## **Sarovee Corporation Inc.**

At Sarovee we are passionate **FOR AUTOMATION, ENERGY, GREEN INITIATIVES** catering to our clients who are looking for innovations in their industry !

We at Sarovee Corporation Inc. Deals with **INNOVATIVE & SPECIALIZED PRODUCTS** and services catering to various government as well as the private sectors.

Our creative process coupled with our **Technical Expertise** is sure to offer an edge to your requirements. Our team of Enthusiastic, Creative, Passionate Technocrats and Experienced professionals will create the unique perception of your business needs, which will achieve the unshakable place it deserves - Your customer's mind.

Our passion gives us a different view and hence moving towards the goal of catering to Big 4 organizations.

## Sarovee Corporation Inc.

At SaroVee Corporation Inc. we deal in highly innovative Products for **AUTOMATION, ENERGY, and GREEN INITIATIVES**

- We Represent **TenMat**, which is headquartered at UK, Known for high temperature composite material manufacturing.
- We deal in the product range of **Baumer**, This European organization has passion for sensor technology, encoders, measuring instruments and components for automated image processing
- **Fenner Drives** , European brand - High Performance Composite (HPC) V-Belts are uniquely designed and incorporate custom composite materials which provide a number of time- and cost-saving benefits to maintenance engineers and equipment designers.

## Sarovee Corporation Inc.

We deal in accessories of Vacuum pumps of different brands like:

- Becker vacuum pumps
- Bush vacuum pumps
- Orion vacuum pumps
- Gardner Denver vacuum pumps
- Elmo Rietschle vacuum pumps

TENMAT advanced materials features are:

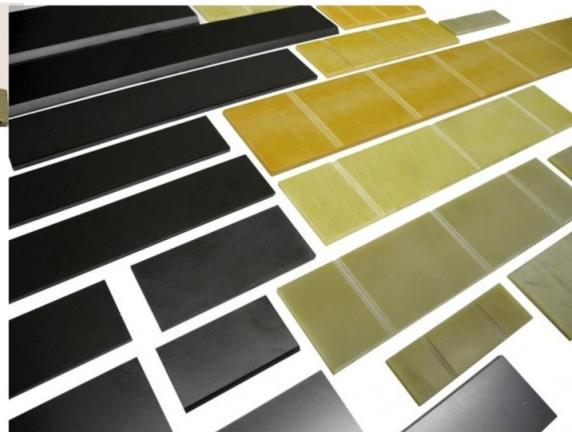

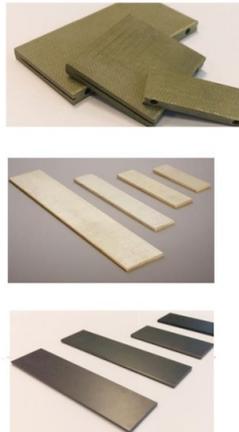

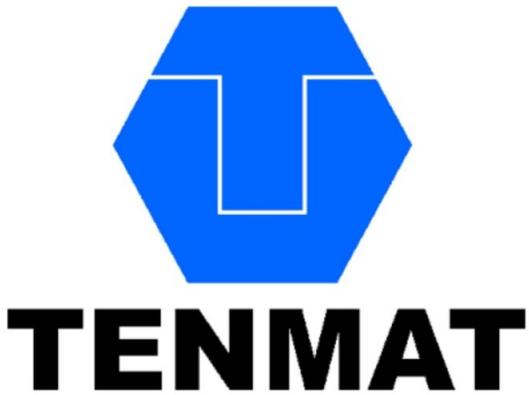

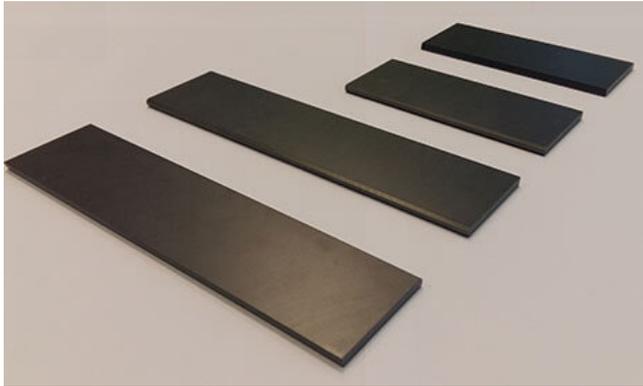

Rotor Vanes:

