

AdColony Android Pokkt Mediation

Prerequisites

- Supports AdColony version 2.3.0 and above.
 - Please create account at <http://www.adcolony.com/monetize/>
 - There is no direct extension is available for this so please download the latest Android SDK and create extension for this. Please follow the below link: <https://github.com/AdColony/AdColony-Android-SDK/wiki/Showing-V4VC-Videos>.
 - Download the latest Android sdk from below link: <https://github.com/AdColony/AdColony-Android-SDK>
 - Register your App here and do the required settings for V4VC (rewarded video).
-

Configuration in Application

- Add created AdColony extension .dll file with your project under reference option.
 - Add the necessary permissions for AdColony as suggested in AdColony integration document to your application manifest xml file.
 - Add the recommended activities and meta data to your Android Manifest xml file as suggested in integration guide.
-

Code changes

- There is nothing to do in coding. Pokkt native extension will be taking care of everything.
- Please declare class name along with package name “com.pokkt.thirdparty.AdColonyNetwork.java” and other details in your POKKT account Dashboard for AdColony network setting.
