Sri Lanka- March 4th, 2015

Sri Lanka has today been named in the top 20 destinations among the non-OIC destinations in the Global Muslim Travel Index, the most comprehensive research that has been released on the sector.

The “MasterCard-CrescentRating Global Muslim Travel Index (GMTI) 2015” saw Sri Lanka come 15th on the list. Singapore took the top spot for the non-Organisation of Islamic Cooperation (OIC) destinations.

Malaysia came first for the OIC destinations, which also saw Turkey, UAE, Saudi Arabia and Qatar make the top five.

The GMTI looks at in-depth data covering 100 destinations, creating an overall index, based on a number of criteria. This is the first time such thorough insights have been provided into one of the fastest-growing tourism sectors in the world today.

It will provide travellers, Governments, travel services and investors comprehensive benchmarks across a number of important criteria enabling them to track the health and growth of this travel segment.

The study also revealed that in 2014, this segment was worth \$145 billion with 108 million Muslim travellers representing 10% of the entire travel economy. Sri Lanka saw 206,000 million Muslim visitors in that period which accounts for 15% of the total arrivals to the destination.

The Muslim travel market is forecasted to grow to 150 million visitors by 2020 and 11% of the entire segment with a value projected to grow to \$200 billion.

“The MasterCard-CrescentRating Global Muslim Travel Index has today set a real precedent for the tourism industry,” said Fazal Bahardeen, CEO of CrescentRating & HalalTrip.

“Not only is it the most in-depth research that we have undertaken so far on the fast-growing Muslim travel market, but has provided all stakeholders with some invaluable insight into how the halal-friendly tourism sector is growing and developing from a global perspective.”

“We are pleased to partner with CrescentRating to develop the Global Muslim Travel Index as we see it as an extension of our efforts in giving consumers ease of mind when travelling through our seamless payment solutions. Travel continues to be a core passion for consumers and we are confident the GMTI will prove to be a trusted resource for this important, fast-growing traveller segment,” said Matthew Driver, President, Southeast Asia, MasterCard.

All 100 destinations in the GMTI were scored against a backdrop of criteria which included suitability as a family holiday destination, the level of services and facilities it provides, accommodation options, marketing initiatives as well as visitor arrivals. Each criterion was then weighted to make up the overall index score.

Among the non-OIC destinations Singapore scored the highest Index score of 65.1 followed by Thailand at 59.2 with Sri Lanka scoring 44.

GMTI40, which will be updated quarterly around the year, will track the average score of the top 20 OIC and non-OIC destinations and will form the key index to monitor the performance of the Muslim travel segment.

The overall average score for 40 destinations (GMTI40) currently stands at 56 while the overall average GMTI score for the complete 100 destinations is at 43.8. From a regional perspective, Asia Pacific destinations lead with an average GMTI score of 54.
