Direction: Answer the following Philosophical question about Buddhism in your own understanding.

1. If life is just suffering as Buddhism claims, why is it some of us don't see it this way? Why do some of us see life as wonderful rather than filled with suffering?

2. Who is the Karma Judge?

3. What real evidence do we have that reincarnation is true?

4. If achieving "nirvana" means that we will be liberated from the illusion of consciousness, how then will we know our achieving this "nirvana"? How can we be "conscious" of this, if "consciousness" will no longer exist?

Philippines made a significant role in the history of Israel, when the Jews exterminated their race called **holocaust** by Hitler as the solution to the conflict between Arabs and Jews. Our country welcomed them under President Quezon where about 10,000 free visas were given to the Jews to save them from the **holocaust** in Europe and lived here peacefully. In 2009, the people of Israel burst the “Open Door Monument” in honor of the Filipinos who welcomed the Jews and to strengthen the friendship between Israel and Philippines.
