Chapter of Intensivists, Academy of Medicine, Singapore Webinar Series

Breathless or Drowsy: How Rapid Response Teams Manage!

Join us for an essential webinar focused on managing respiratory emergencies through the lens of Rapid Response Teams. Expert speakers will delve into the critical aspects of respiratory failure management, exploring the latest monitoring devices and respiratory therapy equipment essential for patient care. Learn practical bedside evaluation techniques and evidence-based management strategies that can make the difference in critical situations. This session will enhance your clinical decision-making skills and provide you with actionable insights for early recognition and intervention in respiratory failure. Perfect for healthcare professionals seeking to strengthen their acute care capabilities in managing breathless and drowsy patients.
