

ACADEMIC AFFAIR

- **Curriculum**
- **Course description**

Curriculum

Program

SSPO currently offers five programs: Bachelor of Prosthetics and Orthotics, Bachelor of Prosthetics and Orthotics (International Program), Bachelor of Prosthetics and Orthotics Program (Blended Distance Learning Program), Bachelor of Prosthetics and Orthotics Program (Blended Distance Learning International Program) and Master of Science Program in Prosthetics, Orthotics and Pedorthics (International Program).

Bachelor of Prosthetics and Orthotics

In the academic year 2011, SSPO revised the 2007 curriculum of the Bachelor of Prosthetics and Orthotics. The 2011 curriculum is applicable to students in intake 2011 and onward, as well as the then-new domestic upgrading program. Students in the domestic upgrading program get credits transferred from a prior domestic diploma in prosthetics and orthotics, and join the Bachelor of Science in Prosthetics and Orthotics program for 3 years (2nd year to 4th year).

Bachelor of Prosthetics and Orthotics (International Program)

In academic year 2010, SSPO established the Bachelor of Prosthetics and Orthotics (International Program) in order to fulfill the urgent need of Prosthetist / Orthotist ISPO Category I professionals in the region. A year later, SSPO changed the 4-year Bachelor of Prosthetics and Orthotics (International Program) curriculum to be an International Upgrading Program. With transfer of credits from an ISPO Category II diploma students in this program study for 2 years instead of 4.

Bachelor of Prosthetics and Orthotics Program (Blended Distance Learning International Program)

After several generations of students successfully graduating from the Category II program, the Human Study recognized that there was a greater need for a Category II to Category I upgrade program, that would provide P&O experts throughout the world with an academic degree in orthopedic technology. Due to the absence of such a program and dramatic need of an upgrading bachelor prosthetic and orthotic education in most parts of the world, Human Study e.V. launched an upgrade Bachelor's program for ISPO Category II graduates.

This educational program is delivered in official cooperation with the Sirindhorn School of Prosthetics and Orthotics of Mahidol University and the International Society for Prosthetics and Orthotics (ISPO)

This program is focused on educating P&O experts who would be authorities in the field of their profession, having the greatest experience and highest level of education. This program offers students the opportunity to evaluate a wide variety of patient pathologies and orthotic/prosthetic solutions and services that will greatly increase their professional skills and expertise. They course is offered via methodological and didactical methods, thus providing a pathway for them to become clinical instructors and mentors as well as teaching authorities for all practitioners in the P&O profession.

In this educational program, the Human Study e.V. utilizes contemporary teaching methods and tools based on the distance learning (web-based) delivery of academic content in combination with comprehensive practical education delivered through on-site demonstrational workshops with real patients, complemented with theoretical lectures, seminars, research topics and case studies.

Students who successfully graduate from this program obtain a Bachelor's diploma in Prosthetics and Orthotics issued by the ISPO Category I recognized Sirindhorn School of Prosthetics and Orthotics of the Mahidol University.

Bachelor of Prosthetics and Orthotics Program (Blended Distance Learning Program)

The Bachelor of Prosthetics and Orthotics Program has now developed a Blended Distance Learning Program for Category 2 technicians in Thailand. The benefit of this program is the ability of technicians to continue working in their respective clinical locations without having to physically attend school in Bangkok. The program is approved by the National PO Professional Committee and provides instruction via a teleconferencing video based system .

Master of Science Program in Prosthetics, Orthotics and Pedorthics (International Program)

In 2017, the Sirindhorn School of Prosthetics and Orthotics began a Masters of Science program in Prosthetics, Orthotics and Pedorthics. This international program is offered to certified prosthetists and orthotists from around the globe with a desire to advance their clinical and research skills. Students are participate in didactic and practical coursework in advanced evidence based clinical practice and research. In addition, research coursework centered around a development of a thesis is a hallmark of this graduate program. Access to a variety of institutional laboratories, prosthetic and orthotic clinics and experienced faculty make this course offering a robust program at SSPO.

