

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering (Part Time)

Subject Code: 2961108

Semester – VI

Subject Name: Satellite Communication

Type of course:

Prerequisite: Analog and Digital Communication, Microwave Engineering

Rationale: The students need to learn basic concepts of satellite communication, components of satellite systems, Advantages and disadvantages of Satellite systems.

Teaching and Examination Scheme:

Teaching Scheme			Credits	Examination Marks				Total Marks
L	T	P		Theory Marks		Practical Marks		
				ESE (E)	PA (M)	ESE (V)	PA (I)	
3	0	2	4	70	30	30	20	150

Content:

Sr. No.	Content	Total Hrs
1	Introduction to Satellite Communication: Principles and architecture of satellite communication, Brief history of satellite systems, advantages, disadvantages, applications and frequency bands used for satellite communication.	4
2	Orbital Mechanics: Orbital equations, Kepler's laws, Apogee and Perigee for an elliptical orbit, evaluation of velocity, orbital period, angular velocity etc. of a satellite, concepts of Solar day and Sidereal day.	9
3	Satellite sub-systems: Study of architecture and roles of various sub-systems of a satellite system such as Telemetry, tracking, command and monitoring (TTC&M), Attitude and orbit control system (AOCS), Communication sub-system, power sub-system etc.	8
4	Typical Phenomena in Satellite Communication: Solar Eclipse on satellite, its effects, remedies for eclipse, sun transit outage phenomena, its effects and remedies, Doppler frequency shift phenomena and expression for Doppler shift.	4
5	Satellite link budget: Flux density and received signal power equations, Calculation of system noise temperature for satellite receiver, noise power calculation, Drafting of satellite link budget and C/N ratio calculations in clean air and rainy conditions.	10

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering (Part Time)

Subject Code: 2961108

6	Modulation and Multiple Access Schemes: Various modulation schemes used in satellite communication, Meaning of multiple access, Multiple access schemes based on time, frequency and code sharing namely TDMA, FDMA and CDMA.	10
----------	--	----

Suggested Specification table with Marks (Theory):

Distribution of Theory Marks					
R Level	U Level	A Level	N Level	E Level	C Level
20	20	10	10	5	5

Legends: R: Remembrance; U: Understanding; A: Application, N: Analyze and E: Evaluate C: Create and above Levels (Revised Bloom's Taxonomy)

Note: This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Reference Books:

1. Timothy Pratt, Charles W. Bostian, Jeremy E Allnut: Satellite Communications: Wiley India
2. Dennis Roddy: Satellite Communication: McGraw Hill

Course Outcomes:

After learning the course, the students should be able to

Sr. No.	CO statement	Marks % weightage
CO-1	Visualize the architecture of satellite systems as a means of high speed, high range communication system	20
CO-2	State various aspects related to satellite systems such as orbital equations, subsystems in a satellite, link budget, modulation and multiple access schemes	40
CO-3	Solve numerical problems related to orbital motion and design of link budget the given parameters and conditions	40

List of Experiments:

Sr.No.	Experiment Title
1.	Understanding the basic concepts of satellite communication
2.	To setup a communication link between uplink transmitter and downlink receiver using Satellite
3.	To setup an Active satellite communication link and demonstrate link fail operation
4.	To communicate voice & Video signal through satellite link

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering (Part Time)

Subject Code: 2961108

5.	Observe the effect of Different combinations of uplink and downlink frequencies on satellite link
6.	To transmit and receive three separate signals (Audio, Video , Tone) simultaneously through satellite link
7.	To transmit and receive function generator signals through satellite link
8.	To measure the signal parameters in an analog FM/FDM TV satellite link
9.	To transmit digital waveforms through a satellite communication link
10.	To Calculate Bit Error Rate in a satellite communication link
