

# Fyber Android Pokkt Mediation

---

## Prerequisites

- Supports Fyber version 8.0.1 and above.
- Please create account at <http://www.fyber.com/>
- There is no direct extension is available for this so please download the latest Android SDK and create extension for this. Please follow the below link to understand android integration and also download the latest sdk from here: <http://developer.fyber.com/content/current/android/basics/>.
- Here is more details for rewarded video integration, please follow this link: <http://developer.fyber.com/content/current/android/rewarded-video/>.
- Register your app here and do the required setting related to rewarded video.

---

## Configuration in Application

- Add created Fyber extension as a subproject in your main project. You need to update this info in .mkb file of main project.
- Add the necessary permissions for Fyber as suggested in Fyber integration document to your application manifest xml file.
- Add the recommended activities and meta data to your manifest xml file as suggested in integration guide.

---

## Code changes

- There is nothing to do in coding. Pokkt native extension will be taking care of everything.
- Please declare class name along with package name “com.pokkt.thirdparty.FyberNetwork.java” and other details in your POKKT account Dashboard for Fyber network setting.
- Notes: Fyber doesn't fire event for Video Displayed.
