

# Protect your **LOVED** ones by purifying **DRINKING WATER**

## UNIVERSAL BASKET (3-in-1 Filters)

### Sediment filter

BioPlus Sediment filter is structured in such a way that it has a high capacity of holding dirt. Stops particles upto 5 micron. Filters roll sheet made up of 100% homopolymers. Polypropylene for a water purifier matrix; which helps to meet the requirement of any water purifier.

### Granular Activated Carbon Filter

There are many types of high-tech activated carbon filters available for filtration of water. The performance of these filters depends on the strata (layers of rocks in the ground) from which it is derived (e.g. anthracite coal, bone char, coconut shell) and the way it is manufactured. Coconut shell are one of the stratas showing best results & which is why with experience & research, BioPlus Activated Carbon Filters made from coconut shells.

### H2AAA + Mineralising Filter

Hydrogen-rich, Antioxidant, Antibacterial, Alkaline & Mineralising filters are a must for treatment of water. In today's era, increase in acidic food & drink has increased like never before. H2AAA Filters increase pH, declines ORP making water Antioxidant & adds essential minerals.

\*For best results drink immediately and avoid storing the water

### SPECIFICATIONS

- Size : 11" length X 2.5" diameter
- Net weight : 260 grams
- Material : Polypropylene
- Life : approx 6000 liters
- Fitting type : Push fit
- Filter type : Welded

### SPECIFICATIONS

- Size : 11" length X 2.5" diameter
- Life : approx 7000 liters
- Material : Polypropylene
- Fitting Type : Push fit
- Filter Type : Welded

### SPECIFICATIONS

- Size : 11" length x 2.5" diameter
- Life : approx 11000 liters
- Desired flow rate : Upto 20 LPH
- Material : Polypropylene
- Net Weight : 503 grams
- pH value : 3+ of input water pH, usually 9.5
- ORP (mv) : upto (-) 400
- Hydrogen levels : upto 400 ppb
