

GUJARAT TECHNOLOGICAL UNIVERSITY

Syllabus for Bachelor of Interior Design

SEMESTER-6

SUBJECT NAME – SPACE PERCEPTION

SUBJECT CODE – 1065106

EMPHASIS:

- Relationship of Man & Space.

CONTENT:

- Perception of space through understanding associative aspects relating to space.
- Understand cognitive theories and gestalt principles of psychology. These principles are to be related in the field of space making. Relationship of spatial elements like floor, column, wall, window, door, stair, roof, light, color to the psychology and perception of space.

PROJECTS:

- Chose an existing building & identify basic constituent elements of space.
- Then with the same kit of basic space making elements and for the same building programmed, create a design showing better spatial experiences and its desired impact.
- The new design is to be submitted in a scaled 3-D model format.
