KHAJURIYA

AGRI INTERNATIONAL

Khajuriya Agri International specializes in the cultivation and distribution of premium-quality peanuts. Committed to sustainability and ethical business conduct, our mission extends beyond profit, aiming to foster positive environmental and community impacts.

THE PROCESS

Good manufacturing practices is strictly implemented in our processing unit. Below info-graphic represent different step involved in our processing units

The Steps PROCESS

Good manufacturing practices is strictly implemented in our processing unit. Below info-graphic represent different step involved in our processing units

Growing & Harvesting :

The peanuts bought from the farms undergo a strict quality check and are unloaded only after approval from quality control department.

Factory & Quality check of In-shell Peanuts :

The peanut kernels(red seeds) are removed and separated from the outer thick yellow shells.

Pre-Process Cleaning & De-stoning :

The in-shell peanuts are separated from dust, mud, heavy stones, stalks, leaves, undeveloped pods and small in-shells by a classifier separator and in a de-stoning machine.

Shelling of Peanuts & Classification of In-shell Peanuts :

At this stage impurities such as in-shell peanuts, damaged and very small kernels are removed.

Centrifuge- Vibro Separation & Gravity Separation :

This process involves separating lighter materials such as husk, shells, small kernels, etc. from heavier peanut kernels by subjecting the mixture through centrifugal and vibrating motion. This machine uses the principle of gravity by lifting the mixture in air and then separating heavy as well as light impurities e.g. removing impure matter such as shriveled kernels, ergot, light kernels, pods, stones etc.

Buhler color Sortex :

The peanuts then pass through the process of optical inspection by which contaminants such as discolored peanuts, dark peanuts and foreign materials are removed from final product

Uniform Grading :

Grading is the process of separating out broken kernels and grading the nuts in uniform size by diameter and thickness.

Labeling & Dispatch :

Peanuts are packed according to the buyers specification. Vacuum bags, Jute bags, food grade HDPP bags, woven PP bags and jumbo tote bags can be used to pack the finished products.

Variety of Peanuts

WE PROVIDE HIGH-QUALITY PEANUTS

Bold Peanuts

BOLD PEANUTS

The Runner or Bold variety of peanuts is distinguished by its impressive size and premium attributes. Among the various market types of peanuts, the Runner or Bold variety stands out due to its distinctive characteristics. One notable feature of this type is its significantly higher oil content compared to other peanut varieties.

Characterstics

Oil Content	48% – 52% max
BOLD KERNEL	35/40 , 38/42 , 40/45 , 45/50 , 45/55 , 60/70, 70/80
Moisture	7% – 8% Max OR As per Customer Requirements
Aflatoxin	5ppb (TLC Method)

Main uses of Bold penuts

- The Runner or Bold variety of peanuts serves as a versatile ingredient in various culinary applications, including the production of peanut butter and coated confectionery products. Here's how this particular peanut variety is commonly used in these contexts

Java Peanuts

JAVA PEANUTS

The Java variety of peanuts is characterized by its distinctive pink skin and a round, spheroid shape. These unique traits set it apart from other peanut varieties. When it comes to peanut cultivation, it's worth noting that there are two primary crop seasons: winter and summer.

Characterstics

Oil Content	42% -48% Max
BOLD KERNEL	50/60, 60/70, 70/80, 80/90, 90/100, 100/120, 140/160
Moisture	7% – 8% Max OR As per Customer Requirements
Aflatoxin	5ppb (TLC Method)

Main uses of Java peanuts

- JAVA peanuts, known for their large size and bold flavor, are versatile in food applications. They excel in candies, coated confections, salted shelled snacks, and even yield a rich, creamy peanut butter due to their higher oil content.

TJ Peanuts

TJ PEANUTS

The TJ peanut variety is known for its distinct characteristics that set it apart from bold types. In comparison, TJ peanuts are notably smaller in size, making them a unique choice for those who prefer a more petite peanut. However, what these peanuts lack in size, they make up for in their fascinating kernel features.

Characterstics

Oil Content	48% – 52% Max
BOLD KERNEL	50/60, 60/70, 70/80 & 80/90 (Counts Per Ounce)
Moisture	7% – 8% Max OR As per Customer Requirements
Aflatoxin	5 Ppb (TLC Method)

Main uses of TJ peanuts

- TJ peanuts offer high carbs for energy, key in peanut butter production, ideal for nutrition support, rich in heart-healthy fats and protein, and contain potent antioxidants. They're also a source of versatile peanut oil for cooking.

FAQ

Q: Are you a factory supplier or trading company?

A: We have our own factory over 8 years, you are welcomed to visit our factory any time.

Q: Why we choose you?

A: Service: We offer 24h online service.
Professional: We offer the agricultural products exactly you want .
Reliable: we are the real company and factory, we dedicate in win-win

Q: Can you make our own labels & logos?

A: Yes, we can make your labels & logos as request.

Q: What is your MOQ (minimum order quantity) of the products?

A: We can accept order 5-10kg at least depends on different products

FAQ

Q: Can you send the sample?

A: Yes, we welcome sample order test and check quality, mix sample are acceptable. We will take 5-10 days to make custom samples.

Q: How about the packaging?

A: 25kg,50kg OR as per Buyer's Requirement

Q: What's your payment terms?

A: We Accepted payment Terms: inrevocable letter of credit, advance

Q: How long does it take to deliver?

A: It will take about 7-10days after received payment