Domestic Program

Bachelor of Prosthetics & Orthotics (Domestic) 2012 - 150 Credits

Year 1	LAEN 103 - 105 English Level 1,2,3 (3)	MUGE 101 General Education for Human Development (2)	MUGE 103 Art and Science for Human Development (2)	SCMA 110 Calculus (2)	SCCH 112 General Chemistry (3)	SCBI 116 Introductory Biology (2)	SCBI 117 Foundation of Life (2)	SIPO 161 Introduction to P&O1 (3)	Elective (2)	21 credits
	LATH 100 Art of Using Thai Language in Communication (3)	LAEN 104 - 106 English Level 2,3,4 (3)	MUGE 102 Social Studies for Human Development (3)	SCPY 159 Elementary Physics for Health Science (3)	SCMA 182 Statistics for Health Science (2)	SCPY 110 Physics Laboratory 1 (1)	SHHU 112 Group Dynamics and Teamwork (2)	SHSS 144 Principle of Communication (2)	Elective (2)	21 Credits
Year 2	SIAN 219 Anatomy (4)	SIPO 217 Biomechanics1 (2)	SIPO 218 Biomechanics 2 (2)	SIPO 219 Rehabilitation Medicine (3)	SIPS 219 Physiology (2)	SIPA 211 Pathology (3)	SIPO 222 Introduction to P&O2 (3)		19 Credits	
	SIPO 233 Orthotics 1 & SIPO 234 Orthotic Practice 1 (FO + AFO) (3+4)			SIPO 243 Prosthetics 1 & SIPO 244 Prosthetic Practice 1 (TTP) (3+4)			SIPO 252 Clinical O&P 1 (4)		18 Credits	
Year 3	SIPO 323 Research Process in P&O (2)	SIPO 343 Prosthetics 2 & SIPO 344 Prosthetic practice 2 (TFP) (3+4)			SIPO 335 Orthotics 2 & SIPO 336 Orthotic practice 2 (KAFO) (3+4)			SIPO 355 Clinical O&P2 (4)	20 credits	
	SIPO 337 Orthotics 3 & SIPO 338 Orthotics practice 3 (SO) (2+3)	SIPO 324 Upper Limb Prosthetics & Orthotics & SIPO 325 Upper Limb Prosthetics & Orthotics Practice (3+4)			SIPO 356 Clinical O&P 3 (4)	SIPO 357 Clinical Experience 1 (4)		20 Credits		
Year 4	SIPO 415 Basic Psychology and Psychiatry (1)	SIPO 444 Prosthetics 3 & SIPO 445 Prosthetic Practice 3 (AD&KD&HD) (3+4)		SIPO 422 Admin & Management in P&O (1)	Elective 2 (2)	SIPO 454 Clinical O&P 4 (4)	SIPO 455 Clinical Experience 2 (4)	19 Credits		
	SIPO 421 Research Project in P&O (2)	SIPO 434 Orthotic Advance (3)			SIPO 446 Prosthetic Advance (3)			SIPO 456 Clinical Experience 3 (4)	12 Credits	

International upgrading program

Bachelor of Prosthetics & Orthotics (Upgrade) 2016 - 76 Credits

Year 1	SCBI 109 Integrated Biology (3)	SCMA 100 Calculus (2)	SHHU 133 Rhetoric for Leadership (2)	SHSS 103 Man and Society (2)	SIPO 301 Research Process in P&O (3)	SIPO 101 Elementary Thai 1 (3)	SIPO 425 Shoe Modifications (2)		17 credits
	SCCH 100 Integrated Chemistry (3)	EGCO 342 Information Technology in Daily Life (3)	SCPY 159 Elementary Physics for Health Science (3)	SCPY 110 Physic Laboratory (1)	SCMA 182 Statistics for Health Science (2)	SHHU 116 Comparativ e Culture (2)	SIPO 102 Elementary Thai 2 (3)	SIPO 103 Elementary Thai 3 (3)	SIPO 420 Administration and Management in P&O (1)
Year 2	SIAN 219 Anatomy (4)	SIPO 217 Biomechanics 1 (2)	SIPO 218 Biomechanics 2 (2)	SIPO 219 Rehabilitation Medicine (3)	SIPS 219 Physiology (2)	SIPA 211 Pathology (3)	SIPO 401 Basic Psychology (1)	SIPO 415 Prosthetic & Orthotic Experience (2)	19 Credits
	SIPO 373 / SIPO 374 Orthotics 3 / Orthotic Practice 3 (5)			SIPO 423 Research Project in P&O (2)	SIPO 471 Orthotic Advanced (4)	SIPO 483 Prosthetic Advanced (4)		SIPO 493 Clinical Experience 4 (4)	19 Credits

Course Description

- **General Education for Domestic Student**

General Education for Human Development

The meaning, significance, and relation of General Education to other vocational/ specific subjects; the relation between behavior and mentality; critical thinking; the qualifications of ideal graduates; analysis of causes and consequences of events /situations/ problems; synthesis of solutions to, precautions against, or improvements in those events/situations to benefit individuals and their community; and the application of knowledge to solve the problems of case studies.

