MyHIJAU DIRECTORY
The New Generation of Architectural Material

As an alternative replacement for regular pre-painted material, ColourMaxx® Alpha has been specially designed to give maximum durability in corrosion resistance, excellent formability for structural design and superior cut edge protection. No more significant problems such as microcracking after severe forming, red rust at edge and less durable against acid and alkaline environments. The benefits are clear, proven from our comprehensive performance testing between various pre-painted materials.

Excellent Formability for Structural Design
Microcracking on the substrate may weaken the corrosion resistance performance after coated layer is deformed by severe bending.

For such kind of use, ColourMaxx® Alpha is designed to improve the corrosion resistance at the bent part. Its flexible coating maximizes protection at bent part of roofing sheets, just to meet variety of demanding profiles. The painted layer has minimized cracking, not easily peeled off, thereby protecting the base metal for longer period.

Superior Cut Edge Protection
The most highlighted problem by installer/contractor/building owner is the edge creep which prompts of pressing need to address this issue. To counter this problem, ColourMaxx® Alpha substrate has special alloying metal of Zn-Al-Mg to act as barrier and provides excellent cathodic and cut edge protection. Paint that applied to the well-treated metallic coated substrate will provide further barrier coating to resist corrosion and prolongs the overall life of a pre-painted product in moderate environment.

Towards the new generation of Magnesium galvanized steel, FIW continues to be pioneer with forefront of pre-painted material product.

Endure
Entirely Versatile

PRISMA
PREMIERA
LUMINA

The most sellable polyester coating based product. It has outstanding weathering performance suitable for wide applications including residential and mild urban environment.

Extended
Exceed Expectations

EXCEL

A super durable product which provides self-cleaning, thermal reflectance that gives cooler interior building, excellent weatherability to tough weather without compromising basic criteria. It offers superior cut edge protection and excellent formability to suit demanding architectural design.

Eccentric
Best Solution for All

EXTERNAL
EXTREME

A PVDf coating that designed to offer outstanding weathering properties for use in critical environment. The extraordinary coating remains stable under UV light and is able to provide superior chalking and high heat resistance.
Imagine combining the strengths of both. That’s the cost breakthrough power of Gading Kencana’s Energy Efficiency & Net Energy Metering Package. An Energy Audit of the plant to identify energy-saving opportunities and formulate unique energy-saving strategies from the energy data matrix. Then, professionally-installed rooftop solar panels to help you draw every possible kWh from the sun and maximise the amount you’d offset against your electricity bill with NEM.

Our package brings specialist expertise and advanced technology together in one hassle-free offering. Enjoy a host of benefits from proven energy efficiency experience to trouble-free execution, financing options, getting around possible complications from GST and more. We’ll work hand-in-hand with you to ensure your energy costs hit the canvas. So call 09-5513 9898 today for a no-obligation chat.

Net Energy Metering (NEM) -
Together with EE programme, it makes a cost breakthrough solution

- Introduced on 1st November 2016 and valid until 2020, the NEM is a solar photovoltaic (PV) programme applicable to all domestic, commercial and industrial sectors - as long as they are the customers of TNB in Peninsular Malaysia or SESB in Sabah and FT Labuan – that will encourage the deployment of renewable energy (RE) as proposed in the Eleventh Malaysia Plan.

- The concept of NEM is that the energy produced from the solar PV system installed will be consumed first and any excess to be exported and sold to the distribution licensee, i.e. TNB/SESB, at the prevailing Displaced Cost prescribed by the Energy Commission. The more energy generated from the solar PV system is self-consumed, the more NEM consumers can save on their electricity bills (by reducing the electricity imported from the utility).

- Benefits
  1. Reduce electricity bill
  2. Manage maximum demand charges/penalty
  3. Enjoy double tax deduction
  4. Utilise Investment Tax Allowance
  5. Manage the Carbon footprint
  6. Reduce financing loss with Green Technology Financing Scheme
  7. Hedge against any possibility of future electrical tariff increase

- Solar PV array converts energy from sunlight into electricity
- The inverter converts the electricity produced by the solar array from direct current (DC) to alternating current (AC)
- PV meter measures the energy generated by the solar PV system
- The bidirectional meter indicates energy usage and excess energy produced
- Supply from TNB
- Excess energy not used goes back to the electric grid
- Energy used by your home from the electric grid

About MyHIJAU Mark

MyHIJAU is Malaysia’s official green labelling scheme endorsed by the government of Malaysia, bringing together certified green products and services that meet local and international environmental standards under one single mark.

