

Vungle Android Pokkt Mediation

Prerequisites

- Supports Vungle version 3.3.3 and above.
- Please create account at <https://v.vungle.com/dashboard/login>.
- There is no direct extension is available for this so please download the latest Android SDK and create own extension for this. Please follow the below link: <https://support.vungle.com/hc/en-us/articles/204222794-Get-started-with-Vungle-Android-SDK>.

Configuration in Application

- Add created Vungle extension as a subproject in your main project. You need to update this info in .mkb file of main project.
- Add the necessary permissions for Vungle as suggested in Vungle integration document to your application manifest xml file.
- Add the recommended activities and meta data to your manifest xml file as suggested in integration guide.

Code changes

- There is nothing to do in coding. Pokkt native extension will be taking care of everything.
- **Video Gratification** - Vungle has different ways of gratifying. Please follow server to server callback for rewarding.
- Please read <https://support.vungle.com/hc/en-us/articles/204374244-Setting-up-Incentivized-Ads> for details of rewarding users.
- Please provide **ThirdPartyUserId** of PokktConfig.
- Now the last part, please declare class name along with package “com.pokkt.thirdparty.VungleNetwork.java” and other details in your Pokkt account Dashboard for Vungle network setting.
