- ★ Experienced national faculty.
- ★ Practical topics.
- ★ Rarely discussed topics covered too.
- ★ Revision session.
- ★ Interactive Session.
- ★ You may like to carry home many useful books in a CD !!

INSTRUCTIONAL COURSE IN HAND SURGERY

After an extremely encouraging and a very successful hand surgery instructional course in 2015, I welcome you back, for this year's, academic extravaganza!

Several new topics have been added to expand your knowledge of hand surgery.

The course covers certain must-know preliminary topics, to more advanced aspects of hand surgery.

Trauma is common, no doubt, but many diseases, deformities, disabilities are seen as well on a very regular basis. The course aims to avoid errors in diagnosis and improve the final results.

If you are involved in care of trauma, I am sure you may like to hone your skills and get a better functional outcome.

Painful conditions have been demystified. We now have diagnosis and treatment too, for many conditions!

The topics are addressed by the faculty, largely with clinical photographs.

Hand surgery 2015 instructional course reminds me, the delegates wanted more, at the end of the three days!!

So friends, please mark your date with hand surgery in Pune 12 / 13 / 14 August 2016.

Dr. Pankaj Jindal

Hand surgeon