Promote and showcase your commitment to the environment. Build trust among your customers by carrying the MyHIJAU Mark.

Denoting compliance to global environmental standards, the MyHIJAU Mark is a consolidation of regional and international green certifications.

About MyHIJAU Directory

An online platform for procurers, government ministries, and members of the general public to find information about all green products and services that have been recognised under the MyHIJAU Mark.

This online platform can be accessible thru website; www.myhijau.my via online and mobile apps; MyHIJAU App which can be downloaded via both play stores.
MyHIJAU will connect stakeholders and supporting industries

Background

Vision

- Simple and clear way for consumers to distinguish genuine green products and services through the usage of a single, trusted logo, called the MyHIJAU Mark.
- Comprehensive online platform for businesses to promote their green products and services to new markets. A movement of Malaysians choosing to make smart, educated decisions about their shopping habits that will lead to a cleaner, greener future for all of us.
- More companies seeking the proper environmental certification in order to reap the benefits of carrying the MyHIJAU Mark and being listed on the MyHIJAU Directory.

b. GreenTech Malaysia’s Green Procurement

GreenTech Malaysia’s Green Procurement Flagship is focused on catalysing sustainable consumption and production of green technology products and services amongst the public and private sectors to drive industry growth and shift consumers’ purchasing behaviour to one that is green-centric. With national targets to develop a green technology-based economy, this Flagship aims to address the demand for green technology by encouraging the purchasing of green products and services that deliver value for money to the procurers over the whole lifecycle of the products or utility of the services, whilst minimising damage to the environment. In achieving these goals, the Flagship addresses public procurement of green technology through the Government Green Procurement (GGP) initiative while private and private household procurement are addressed through the MyHIJAU Programme.

c. GITA/GITE

About

In tandem with the Malaysian Government’s agenda to drive the growth of Malaysia’s green economy, an announcement of green technology tax incentives in the Budget 2014 has been introduced where GreenTech Malaysia has been mandated to commence and verify on the Green Technology Incentives been offered. The purpose of this incentive is to strengthen the development of green technology through Green Investment Tax Allowances (GITA) for the purchase of green technology equipment/assets and Green Income Tax Exemption (GITE) for green technology service providers.

Why the incentives

WHY WE NEED GREEN TECHNOLOGY TAX INCENTIVE

- To encourage investments in green technology industries and the adoption of green technology by private sectors.
- To encourage companies to purchase assets that have been verified as green technology assets by MGTC and these assets are listed under MyHIJAU Directory.
- To facilitate the transition of expiring existing tax incentives relating to renewable energy (RE), energy efficiency (EE) and green building projects.

- Widening the coverage across various priority green technology industries and supporting services activities.
- Facilitate the nation journey to reduce 45% carbon emission by 2030.
Category of Green Incentives

Green Technology Tax Incentives divided into two categories as follows:

- **Green Investment Tax Incentive (GITA)**
  - GITA For Asset
  - GITA for Project

- **Green Income Tax Exemption (GITE)**
  - For the provision of green technology services.

List of Qualifying Activities for GITA Asset are as follows

Schematics of the Application Process for GiTA Assets

**PROCESS**

1. **APPLICANT CHECKS ON QUALIFYING ASSETS**
2. **LISTED UNDER MyHIJAU DIRECTORY?**
   - NO: **APPLICANT NOTIFY THE MANUFACTURER/SUPPLIER TO REGISTER UNDER MyHIJAU MARK**
   - YES: **APPLICANT SUBmits APPLICATION FORM & PROCESSING FEE**
3. **GREENTECH MALAYSIA VERIFY THE APPLICATION**
4. **APPLICATION APPROVAL?**
   - NOT APPROVED: **NOTIFIES TO THE APPLICANT**
   - APPROVED: **GREENTECH MALAYSIA ISSUE A VALIDATION LETTER TO THE APPLICANT**
5. **APPLICANT SUBmits TAX FORM TO IRB WITH THE VALIDATION LETTER**

