

Chartboost iOS Pokkt Mediation

Prerequisites

- Supports Chartboost version 6.2.2 and above.
 - Please create account at <https://www.chartboost.com>.
 - Please read instructions at <https://answers.chartboost.com/hc/en-us/articles/201220095-iOS-Integration> to integrate your android application with Chartboost.
 - Register your App here and then go in "App Settings"->Rewarded Video-> and add the data according to you like Rewarded currency name and reward per view.
-

Configuration in Application

- Add downloaded Chartboost framework in your project folder.
- Downloaded Pokkt SDK package will have one folder "Mediation". Copy libChartboostExtension.a file and keep it in your project folder.

Example: You need to add all these details in "**Additional mtouch arguments**". These option you can get it from project->options->iOS Build->"Additional mtouch arguments". So add "libChartboostExtension.a", required framework for Chartboost and Chartboost.framework under Additional mtouch arguments like below:

```
-gcc_flags "-F${ProjectDir} -framework Chartboost -framework AdSupport -  
framework CoreMedia -L${ProjectDir} -lChartboostExtension -force_load ${ProjectDir}/  
libChartboostExtension.a"
```

Code changes

- There is nothing to do in coding. Pokkt sdk will be taking care of everything.
- Now the last part, please declare this class name in your Pokkt account.
