water. The performance of these filters depends on the strata (layers of rocks in the ground) from which it is derived (e.g. anthracite coal, bone char, coconut shell) and the way it is manufactured. Coconut shells are one of the stratas showing best results & which is why with experience & research, BioPlus offers Block Activated Carbon Filters made from coconut shells.

BioPlus BAC Filters are manufactured with the most advanced technology which provides great quality & performance. Wisely choosing an activated carbon filter in today's market needs to be taken into consideration for best quality water, value for money & performing filters.

### SPECIFICATION

- |                |                      |
|----------------|----------------------|
| • Size         | : 5"                 |
| • Life         | : approx 2500 liters |
| • Fitting Type | : Push Fit           |
| • Filter Type  | : Openable           |
| • Material     | : Polycarbonate (PC) |

### KEY FEATURES

-  Makes **excellent** taste of water
-  **1050 to 1100 idione**, 4 wash activated carbon
-  Unbreakable housing, **Polycarbonate (PC)** openable
-  Remove Chlorine upto **7PPM**
