

Chartboost Android Pokkt Mediation

Prerequisites

- Supports Chartboost version 6.2.0 and above.
- Please create account at <https://www.chartboost.com>.
- There is no direct extension is available for this so please download the latest Android SDK and create extension for this. Please follow the below link to understand integration process: <https://answers.chartboost.com/hc/en-us/articles/201219545>.
- Register your App here and then go in “App Settings”->Rewarded Video-> and add the data according to you like Rewarded currency name and reward per view.

Configuration in Application

- Add created Chartboost extension as a subproject in your main project. You need to update this info in .mkb file of main project.
- Add the necessary permissions for Chartboost as suggested in Chartboost integration document to your application manifest xml file.
- Add the recommended activities and meta data to your manifest xml file as suggested in integration guide.

Code changes

- There is nothing to do in coding. Pokkt native extension will be taking care of everything.
- Please declare class name along with package name “com.pokkt.thirdparty.ChartboostNetwork.java” and other details in your POKKT account Dashboard for Chartboost network setting.
