

POKKT SDK Migration Notes (v 7.0)

	Android
Note	2
Removed callbacks	2
PokktAdPlayerViewConfig	2
Activity context required in setPokktConfig.	2
Context required in shouldDebug.	2

Note

- In case of any query regarding integration, refer *"POKKT_SDK_Integration_Guide(_v7.0_Native_Android)"* for this version provided inside **"PokktSDK_v7.0"**.
1. Removed callbacks
videoAdAvailabilityStatus and **interstitialAvailabilityStatus** are removed from the Video and Interstitial ads respectively and so are the **checkAdAvailability** API.
 2. PokktAdPlayerViewConfig
PokktAdPlayerViewConfig is renamed to **PokktAdViewConfig**.
 3. Activity context required in setPokktConfig.

```
PokktAds.setPokktConfig("<Pokkt Application ID>", "<Pokkt Security Key>");  
  
is now  
  
PokktAds.setPokktConfig("<Pokkt Application ID>", "<Pokkt Security Key>",  
"<Activity Context>");
```

4. Context required in shouldDebug.

```
PokktAds.Debugging.shouldDebug(<true>);  
  
is now  
  
PokktAds.Debugging.shouldDebug("<Context Context>", <true>);
```
