

tableware made of **leaves**

The cover of the product catalogue features a dark, high-contrast photograph of green palm fronds. A white rectangular border frames the central text area.

PRODUCT CATALOGUE

Our Story

Our eco-friendly and biodegradable tableware is produced all over India, and support Indian rural people's livelihood, through community owned micro-enterprises of rural India.

Biocense was founded with an aim to provide a green alternative to the toxic waste generated from disposable tableware all over the world.

Our aim is two-folds:

- To generate sustainable, rural employment in India
- Make the earth, cleaner and greener.

Our tableware is an alternative to plastic disposable tableware that choke up the earth, while providing quality products to our customers.

Why choose Areca

Of the estimated **600,000** tons of plastic waste generated across the world on a daily basis, a huge portion of single-use plastic in our collective footprint comes from dining cutlery: plastic plates, spoons and forks that get served with our food. Vendors generally prefer disposable cutlery as it saves them a lot of time otherwise spent cleaning plates, allowing them to serve more customers especially during peak hours.

Areca palm leaf tableware are completely compostable, made from natural materials, easy-to-use, easy-to-carry & encourage others to switch to eco-friendly alternatives. Apart from these features, the plates are highly durable & can withstand hot & cold temperatures without deforming.

What makes Areca unique

Natural & Sturdy

Buffet friendly and yet sturdy

Hygienic

Chemical free and zero health hazard

Heat Resistant

Serve your hot gravy without any worry

Technology Friendly

Warm your meal in the microwave and serve

Eco-Friendly

Compost it after usage
