

MARCH 23 - 27, 2020

TO DO LIST:

Materials Needed:

- Oslo paper
- crayons/paints
- pencil
- ruler
- marker

What will you do?

- You are an engineer. You are to design a device that will help ensure household safety. The device should be drawn on a sheet of Oslo paper. It must be colored, named, and properly labelled. The drawing must be neat and organized. Below your drawing, explain also how the device can ensure safety at home.

A large empty rectangular box with a thick black border, intended for the student to draw their safety device and provide an explanation.
