

## InMobi Android Pokkt Mediation

---

### Prerequisites

- Supports AdColony version 5.1.0 and above.
- Please create account at [www.inmobi.com](http://www.inmobi.com)
- There is no direct extension is available for this so please download the latest Android SDK and create own extension for this. Please follow the below link: <https://support.inmobi.com/monetize/integration/android/android-sdk-integration-guide/#getting-started>.
- Please read instructions at <https://support.inmobi.com/monetize/integration/android/android-sdk-integration-guide/#creating-interstitial-or-native-int> to understand how rewarded video works.
- Register your property in InMobi account/dashboard.
- Go to the Monetize tab and click the spanner icon next to your property. Your Placement ID is displayed. Copy this value and use it in the integration code.

---

### Configuration in Application

- Add created InMobi extension .dll file with your project under reference option.
- Add the necessary permissions for InMobi as suggested in InMobi integration document to your application Android Manifest xml.
- Add the recommended activities, broadcast receiver and meta data to your Android Manifest xml.

---

### Code changes

- There is nothing to do in coding. Pokkt native extension will be taking care of everything.

Now the last part, please declare this class name along with package name (fully Please declare class name along with package name “com.pokkt.thirdparty.InMobiNetwork.java” and other details in your POKKT account Dashboard for InMobi network setting.