**DESCRIPTION**

- **APPLICANT CHECKS ON QUALIFYING ASSETS**: Applicant must check the qualifying asset in the MyHIJAU Directory for GiTA Assets application.
- **LISTED UNDER MyHIJAU DIRECTORY?**
  - **NO**: If the asset is not listed under the MyHIJAU Directory, the Applicant shall notify the manufacturer or supplier to register under the MyHIJAU Mark.
  - **YES**: GreenTech Malaysia receive information and data submitted by the Applicant as per GreenTech Malaysia GiTA/A Form (Refer to website at www.myhijau.my or www.greentechmalaysia.my). Processing fee (RM1,000 per application) must be received upfront by GreenTech Malaysia via online banking, cash deposit or bank draft.
- **GREENTECH MALAYSIA VERIFY THE APPLICATION**: GreenTech Malaysia evaluate and verify the information and supporting documents submitted. If the information or supporting documents provided are incomplete, the Applicant will be notified via email. The Applicant needs to respond within seven (7) days from the date of such notification.
- **APPLICATION APPROVAL?**
  - **NOT APPROVED**: The approval of the application shall be subjected to GreenTech Malaysia’s successful evaluation. If approved, a Validation Letter will be issued. If not approved, GreenTech Malaysia will notify the Applicant with a Notification Letter.
  - **APPROVED**: GreenTech Malaysia issue the Validation Letter to the successful Applicant.
  - **APPLICANT SUBmits TAX FORM TO IRB WITH THE VALIDATION LETTER**: Applicant submits tax form to IRB together with the Validation Letter from GreenTech Malaysia for tax claim or declaration.
List of Qualifying Activities for GITA Project are as follows

  - Geothermal  
  - Solar power  
  Note: Projects which have been approved with Feed-in Tariff (FiT) for solar by the Sustainable Energy Development Authority (SEDA) are not eligible for the incentive.                                                                                           |
| 2 Energy Efficiency| Companies investing in energy efficiency equipment or technologies and invest in energy saving equipment.                                                                                                                                                                                                                                                                                                                                                     |
| 3 Green Building  | Building owners of the commercial/industrial building that have been awarded green building certificates from locally developed rating tool/certification body approved by the Government.                                                                                                                                                                                                                     |
| 4 Green Data Centre| Companies that purchased any energy efficient product or solution for data centre which have been awarded green building certificates from locally developed rating tool/certification body approved by the Government.                                                                                                                                                                                                                      |
| 5 Waste Management| Companies which undertake/invest in waste recycling or waste recovery or waste treatment and additional activities such as composting or store or collection or disposal.                                                                                                                                                                                                                                                                                 |
Schematics of the Application Process for GiTA Project

**PROCESS**

1. **APPLICANT CHECKS ON QUALIFYING PROJECT**
   - Applicant must check the qualifying project with MIDA or GreenTech Malaysia.

2. **APPLICANT SUBMITS APPLICATION FORM (MIDA GT/JA) & SUPPORTING DOCUMENTS TO MIDA**
   - Applicant submits an application to MIDA with the MIDA GT/JA form (Refer to website at www.mida.gov.my).

3. **COMPLETE & FULFIL GTA PROJECT?**
   - MIDA will request further information for uncompleted application.
     - YES
     - **MIDA REQUEST FURTHER INFORMATION**
     - MIDA process and evaluate the application based on the available information related to green technology project as provided by the Applicant.

4. **MIDA PROCESS THE APPLICATION**
   - MIDA prepare an Evaluation Report to be presented during the meeting of National Committee on Investment (NCI).

5. **MIDA PREPARE AN EVALUATION REPORT**

6. **APPLICATION APPROVAL BY NCI**
   - MIDA present the Evaluation Report during NCI for approval. If approved, a Conditional Approval Letter will be issued. If not approved, MIDA will issue a Rejection Letter to the Applicant.
     - NOT APPROVED
     - **MIDA ISSUE A REJECTION LETTER TO THE APPLICANT**
     - MIDA issue the Conditional Approval Letter to the successful Applicant.
     - APPROVED
     - **MIDA ISSUE A CONDITIONAL OFFER LETTER TO THE APPLICANT**
     - Applicant submits the copy of application form (MIDA GT/JA), the Conditional Letter and supporting documents to GreenTech Malaysia for technical evaluation.

7. **APPLICANT SUBMITS THE APPLICATION FORM & CONDITIONAL LETTER TO GREENTECH MALAYSIA**

**DESCRIPTION**

CONTINUE WITH THE NEXT PAGE
GreenTech Malaysia receive the application form with the Conditional Letter and supporting documents from MIDA. Processing fee (refer to item 3.2.2, page 7) must be received upfront by GreenTech Malaysia via online banking, cash deposit or bank draft.