Social Studies for Human Development

Basic principles and theory in relation to events/situations/major problems of the Thai and global communities, for example, evolution of civilization; important events in historical, political and public administration systems; the economic and health systems, etc.; analysis of causes and consequences of events/situations/problems; synthesis of solutions to, precautions against, or improvements in those events/situations to benefit individuals and their community; and the application of knowledge to solve the problems of case studies

Arts and Sciences for Human Development

Humankind in the past, present and future; events/situations/problems in relation to the evolution of the arts and sciences in the Thai and global communities; concepts of the sufficiency economy; analysis of causes and consequences of events/situations/problems; synthesis of solutions to, precautions against, or improvements in those events/situations to benefit individuals and their community; and the application of knowledge to solve the problems of case studies

Art of Using Thai Language in Communication

Art of using Thai language and of speaking, listening, reading, writing, and thinking skills for accurate and appropriate communication

English Level 1

English structure, grammar and vocabulary in the context of daily language use, dealing with integration in listening, speaking, reading, and writing skills; reading strategies, sentence writing, listening for the gist, pronunciation and classroom communication.

English Level 2

Vocabulary, expressions, grammar, and contextualized social language; essential communicative skills in small groups; writing practice at a paragraph level; and reading and listening from various sources

English Level 3

Essential strategies for four language skills: reading and listening from various sources, speaking in everyday use and writing at a paragraph level and short essay, including sub-skills i.e., grammar, pronunciation, and vocabulary; focusing on English in everyday life and in academic reading and issues that enhance students world knowledge.

English Level 4

Integrating four English skills by practicing reading news, research articles, commentary, and academic texts, for comprehension and critical thinking, from various sources focusing on the issues that enhance students' world knowledge; listening to news, lecture, and speech via multimedia and the Internet; making conversations in various situations including speaking in public, giving oral

presentations and making simulations; and writing essays in various types using citations and references; also practicing sub-skills such as grammar, pronunciation, and vocabulary used in appropriate context

General Chemistry

Atomic structure, chemical bonding, gases, liquids, solids, solutions, colloids, chemical thermodynamics, chemical kinetics, chemical equilibria, ionic equilibria, electrochemistry, the periodic table

Introductory Biology

Chemistry of life and biomolecules, cellular biology, cell energy, genetics and genetic diseases, DNA technology and its medical applications, evolution, human evolution, ecology and pollution problems and biodiversity

Foundation of Life

Systemic classification of living organisms; reproduction and development in human and animals; comparative physiology of organ systems in human and animals, emphasizes on diseases and abnormalities, including nervous system, receptor and motor system, digestive system, endocrine system, gas exchange and excretory system, circulatory system and immune system; and basic biology laboratories

Principle of Communication

****For Domestic student program***

Communication concepts and theories, elements of communication, types and form of communication, individual communication which consists of personalities, attitudes, and learning of individual (s), mass communication, communication in the organization. Factors affect to communication and efficiency communication, obstacles of communication and logic reasoning to communication, faults of reasoning given to communication.

Dynamics and Teamwork

****For Domestic student program***

Nature and types of group; group behavior; theories of teamwork; techniques of team development; techniques of team working; group leadership; group communication; management of group conflict; and group manners

● **General Education for International Student**

Comparative Culture

Comparison of material, cognitive, normative cultures in different societies to promote better understanding among nations, and to create appreciation in noble and beautiful cultures.

Rhetoric for Leadership

Theories and practices on the new trend of rhetoric for leadership including training skill in public speaking and personal development for leadership in preparing for academic presentations, ideas, and thoughts. Multi-dimensional thinking practices motivating individuals' intellectual development of effective communication to the public.

Man and Society

Concepts and theories of psychology and sociology. Psychology relating to perception, motivation, personality, emotion and attitude. Sociology relating to social and cultural structure, social institutions, socialization toward social and health problems.

Elementary Thai I

Elements of fundamental grammar and basic vocabulary allowing the students to request, give and understand basic information, read simple short texts, and write at a simple sentence level.

Elementary Thai II

More fundamental grammar and basic vocabulary allowing the students to hold simple short conversations on common topics and situations, express opinions in a simple form, read short texts and write at a short paragraph levels.

