United States (Low Risk)	153	177	169	232

Anticipate disruption and follow all official directives **in the coming days** amid ongoing rolling power outages throughout the state of Texas. These have been prompted by the high demand of electric services following the passage of Winter Storm Uri. The rolling power outages started at 01.25 (local time) on 15 February and will be in place until the weather emergency ends. The authorities have issued a level three Energy Emergency Alert (highest on a three-tier scale) for the state of Texas, as millions of people are affected by power outages for up to several hours at a time. Restoration works are under way in areas affected by the winter storm and unplanned power outages, though it may take several days for services to be fully reinstated.

WHAT WE ADVISED YOUR PEOPLE

Monitor the Electric Reliability Council of Texas (ERCOT) [page](#) for up-to-date information on restoration plans.
Follow government alerts, advisories and directives.
Monitor our alerts on the US for related updates.
