

AdColony iOS Pokkt Mediation

Prerequisites

- Supports AdColony version 2.6.0 and above.
 - Please create account at <http://www.adcolony.com/monetize/>
 - Please download the .ane file from below link: <https://github.com/AdColony/AdColony-AdobeAIR-SDK>.
 - Please read basic instructions at <https://github.com/AdColony/AdColony-AdobeAIR-SDK/wiki/SDK-Integration> to integrate your android application with AdColony.
 - Register your App here and do the required settings for V4VC (rewarded video).
-

Configuration in Application

- Add downloaded .ane file in your air mobile project from project dependency.
 - There is a file "AdColonyExtension_iOS.ane" inside POKKT SDK package. Please add this ane in project properties.
-

Code changes

- There is nothing to do in coding. Pokkt sdk ane file will be taking care of everything.
- Now the last part, please declare this class name in your POKKT dashboard.
