

You can send In-App notifications to your apps using Pokkt SDK and configure settings for it in your dashboard on Pokkt website after logging in.

Please follow below mentioned information to configure notifications for your app.

Repeat schedule can be daily, weekly monthly.

Daily Repeat can have options like frequency of repeat and time in hours of notification.

The screenshot displays the configuration interface for in-app notifications, divided into two main sections: 'Schedule' and 'Message'.

Schedule Section:

- Repeat:** A dropdown menu is set to 'Daily'.
- Frequency:** A field labeled 'Every' contains the number '1', followed by a circular refresh icon and the text 'Day(s)'.
- Time:** A dropdown menu is set to '12', followed by the text 'O'clock'.

Message Section:

- Title:** A text input field labeled 'Title' is present.
- Message Body:** A larger text area for the notification content.
- Add Image:** A blue button labeled 'Add Image' is located below the message body.
- Mobile Preview:** A smartphone mockup on the right shows a notification card with the text 'VodaCom-SA' and 'Registration'.

At the bottom right of the interface, there are two buttons: 'Cancel' and 'Save'.

Weekly repeat can have options like frequency of repeat in weeks, days of repeat and time in hours of notification.