Elementary Thai III

Consolidation of the acquisitions of Elementary Thai I and Elementary Thai II and further mastering of fundamental grammar and basic vocabulary in order to allow the students to fully achieve a standard elementary level of proficiency.

Information Technology in Daily Life

Introduction to technology of information system, theory, principles, concept, policy, roles, application and related organization, effect and trends in daily life, technology law, ethics and security of information, introduction to electronic commerce, internet search, web page construction.

Integrated Biology

Living cells and their functions, energy of life, gene and heredity, molecular genetics, genetic engineering and biotechnology, evolution : change in live over time, origin of life and evolution from single-cell life to human beings, origin of new species and biodiversity of life on earth, interaction of life and environment, environmental problems and conservation biology.

Integrated Chemistry

Definition, development and history of chemistry, the discovery of atoms and molecules, properties of elements and formation of compounds. Natural phenomena related to the behavior and properties of molecules in gaseous, liquid and solid states, chemical reactions in daily life and factors influencing the reactions, natural compounds and modern materials with designed properties, problems from science development and its impact to living things and environment.

● **General Education for All Students**

Calculus

Functions; limits; continuity; derivatives of algebraic functions, logarithmic functions, exponential functions, and trigonometric functions; implicit differentiation; higher-order derivatives; differentials; application of differentiation, intermediate forms and l' Hospital's rule; functions of several variables and partial derivatives; total differentials and total derivative; antiderivatives and integration; techniques of integration; applications of integration.

Statistics for Health Science

Concepts and applications of probability and probability distributions in various events; interpretation of statistical values; descriptive statistics; sampling for good representatives of populations and its use in estimation and hypothesis testing.

Elementary Physics for Health Science

Mechanics of motion and equilibrium, work and energy, elastic properties of matters, fluid mechanics and blood circulatory system, temperature, heat, gas law and respiratory system, waves and wave properties, ears and hearing, lights and visualization, electricity, magnetism, electricity in human body, electronics, atoms, nuclei and nuclear medicine.

General Physics Laboratory

Basic physics laboratory related to Physics subject

- **Medical Sciences**

Anatomy

Gross anatomy of human body regarding structure, function and relationships between various structures of head, face and neck, upper extremity and brachial plexus, and the thoracic and abdominal wall including surface anatomy and practice of cadaver dissection.

Pathology

Causes, mechanisms and basic pathologic changes of cell and tissue of human body suffering from diseases. Pathology of organ systems that is important and / or commonly found.

Biomechanics 1

The study of basic principles of static and dynamic mechanics and biomechanics concepts

Biomechanics 2

Biomechanics of joint, human movement analysis and biomechanics related to prosthetics and orthotics

Rehabilitation Medicine

Gross rehabilitation medicine and teamwork, goals and principles of rehabilitation, rehabilitation, assessment, quality of life, activities of daily living, Introduction to physical therapy, occupational therapy : manual muscle testing, range of motion; Rehabilitation of common disease/disorders.

Physiology

Normal functions and mechanism of the body systems such as the musculoskeletal, circulatory, respiratory, endocrine, urinary, digestive, metabolism and body temperature regulatory systems.

- **Prosthetics and Orthotics**

Research Process in Prosthetics and Orthotics

Questioning about interesting topics in prosthetics and orthotics; Searching Principle and method; Data analysis and evaluation; Synthesis of Results; Research planning.

Research Project in Prosthetics and Orthotics

Writing PO research proposal, doing research, present result, writing final report.

Administration and Management in Prosthetics & Orthotics

Theory of general management, planning, administration, human resource management, financial and managerial accounting, unit cost calculation, PO management.

Basic Psychology and Psychiatry

Basic Psychology; Clinical Psychology; Psychological reaction to loss; How to approach and communication with patients/disable.

Introduction to Prosthetics and Orthotics 1

Terminology in Prosthetics and Orthotics; Role and History Of Prosthetics and Orthotics; Related laws and Ethics; Community based rehabilitation; Multiview projection; Pictorial drawing; Sectional view drawing.

Introduction to Prosthetics and Orthotics 2

Machine and Material in prosthetics and orthotics; basic skills in Prosthetics & Orthotics

Orthotics 1

Evaluation techniques, prescription considerations, biomechanics, components, fabrication, and fitting and modifying of orthoses for the ankle and foot with the associated pathologies.

Orthotic Practice 1

Application of the principles and practice techniques of the ankle and foot orthoses: evaluation, prescription considerations, biomechanics, components, fabrication, fitting and modifying for the associated pathologies during supervised laboratory practice and patient fittings; professional ethics; patient's right; good human relations.