GreenTech Malaysia screen all the documents and information for technical evaluation. If the information or supporting documents provided are incomplete, the Applicant will be notified via email. The Applicant needs to respond within fourteen (14) days from the date of such notification.

GreenTech Malaysia will request further information for uncompleted application.

The approval of the application shall be subjected to GreenTech Malaysia’s successful evaluation. If approved, a Validation Letter will be issued. If not approved, GreenTech Malaysia will notify the Applicant with a Notification Letter.

GreenTech Malaysia issue the Validation Letter to the successful Applicant.

Applicant submits tax form to IRB together with the Validation Letter from GreenTech Malaysia for tax claim or declaration.

GreenTech Malaysia will conduct annual verification for the following year of assessment until the tax allowances are fully absorbed.

Annual verification fee will be charged to the Applicant (refer to page 10).
List of Qualifying Activities for GITE Service are as follows

<table>
<thead>
<tr>
<th>Sector / Area</th>
<th>Activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Renewable Energy</td>
<td>Services related to renewable energy project such as system design and feasibility study, advisory and consultancy, testing and commissioning</td>

Schematics of the Application Process for GITE Services

**PROCESS**

1. **APPLICANT CHECKS ON QUALIFYING ACTIVITIES**
   - Applicant must check the qualifying activities with MIDA or GreenTech Malaysia.

2. **APPLICANT SUBMITS APPLICATION FORM (MIDA GT/JA) & SUPPORTING DOCUMENTS TO MIDA**
   - Applicant submits an application to MIDA with the MIDA GT/JA form (Refer to website at www.mida.gov.my).

3. **COMPLETE & FULFIL GITE SERVICES?**
   - NO: MIDA will request further information for uncompleted application.
   - YES: MIDA process and evaluate the application based on the available information related to green technology services as provided by the Applicant.

4. **MIDA PROCESS THE APPLICATION**

5. **MIDA PREPARE AN EVALUATION REPORT**
   - MIDA prepare an Evaluation Report to be presented during the meeting of National Committee on Investment (NCI), MIDA.

6. **APPLICATION APPROVAL BY NCI**
   - NOT APPROVED: MIDA present the Evaluation Report during NCI for approval. If approved, a Conditional Approval Letter will be issued. If not approved, MIDA will issue a Rejection Letter to the Applicant.
   - APPROVED: MIDA issue the Conditional Approval Letter to the successful Applicant.

7. **MIDA ISSUE A CONDITIONAL APPROVAL LETTER TO THE APPLICANT**
   - Applicant submits the copy of application form (MIDA GT/JA), the Conditional Letter and supporting documents to GreenTech Malaysia for the validation of green technology service provider.

8. **APPLICANT SUBMITS THE APPLICATION FORM & CONDITIONAL APPROVAL LETTER TO GREENTECH MALAYSIA**

**DESCRIPTION**

**MIDA REQUEST FURTHER INFORMATION**

**CONTINUE WITH THE NEXT PAGE**
GreenTech Malaysia receive the application form with the Conditional Letter and supporting documents from MIDA. Processing fee (RM2,000 per application) must be received upfront by GreenTech Malaysia via online banking, cash deposit or bank draft.

GreenTech Malaysia screen all the documents and information for the validation of green technology service provider. If the information or supporting documents provided are incomplete, the Applicant will be notified via email. The Applicant needs to respond within fourteen (14) days from the date of such notification.

*Note:* The Applicant must be registered under the MyHIJAU Mark Service for tax eligibility.

GreenTech Malaysia will request further information for uncompleted application.

The approval of the application shall be subjected to GreenTech Malaysia’s successful validation. If approved, a Validation Letter will be issued. If not approved, GreenTech Malaysia will notify the Applicant with a Notification Letter.

GreenTech Malaysia issue the Validation Letter to the successful Applicant.

Applicant submits tax form to IRB together with the Validation Letter from GreenTech Malaysia for tax claim or declaration.

GreenTech Malaysia will conduct annual verification for the following year of assessment until 31st Dec. 2020.

Annual verification fee will be charged to the Applicant.
Procedure of Application

Application for GITA Assets

The application should be submitted in one (1) set of MGTC GITA/A Form to:

Chief Executive Officer
Malaysian Green Technology Corporation (GreenTech Malaysia) No. 2, Jalan 9/10 Persiaran Usahawan, Seksyen 9
43650, Bandar Baru Bangi
Selangor

(Attn: Tn. Syed Ahmad Syed Mustafa)
Please email to rosmah@greentechmalaysia.my to have the MGTC GITA/A Form.

