## Antiscalant Doser

### Why use an Antiscalant Doser?

Antiscalant Doser is a pretreatment product for domestic RO membranes. These dosers help reduce scaling on the membrane, enhancing life.

### What does BioPlus Antiscalant Doser contain?

BioPlus Antiscalant Doser contains high grade Anti-scaling Crystals with food graded outer packing. These crystals help delay reaction between the bicarbonate and the calcium magnesium. This delay let's water pass through the membrane without having any chemical reaction which usually leads to scaling.

### APPLICATION-

BioPlus Antiscalant Dosers are made in shape to fit at the start of any domestic RO membrane

Use the Doser at the inlet of the RO membrane

### SPECIFICATIONS

• Shape	: Round
• Diameter	: 49.92mm
• Material	: Polypropylene
• Net weight	: 33 grams
• Life	: 25000 liters (depends on water quality)
• Packing	: 500 pieces in 1 master carton box