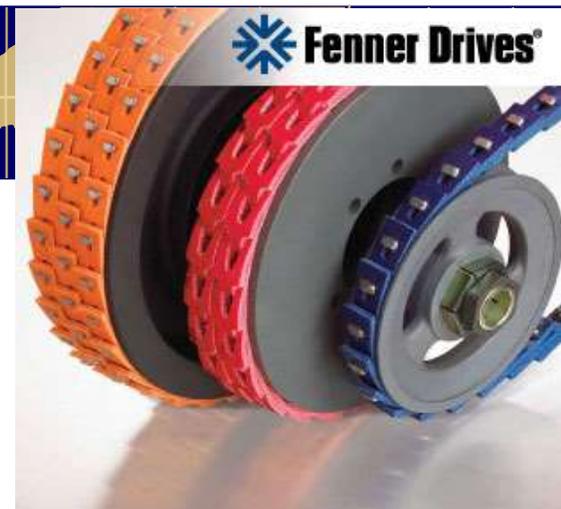

- Long life
- Chemical and corrosion resistance
- Cool running
- Wide pump operating range
- High flexural strength
- High temperature resistance
- Low noise
- Low water swell

Replacement warranty on  
TENMAT products only.

### We deal in Fenner Drives High Performance Composite Adjustable Locking Link V-Belts

- ✦ We deal in Fenner Drives - Premium V-Belts -**HIGHLY RELIABLE** and long life V-Belts. Fenner Drives - High Performance Composite V-Belts Power Twist Link V Belt Adjustable V Belt A-Section B-Section C-Section Z-Section Locking V Belts
- ✦ POWERWIST Drive is engineered to maintain the optimal belt tension throughout the belt's life. By eliminating the need to re-tension, you can expect reduced labor cost and increased unit efficiency.
- ✦ Extensive testing was conducted to track the tension decay of POWERWIST Drive versus POWERWIST Standard and a comparable rubber V-belt. Test results show that POWERWIST Drive maintained the required tension throughout the duration of the test. POWERWIST Standard and rubber V-belts require re-tensioning to maintain proper belt tension.

Fenner Drives - High Performance Composite V-Belts Power Twist Link V Belt Adjustable V Belt A-Section B-Section C-Section Z-Section Locking V Belts

## Sarovee Corporation Inc.

- ✦ There's no need to maintain inventory of numerous different endless rubber belts to cover all your drives. Carry a box in stock of each common size and you're almost 100% covered with a significant reduction in working capital tied up in spares.
- ✦ #Fastest installations - in the world of V-BELTS.
- #Longer belt life
- #Minimized maintenance time
- #Easier, faster installation
- #Reduced V-belt stock
- #Reduced drive vibration & System Noise
- #Simplified drive design
- #No Welding

PTPVSBRB

Attribute	Rubber V-belt	PowerTwist Plus
<b>Temperature</b>	✗ Sensitive to high temperatures. Belt life reduced by 50% every 10°C (18°F) above 70°C (158°F).	✓ Resistant to high temperatures. Operates effectively up to 116°C (240°F).
<b>Abrasion</b>	✗ Average resistance to abrasion.	✓ High resistance to abrasion.
<b>Chemical Resistance</b>	✗ Sensitive to oil, grease and common chemicals and solvents.	✓ Resistant to oil, grease, water and most agricultural chemicals and solvents.
<b>Vibration</b>	✗ Transmits vibration through continuous tensile members.	✓ Individual link design dampens vibration by up to 50% which reduces noise and increases component life.
<b>Belt Stretch</b>	✗ After initial run-in and retensioning, continues to stretch over time causing belts to become less efficient and slip if not retensioned regularly.	✓ After initial run-in where the links become seated, PowerTwist Plus has insignificant elongation and does not require regular retensioning. Ideal for drives with fixed centers.
<b>Installation</b>	✗ Tensioning method required, drive components must often be dismantled, tools required for installation.	✓ No need to dismantle components, belt can be fed through and assembled on the machine, belt can be rolled on, no tools required. Easy, fast installation on captive drives.
<b>Inventory</b>	✗ Made in specific continuous lengths only. Must use a specific belt for each drive so every variation must be kept in stock.	✓ Can be made to any length needed. No need to stock specific lengths. One box of each section type covers all lengths.
<b>Matched Sets</b>	✗ Matched sets required for multi belt drives.	✓ Matched sets can be made on demand with same number of links in each belt.