Application for GITA Projects and GITE Services

The application should be submitted in three (3) sets of MIDA GT/JA Forms to:

Chief Executive Officer
Malaysian Investment Development Authority (MIDA) MIDA Sentral, No. 5 Jalan Stesen Sentral 5
Kuala Lumpur Sentral
50470 Kuala Lumpur

(Attn.: Director, Clean Technology and Environment Management Division)
General Criteria:

Products and services that are eligible for MyHIJAU Mark registration must meet all of the following:

- Minimize the degradation of the environment or reduce greenhouse gas emission;
- Promote health and improvement of environment; and
- Conserves the use of energy, water and/or other forms of natural resources or promote the use of renewable energy or able to recycle waste material resources.

Eligibility Criteria for MyHIJAU Mark Product:

<table>
<thead>
<tr>
<th>Features</th>
<th>Green Product Manufacturers or Suppliers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eligibility Criteria for Applicant</td>
<td>Business or company must be a Malaysian Registered Business or Malaysian Registered Company</td>
</tr>
<tr>
<td></td>
<td>Authorised Malaysian distributor or reseller must have a Letter of Appointment/Authorization by the original product manufacturer</td>
</tr>
<tr>
<td>Requirement for Products</td>
<td>Must have existing Green Label Certification or Performance Standard Compliance report from an independent certification body that meets minimum standards recognized by GreenTech Malaysia</td>
</tr>
</tbody>
</table>

Type of Green Label Certification accepted:

1. **Green Label Certification (ISO 14024 Type I Eco-labels)**
   - e.g. SIRIM Eco Labelling Scheme

2. **Green Label Certification (ISO 14025 Type III Eco-labels)**
   - e.g. SIRIM Carbon Footprint Labelling Scheme

3. **Green Label Certification (Other Type I-like Voluntary Sustainable Scheme; VSS)**
   - e.g. Energy Efficiency, Water Efficiency, PEFC & MCS

4. **Performance Standard Compliance**
   - e.g. MS 2413:2011 (P) Electric Motorcycles Specification Part 3 (Performance Test)

Details on type of Green Label Certification:

- **Green Label Certification (ISO 14024 Type I Eco-Labels)**
  - Voluntary
  - Thirdparty certification
  - Multiple criteria (based on life cycle considerations)
Green Label Certification (ISO 14025 Type III Eco-Labels)
- Thirdparty certification
- Present quantified environmental information
- Primarily intended for business to business communication

Green Label Certification – Other Type-I Like VSS

Eligibility Criteria for MyHIJAU Mark Service:

<table>
<thead>
<tr>
<th>Features</th>
<th>Green Service Providers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eligibility Criteria for Applicant</td>
<td>Company must be a Malaysian Incorporated Company</td>
</tr>
<tr>
<td>Requirement for Services</td>
<td>Must be employing at least one manager/supervisor personnel with recognised professional qualifications; and Must demonstrate green practices through written procedures or guidelines on environmental management</td>
</tr>
</tbody>
</table>

Application process
Verification Partners

About

Our trusted, independent verification partners ensure the credibility of the MyHIJAU programme. Only products and services accredited by these verification bodies are eligible to register for the MyHIJAU Mark and be listed on the MyHIJAU Directory.

Our basis for the selection of independent verification partners is that the verifier must have the skills, experience and resources to assess, monitor and audit the certified products and services to ensure they genuinely comply with environmentally-friendly standards. We are constantly working with new verification bodies to grow our pool of partners, making the MyHIJAU programme the most comprehensive green recognition programme throughout Malaysia.

Responsibilities

As a Partner of MyHIJAU Mark, a verification body is responsible for:

- Establishing the neutrality, trustworthiness and reliability of its certification programme.
- Maintaining a publicly available database of the products it certifies, including advising on the withdrawal or termination of certification of products.
- Publishing any changes to the certification process, or criteria and standards used for certification, and updating GreenTech Malaysia of these changes.
- Supporting and recognising MyHIJAU Mark registration.

Benefits

- Help you build a green and sustainable business.
- Provide an awareness platform to promote your green products/services testing and certification scheme
- Connect you to other businesses who are looking for green solutions

Get Listed

If you would like to add your esteemed organization here, please email to: nursyahira@greentechmalaysia.my
The current Malaysian Green Market consists of:

- Manufacturers producing green products
- Service providers offering green services
- Government agencies with sustainability KPIs
- Corporations who may not offer green products/services but adopt sustainability practices within their operations

There is a great disconnect where green businesses often operate in silo. Through the MyHIJAU Champion Programme, we bring together these ‘green industry players’ to help catalyze the green market and create benefits for everyone involved.