Orthotics 2

Evaluation techniques, prescription considerations, biomechanics, components, fabrication, fitting and modifying of orthoses for the hip, knee, ankle and foot with the associated pathologies.

Orthotic Practice 2

Application of the principles and practice techniques of the hip and/or knee orthotics under supervision; evaluation, prescription considerations, biomechanics, Components, fabrication, fitting and modifying the mentioned others for with the associated pathologies; professional ethics; patient's right; good human relations.

Orthotics 3

Review of biomechanics of spine; Spinal deformity Disease of the spine. Spine fracture; Gross spinal orthosis; CO (cervical orthotics) LSO (lumbosacral orthotics).TLSO (thoracolumbosacral orthotics). CTLSO (cervicothoracolumbosacral orthotics).

Orthotic Practice 3

Doctor's prescription. Patient care, communication. Measuring. Designing and Casting. Modification of plaster mold. Bending uprights and bands. Molding plastics. Orthotic fitting, Modification of the orthoses Finishing of the orthoses, emphasizing on spinal orthoses; professional ethics; patient's right; good human relations.

Prosthetics 1

Physical, mental and functional deficits that result from limb loss following transtibial amputation. Differing levels of amputation ; medical management; pre and postoperative prosthetic care; prescription considerations; biomechanics; prosthetic materials and components; and principles of fabrication, fit, and dynamic alignment.

Prosthetic Practice 1

Demonstration and practice about the physical and functional deficits that result from limb loss following transtibial amputation. Differing levels of amputation; assessment; medical management; pre and postoperative prosthetic care; prescription considerations; biomechanics; prosthetic materials and components; and principles of fabrication, fit, and dynamic alignment; professional ethics; patient's right; good human relations.

Prosthetics 2

Physical, mental and functional deficits that result from limb loss following transfemoral amputation. Differing levels of amputation; medical management; pre and postoperative prosthetic care; prescription considerations; biomechanics; prosthetic materials and components; and principles of fabrication, fit, and dynamic alignment.

Prosthetic Practice 2

Demonstration and practice about the physical and functional deficits that result from limb loss following transfemoral amputation. Differing levels of amputation; assessment; medical management; pre and postoperative prosthetic care; prescription considerations; biomechanics; prosthetic materials and components; and principles of fabrication, fit, and dynamic alignment; professional ethics; patient's right; good human relations.

Prosthetics 3

Physical, mental and functional deficits that result from differing levels of amputation; ankle disarticulation, knee disarticulation, and hip disarticulation; medical management; pre and postoperative prosthetic care; prescription considerations; biomechanics; prosthetic materials and components; and principles of fabrication, fit, and dynamic alignment.

Prosthetic Practice 3

Demonstration and practice about the physical and functional deficits that result from limb loss following ankle disarticulation, knee disarticulation and hip differing levels of amputation; assessment; medical management; pre and postoperative prosthetic care; prescription considerations; biomechanics; prosthetic materials and components; and principles of fabrication, fit, and dynamic alignment; professional ethics; patient's right; good human relations.

Upper Limb Orthotics and Prosthetics

Evaluation techniques, prescription considerations, biomechanics, components, fabrication, fitting and modifying of orthoses and prostheses for the upper limb with the associated pathologies.

Upper Limb Orthotics and Prosthetics Practice

Application of the principles and practice techniques of the upper limb orthotics and prostheses under supervision; evaluation, prescription considerations, biomechanics, components, fabrication, fitting and modifying the mentioned orthosis / prosthesis for the associated pathologies; professional ethics; patient's right; good human relations.

Clinical Orthotics and Prosthetics 1

Clinical practice and application of transtibial prosthetic and foot / ankle foot orthotic principles to assigned patients under supervision. Emphasizing in patient assessment, prescription recommendation, and fabrication techniques; professional ethics; patient's right; good human relations.

Clinical Orthotics and Prosthetics 2

Clinical prosthetic application of transfemoral prosthetic, and KAFO, HO principles to assigned patients under supervision. Emphasizing on patient assessment, prescription recommendation, and fabrication techniques; professional ethics; patient's right; good human relations.

Clinical Orthotics and Prosthetics 3

Clinical practice under supervision to manufacture orthosis / prosthesis to assigned patients: assessment, prescription recommendation, and fabrication techniques; professional ethics; patient's right; good human relations.

