### **Description:**

Today's Young engineer's innovative work gives the real progress tomorrow to our society. The real challenge of education society is produce creative engineers to work about big challenges of the world. The academics play a vital role to impart those innovative skills among students. The curriculum design process is a crucial task in academics. As part of academics while curriculum development there is a need to take the feedback from various stakeholders like academic experts, students, parents, academic peer, alumni and industry. As part of this paper I concentrate on the role of feedback taken from that committee. By analyzing the inputs get from feedback committee we get the real needs of the society. That means we are identifying the objective. After as part of curriculum design the objective description, implementation plan, evolution plan and outcomes will be specified clearly. The main goal of curriculum design is to translate the objectives into specific plans and actions. Key words: Curriculum Design; Feedback Committee; Stakeholder; Society.
