

IISc - Open Source Design Document for 3 NM³/h Medical Oxygen Generation System

In continuation with our previous mail as subject cited above, we are glad to inform you that the design document for the 3 NM³/h – 50 LPM Medical Oxygen Generator under Open Source license is now ready. The complete design document with the necessary drawings is attached with this mail as a single file.

Please note that the design document will shortly be hosted on the institute website and all further updates and response to general queries will be updated on the same web page. The link for the URL shall shortly be shared with you.

The design document contains a detailed FAQ. If there are queries beyond the FAQ, please reach us through the mail ID scube@iisc.ac.in

We will STRICTLY NOT be able to respond to any modes of communication other than through the official email.