As part of the Push-Pull promotional campaign proposed earlier this year to increase registrations for the MyHIJAU Mark and Directory, it was proposed to recruit MyHIJAU Champion organizations to assist in spreading awareness and influencing industries to adopt the MyHIJAU Mark.

These MyHIJAU Champions are required to be:

- Large, well-known companies with an already established market presence and leadership in their respective industries
- Demonstrating ongoing commitment to sustainability and greener business practices
- Willing to champion the MyHIJAU message and vision, which is to see the green labelling industry become more highly regulated, and better trusted among consumers and procurers

Why the MyHIJAU Champions

The long-term success of any business depends on the ability to move to sustainable practices and processes. Organisations that adopt sustainable procurement practices are able to not only cut down on life-cycle costs, but improve public perception, and attract environmentally-conscious customers and talent. The MyHIJAU Champions program is designed to showcase and guide such organizations, under the distinctive and easily recognizable MyHIJAU brand. Participating organizations are private and governmental bodies who are making significant efforts to green their procurement approaches. Under the program, MyHIJAU Champions make a public commitment to move towards better practice in:

- Procuring green products and services, OR
- Manufacturing green products / providing green services.

Green Procurers that are participating in the program will work closely with GreenTech Malaysia to develop a roadmap within their companies for improving procurement processes. Ultimately, these procurement processes should favour products and services that respect the environment. Advice and support are provided to procurers to achieve the goals of the roadmap, such as providing consultancy, connections to green vendors, and joint public relations initiatives.

Green Manufacturers / Distributors / Service Providers that are participating in the program must register for the MyHIJAU Mark and offer certified green products and services that are in-demand by a growing business market. Advice and support are provided to manufacturers/service providers to help them increase the visibility of their brand and reach new markets, such as providing consultancy, connections to businesses seeking to procure green products, and joint public relations initiatives.
Benefits of MyHIJAU Championship

- Amplify your green message and efforts through partnership with GreenTech Catalyst.
- Make your marketing Ringgit go further and generate unmeasurable brand mileage by leveraging our extensive promotion campaign.
- Build a positive sustainable public image through MyHijau platforms such as the MyHijau Pavilion @ IGEM 2016, business clinics, and training workshops that you can send representatives to speak.
- Network with other industry giants and enjoy the support and publicity from GreenTech Catalyst through the MyHijau Directory.
- Stand a better chance of being nominated for the prestigious GreenTech Malaysia Awards 2017.

Criteria to be as MyHIJAU Champions

Producers of Green Products and Services:
- Have successfully registered for the MyHIJAU Mark

Businesses That Adopt and Advocate Green Practices:
- Have conducted/send for awareness cum training sessions on green procurement/practices for their employees.
- Have sustainability initiatives that impact any of the focus sectors: Waste, Water, Energy, Transport, and Building. Currently procuring an item or item(s) listed on the MyHIJAU Directory.
- Have a documented roadmap for sustainability initiatives including green procurement targets, energy conservation, use of natural energy, and reduction of carbon emissions to contribute towards a lowcarbon society.
- Actively seeking to green the supply chain.
About

MyHIJAU Movement is a challenge for consumers to be aware of the Malaysian Government’s initiatives in organizing green activities, MyHIJAU Mark and to urge consumers to participate in the green movement!

Mission:

A revolutionary Malaysian Green movement and first step in building a sustainable business ecosystem.

Vision:

Reduced Malaysian carbon footprint by creating a common habit of using green products and services Build a truly sustainable nation with sustainable products, services and buying habits. There will be 3 execution phases under MyHijau Movement:

Meet Our Greenions:

Meet our Greenions – Bamboo
If there’s one thing you can say about Bamboo, it’s that he may bend, but he’ll never break – the rules, that is. In fact, he’s a stickler for doing things by the book, because it’s irresponsible people breaking the rules that that dislodged him from his base – and away from his family of shoots. Now, as the moral backbone of the Greenions, he fights to uphold environmental justice wherever he goes.

Meet our Greenions – Coral
Coral loves all and serves all; and yet she’s constantly abused and threatened by development, over-fishing and pollution. But still, she looks after her Greenion friends, ensuring they’re kept away from harm, and her motherly nature helps nurture life for the benefit of all.

