TOOLS AND SAWS GRINDING | ERODING | MEASURING

RALF GRAVE, MANAGING DIRECTOR
DE, EN

MOIN!

Mr. Grave, SuS is a specialized partner for used machines in the grinding and sharpening sector. What can your customers expect?

“We have been working in this area for over 30 years and in that time have come to specialize in the repair and sale of used machines. As such, we have developed a broad know-how in professional refurbishment. Equally, we can now also rely on a worldwide network of over 5,000 tool grinders and manufacturers in over 50 countries.”

What does that mean for your customers?

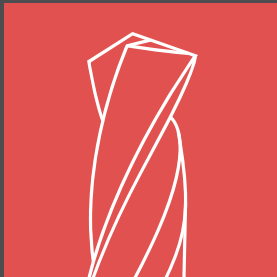

“Ultimately, we are able to source almost every desired model for any customer. Our selection includes conventional, automatic and CNC controlled machines of all European brands. If requested, SuS can also supply complete solutions for various processes. With this wide selection, we remain neutral and independent of any specific brand. Once purchased, every machine is professionally repaired by our workshop team and then extensively function tested. Only then do we release to customer. Of course, we are subsequently also on hand for the installation and commissioning of the “new” machine where required.”

What other advantages do your used machines offer?

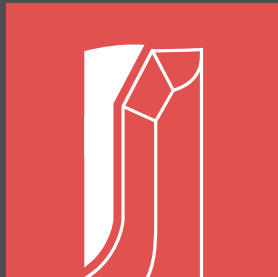

“We offer our customers a very good price-performance ratio. And there is also the ecological aspect to consider: used machines have been manufactured already and as such contribute far less to environmental pollution. At SuS, we strive to extend their lifecycle still further.”

THE BEST CHOICE

The choice of a used machine does not only offer financial benefits, but enables significantly more flexibility. SuS has access to a wide range and will find the ideal machine for you.

“With our many years of experience, we know the market exactly. Therefore we can advise our customers optimally and depending on the requirements, provide the best solution.”

SECOND HAND - FIRST CLASS

USED MACHINES IN HIGHEST PRECISION

LARGE SELECTION

SuS has a selection of the most varied machinery and equipment for grinding, sharpening and erosion technologies: conventional, automatic and CNC controlled machines of all European manufacturers. We are the first choice for used machines and the competent partner for an entire industry.

“Through our worldwide network we remain independent and operate neutrally. All in all, we have offered over 50 different brands over the years.”

MIKE DOLMAN, VERKAUF

PERFECTLY RECONDIT

OUR COMMITMENT TO 10

FROM A TO Z

The SuS range of services includes all steps, from the initial appraisal of existing defects, to disassembly, cleaning and painting and up to the exchange of defective parts and update of hardware and software components. To ensure a quick implementation and high quality of processing, we remain in close contact with the manufacturers and fit original parts only.

COMMISSIONING

If you wish, we can manage the entire assembly on site including qualified installation, commissioning, calibration and final test grinding.

Z IONED

100% QUALITY

TRAINING

We are happy to pass on our knowledge. Our experienced technicians can provide qualified training for your employees, from basic operation through to specialized applications.

SERVICES OVERVIEW

- Inspection
- Disassembly
- Exchange of defective parts
- Software and hardware updates
- Test grinding
- Accuracy tests / Geometric reporting
- Commissioning
- Training

“You are also most welcome to visit us on site and inspect our workshop to get an impression of our machines.”
