

Pokkt Android SDK Version Notes

Pokkt Android SDK v4.0 has following extra features:

1. Ad Network mediation support for following networks.
 - I. AdColony.
 - II. AppLovin.
 - III. Chartboost.
 - IV. Fuse Powered.
 - V. Fyber.
 - VI. InMobi.
 - VII. MoPub.
 - VIII. Supersonic.
 - IX. Tapjoy.
 - X. Unity3d.
 - XI. Vungle
 - XII. Vdopia
2. Automatic retry of video caching after a fixed duration, if video caching from all the networks fail. Developer can set this duration. Please call `pokktconfig.setRetryDuration` to set this value.
3. Pokkt videos ads now have pokkt branding text.
4. Pokkt video player now have mute/un-mute button.
5. **Android permissions like write to external storage, access power wake lock and read phone state are made optional but highly recommended. Please update your Manifest accordingly.**
6. Survey can be prefetched so that user need not wait for loading a survey.
7. Timeout applied for video caching for mediation ad networks.
8. Fabric/Numbers analytics support.

9. **PlayVideoCampaignActivity** has updated property in Android Manifest. Please update your Manifest accordingly.
10. **PokktManager.setDebug** api signature is changed. Please change your code accordingly.
11. Minor Bug fixes.
12. Unused resources removed. strings.xml file now not required.

Notes

1. Android MinSDKVersion should be ≥ 9 .