Meet our Greenions – Vera
Thorny on the outside, soothing on the inside, fabulous all over; that’s Vera in a nutshell. Her looks stop people in their tracks, which makes it easier for her to get noticed so she can spread the word on going green. But don’t get on her thorny side; she loathes litterbug, frowns on deforestation and get prickly about pollution.
Who we are?

Malaysian Green Technology Corporation (GreenTech Malaysia) is an organisation under the purview of the Ministry of Energy, Green Technology and Water (KeTTHA), charged with catalysing green technology deployment as a strategic engine for socio-economic growth in Malaysia in line with the National Green Technology Policy 2009.

Focus

GreenTech Malaysia is focused on meeting the objectives of the National Green Technology Policy 2009 by:

- Developing sustainable and widespread green technology markets
- Strengthening the local green technology industry
- Enhancing human competency and capacity in green technology applications
- Formulating support policies and financing frameworks to promote green technology growth
- Promoting and creating awareness of green technologies

These initiatives are carried out through GreenTech Malaysia’s four key Flagship Projects, namely, Green Malaysia Plan, Green Procurement, Electric Mobility and Sustainable Living, across five key sectors, which are Energy, Transport, Building, Waste Management and Water Management.

Visit www.greentechmalaysia.my for more updates.

GreenTech Malaysia aspires to position Malaysia as a global hub for green technology by 2020 and subsequently develop the country into a green community by 2030.
A Breakthrough in Galvanized Steel with Zinc Aluminium Magnesium Alloy

T-MAZ™ is an improved version of steel framing material incorporating a balance formula of Zinc, Aluminium and Magnesium. This unique coating provides effective barrier that corrodes very slowly, keeping the corrosive atmosphere away from steel and cathodic protection in that when the coating is scratched or cut to expose the steel. This revolutionary of conventional galvanized steel is developed to meet the ever-changing and sophisticated market demand for reliable performance in corrosion resistance even in harsh environment. The extra barrier properties from Magnesium offer long lasting performance in ammonia-rich agricultural structures.

With its highly distinctive brown colour, T-MAZ Oak is manufactured to give alternative option for houses built from traditional timber frame. T-MAZ Oak is non fire propagated, crack resist, and will not warp. In fact its consistency in strength can easily match timber characteristic.

With natural defenses to help it survives in harsh environmental conditions, T-MAZ Sky expresses its strength and excellent formability in mighty inspirational blue tinted steel.

Note: • Brown and blue colour tinging is for material identification purpose only, no colour warranty will be provided.
• All items featured may differ from the actual product’s colour.

CLAIMS ON THE CONTENTS OF PRODUCTS LISTING
The contents of this product have been compiled from information supplied by the company and/or their agents and are not necessarily endorsed by Malaysian Green Technology Corporation. Whilst every effort has been made to ensure accuracy in the preparation of this information, the Publisher, its staff, agents and hosting accept no responsibility for any errors or omissions that may occur.
Products data are sorted and arranged in this directory as the following format.

A. Navigational Breadcrumbs trails

1. Sector’s Name
2. Category’s Name
3. Sub-Category’s Name

B. Product’s Name
C. Product’s Brand
D. Product’s Model
E. Product’s Ownership
F. Product’s Other Green Label
G. Product’s Image
H. Product’s Sector
I. Product’s Section

J. MyHIJAU Mark Information
   These information obtained after a product approved under MyHIJAU Mark.

K. Company Informations
   These include the contact name and position, company full address, telephones number, fax number, email address & the website URL.

Acson EcoPro Variable Refrigerant Flow Air Conditioner

Brand: Acson
Model: A5VR120ER
Ownership: Licensed Reseller / Distributor / Trader

MYHIJAU MARK INFORMATION
Listing Number: MyHP00192/18-E003
Compliance Category: Green Label Certification (Other Type I-Like Voluntary Sustainable Scheme; VSS)
Certification Scheme: China Certificate For Energy Conservation
Product
Environmental Claim(s): Conserve the use of energy

Environmental Sustainable Design Consultancy - Green Building Certification: GBI

Service Description
From small refurbishments to major new builds, Fenestra Green can assist project teams in gaining green accreditation for new and existing buildings as well as whole township developments. Our expertise covers facilitation for certification with the Malaysian Green Building Index (GBI) rating system.

