

Supersonic Android Pokkt Mediation

Prerequisites

- Supports Supersonic version 6.3.5 and above.
- Please create account at <https://www.supersonicads.com/>
- There is no direct extension is available for this so please download the latest Android SDK and create extension for this. Please follow the below link to understand how supersonic works: <http://supersonicdev.wpengine.com/android/sdk-integration/getting-started-with-supersonic-android-sdk/>.
- For rewarded video integration : <http://developers.supersonic.com/hc/en-us/articles/201321042-Integrating-Rewarded-Video>.
- Register your App here and add the placement for rewarded video accordingly and do the setting as per given in doc.

Configuration in Application

- Add created Supersonic extension as a subproject in your main project. You need to update this info in .mkb file of main project.
- Add the necessary permissions for Supersonic as suggested in Supersonic integration document to your application manifest xml file.
- Add the recommended activities to your manifest xml file as suggested in integration guide.

Code changes

- There is nothing to do in coding. Pokkt native extension will be taking care of everything.
- Please declare class name along with package name “com.pokkt.thirdparty.SupersonicNetwork.java” and other details in your POKKT account Dashboard for Supersonic network setting.