Clinical Orthotics and Prosthetics 4

Clinical practice under supervision to provide prosthetic to the assigned patients. Emphasizing on patient assessment, prescription recommendation, and fabrication techniques; professional ethics; patient's right; good human relations.

Orthotics Advance

Orthotic science and practice for some specific condition; clubfoot, scoliosis and so on.

Prosthetics Advance

Physical , mental and functional deficits that result from differing levels of amputation; partial foot amputation; advance prosthetics science and practice.

Clinical Experience 1

Supervised practice in the field through placement in Siriraj and/or collaborating center such as Sirindhorn National Medical Rehabilitation Center: assessment, suggestion and manufacturing the appropriate lower limb orthosis / prosthesis; professional ethics; patient's right; good human relations.

Clinical Experience 2

Supervised practice in the field through placement in Siriraj and/or collaborating center such as Sirindhorn National Medical Rehabilitation Center: assessment, suggestion and manufacturing the appropriate orthosis / prosthesis; professional ethics; patient's right; good human relations.

Clinical Experience 3

Supervised clinical practice including orthosis and prosthesis provision in the field through placement in local hospital or organization; Seminar at the end of the internship to summarize the main concepts in "Prosthetics and Orthotics".

Student Affairs

Student Affairs

Student affairs provide both academic and living environments services for students. It is absolutely essential that students, aside from completing their academic degree, need to be involved with other aspects of student life including morality, ethics, humanity, professionalism and social activities.

SCHOLARSHIP (International Upgrading Program)

Scholarships are available and granted by:
The Nippon Foundation through EXCEED for qualified countries
(Cambodia, Indonesia, Myanmar, Philippines, and Sri Lanka)

Scholarship Information

- **Tuition fees for 2 years** with student health insurance.
- **Stipend 5,000 USD/student/12 months (416 USD/month) will be converted to Thai Baht and ultimately depend on the exchange rate on the date of transfer.** This amount includes; accommodation, living expenses, University student uniform and transportation during your stay. We would like to transfer the scholarship to your bank account in Thailand each month.
- **500 USD per student paid directly by EXCEED** (Airfare, Entry Visa & Visa Extension fee, and Health Assessment service charge) for entering into our program officially.
- **500 USD per student** (Airfare and Visa Extension fee). We would like to offer reimbursement when you finish the program (2nd year).

Final decisions will be made by SSPO management committee.

Eligibility

Students will be permitted to continue provided they hold the following academic qualifications:

- Cumulative GPA 2.00 or above each year while studying at SSPO
- Semester Progress Report must be submitted to School Director no later than 2 weeks after last day of final examinations
- Student must pass examinations for every subject, as it required in each year to qualify for the following year's scholarship. If student fails more than 2 subjects, scholarship will be terminated.

SCHOLARSHIP (Domestic Program)

In accordance with Mahidol University's core values, Sirindhorn School of Prosthetics and Orthotics rewards excellence in academics and contributions to society. Scholarships recipients are expected to be outstanding students who comply with the regulations stipulated in the University Code of Conduct. The scholarship offers is for Thai PO students who want to pursue their Bachelor's Degree at SSPO.

1. Faculty of Medicine Siriraj Hospital Scholarship

2. Mahidol University Scholarship

The scholarship will be provided for candidates for each year. The amount depends on students' financial needs. Committees will review before selecting the qualified candidates who are eligible to be recipients.

3. Private Outside Scholarships

Thanachart Life Assurance (2 years duration) this scholarship is awarded to Third to Fourth year students who have a cumulative GPA of 2.70 or above while studying at SSPO, provide financial support to outstanding candidates who have a comprehensive knowledge of Thai culture and participate in social activities.

4. Financial Aid and Student Loans

In addition to the aforementioned scholarships, the scholarship amount depends on students' financial needs and will not exceed 50,000 Baht per scholarship, which will be used as a tuition fee waiver.

Students who wish to apply for Thai government loans must be Thai nationals and full-time students; their parents' annual income should not exceed 200,000 Baht. The amount that can be borrowed includes the tuition fee and living expense 2,000-3,000 Baht per month. The loan must be paid with interest after graduation two years.

For more information visit: www.studentloan.or.th

5. Siriraj Students Exchange Program which is organized and supported by Faculty of Medicine Siriraj Hospital in every academic year, giving a number of scholarship to 3rd - 4th year students, to visit the PO clinic abroad during summer break and provides valuable opportunities for Prosthetics and Orthotics students to gain International experience at prestigious PO institutes abroad.