Sustainable Façade Engineering

Service Description
Fenestra Green has the capability of undertaking computer modelling to assess the thermal performance of different building fabrics and glazing types for the Malaysian climate. Our skills include the following: 
- Heat flux, U value and temperature profile calculations
- Condensation risk analysis
- Advice on building regulation compliance, eg BCA (Australia), OTTV (Malaysia), ETTV (Singapore)
- Glass selection studies
- Thermal comfort studies
- Daylight and glare studies
Environmental Sustainable Design Consultancy - Green Building Certification: LEED

Service Description
Fenestra Green provides advisory and consultancy services on green certification of buildings and townships using the American Leadership In Energy And Environmental Design (LEED) rating system. We will evaluate the project to determine its potential certification level. We show clients exactly what they will need to do to get their green certification, including time commitment, level of effort, possible performance gaps, and guidance on associated costs. We provide the practical know-how clients need to navigate the certification process, saving them time and money.

Energy Performance Contract

Service Description
Energy Performance Contracting (EPC) is an innovative financing technique that uses cost savings from reduced energy consumption to repay the cost of installing energy conservation measures. This innovative financing technique allows building users to achieve energy savings without upfront capital expenses.

Energy Management Service

Service Description
Providing energy conservation and management services for healthcare facilities and businesses to help managing rising energy cost. The service includes proposing solutions for energy management through the implementation of renewable energy, utility/supply management, demand management, investment in energy efficient equipment, maintenance program and certification program.
**Engineering, Procurement, Construction and Commissioning of Solar Power Projects**

**Service Description**

HPSB is an EPCC, consultant and system designer for Solar power projects specialized in Off-grid (stand alone & hybrid), On-grid, solar maintenance & monitoring and energy storage solutions from residential to commercial to large scale solar projects.

Sustainability Management Program

Service Description
SMP: Is a program with the end in mind. Energy Management is not an event, mere implementation of piece meal projects that is not measured and verified is impossible to achieve sustainability. In fact it requires a “Roadmap” with a competent and committed team to make this a reality. Setting achievable goals with a specific time frame will allow the top Management to get involve in the program.

Evaluation of Renewable Energy and Energy Efficiency Projects for Financing Parties and Grant Giving Bodies

Service Description
Financing parties and grant-giving bodies (like TERAJU, UNIDO, etc.) need to evaluate loan and grant applications for RE and EE projects to determine their viability, as well as verify project progress for various stages of draw-down. Most of these banks and grant-giving bodies will appoint Sher Engineering & Consultancy Sdn Bhd to evaluate the viability of the project.

Solar Photovoltaic System Design and Consultancy Services

Service Description
Sher Engineering & Consultancy Sdn Bhd provides consultancy services for Solar PV system design which begins with defining the project's objectives, scope, kWp capacity, location, financial analysis and deliverables which will then be used to produce the detailed engineering design of the system.
EPCC for Grid Connection of Renewable Energy Plants

Service Description
The EPCC project is initiated when an RE developer or main EPC awards the grid connection job to Sher Engineering & Consultancy Sdn Bhd. The grid connection is normally at medium voltage, either 11 or 33 kV, but can also be at low voltage, 400 V, or at Transmission voltage, 132 kV. The services include grid connection design, grid interconnection construction and commissioning of the grid.

Solar System Integrator

Service Description
We Offered Services Which Include Consulting, Feasibility Study, Project Financing, Project Management Design Supply Installation & Commissioning. We Also Include Comprehensive O&M Service.
Service Provider for Installation of Solar Photovoltaic Systems (PV)

Service Description
Provide a high quality technical support for Development, Design, Install, Commission, Start up, Maintenance and Troubleshooting for Solar Systems. We also provide consultant support for our clients.

HCS Oil & Fuel Program - Cost Saving & Environmental Sustainability

Service Description  The HCS bypass filter diverts a small percentage of the normal oil flow and directs it through a bypass loop. As it passes through the bypass filter, and before it returns to the normal flow, abrasive particles such as carbon, soot, wear metals and silicon (dirt) down to one-micron size are removed, along with all water. The cleaned oil is then returned to the normal flow effectively in its origin.

Engineering, Procurement, Construction and Commissioning (EPCC) of Biogas Plant

**Service Description**
Concord Renewable Energy Sdn Bhd (CRESB) is responsible to design, supply, and install the biogas plant at the project site. This Biogas Plant uses waste from the mill, i.e: palm oil mill effluent and waste water, which is used to extract methane gas. This methane gas is then fired in a biogas engine to produce electricity. The entire biogas plant is a renewable energy plant.