### High performance CONVEYOR belting

SIMPLY TWIST AND GO!

It's time to take advantage of the benefits of Tango high performance conveyor belting:

#### Easy, Fast Installation with No Welding Required

- Make to length by hand, without tools
- No curing time, just twist and go!

#### Longer Belt Life

- Extremely high strength and excellent performance in harsh environments

#### Simple Inventory Management

- Less money tied up in spare belting and no belt waste

## Mr Ketan Gandhi - Associate Partner – Strategies

### Expertise

- Sales, Marketing & Research.
- Breakthrough ideas & innovation, Strategy & Operations & Wind Power Development, Energy and Automations
- Ex-Head (CEO Level) Control Panel Business unit, SUZLON ENERGY LTD

**Experience:** 26 years of International experience in business leadership, management, consulting, imparting training & technical field in Engineering, Wind Energy, Nuclear Power, Steel, Pulp & Paper, IT Enabled Services, Industrial Control Panels, Electrical & Automation, Infrastructure & construction, Consulting, service firms and Manufacturing sector etc.. Has completed International Diploma in Wind Power (Sweden), registered as Chartered Engineer (UK) with Engineering Council (UK), is an IIM-Ahmedabad, India alumnus (One Year General Management Program), & has participated in executive education of Harvard Business School, USA.

### Expertise

Strategic Planning: Formulating long term strategic plans, Establish new production facilities

Operational Innovation: Lean Manufacturing, Six Sigma, Learning & Development, CRM and SRM, Manpower planning, selection & induction, supervising, and administration of personnel. Organizing and delivering training and development programs

Financial Operations: Cost management, budget variance and P & L, project appraisals

Operations, Supply Chain Management: Designing, implementing and monitoring effective procurement schedules, finalize materials, establish quality plans, inventory control, developing alternate vendors, make or buy analysis, reduction in lead times, productivity improvement

Product Development: Wind Turbines and wind parks design, Engineering and integrated product development, value engineering and product innovation.

## **Mr Mohammed Mohtasib - Energy Auditor & Green Initiatives Consultant**

### Expertise

- Consultant - Energy efficiency
- Certified energy auditor - BEE
- Certified Energy Manager - TUV Germany
- Trained CMVP professional
- Lead Auditor ISO 50001

As a consultant Serving organizations who are looking forward for implementation of energy efficiency projects.

He has conducted more than 400 energy audits in India, south east Asia, Europe and Middle east. He is regular trainer at energy efficiency training programs organised by FICCI, National Productivity Council, CII, MEDA etc.

Under power quality, He strives to implement and improve power quality of end users increasing productivity and reliability of operation.

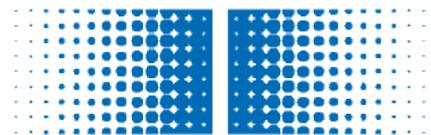

## Swapneel - Founder

- Passionate for Technology, Innovation & Automation

"LIMCA BOOK OF RECORDS HOLDER" with Masters in Strategy & Marketing from the prestigious university in London Strongly believes in the concept - "Strategy defines Structure" and ability to set Objectives while putting the right talent in place and drive to achieve the goals "Come What May" is "The mantra" for Swapneel. He is an Enthusiastic Leader and unshakably optimistic sales and marketing strategist who strives to make a difference in people around him.

His approach is always as a consultant to boost ones business, With 17+ rich years of knowledge and expertise, he has devoted his being to sharing his accepted wisdom in order to facilitate top executives, entrepreneurs and organization's motivate actions. The best of him comes from the strategic thinking, commitment and the power to Dream, Visualise and develop Opportunities with the combination of interpersonal skills to promote his ideas internally and externally with the business insights to make sure those ideas enhance the bottom line meeting aggressive deadlines.
