

HDB & Non-Landed **FLASH REPORT**

Rental Market March 2019

► **About**

Q: What is the SRX Residential Property Flash Report ?

A: The SRX Residential Property Flash Report is a monthly report that tracks and disseminates resale and rental property prices for HDB and Non-Landed Private properties through the SRX Price Index (SPI). Due to the overwhelming amount of information that needs to be covered for public consumption, the report is released in 3 separate phases covering different aspects of the property market:

1. HDB Resale
2. Non-Landed Private Resale
3. HDB and Non-Landed Private Rental

Q: What are the advantages of this report over other property data and reports?

A:

- Our monthly reporting provides a more real-time update on the property market.
- We supplement property transactions from URA and HDB with real-time, pre-caveat transactions from 14 major real estate agencies, ensuring completeness and timeliness of the numbers (Figure 1).
- We augment each transaction with geospatial and project-level attributes from public and proprietary data sources to account for each home’s hedonic factors (e.g. distance to MRT and good schools).
- We provide more granular data, such as ‘Median Resale Price broken down by HDB Estates’, ‘Median TOX in HDB Estates and Private Housing Districts’, ‘Sub-indices of HDB Mature and Non-Mature Estates’ and ‘Monthly Rental and Resale Volume’.

Figure 1. SRX typically receives pre-caveat transactions from agencies at least 2 weeks ahead before it becomes publicly-available.

Q: What is X-Value?

A: The X-Value is a computer-generated property appraisal based on comparable market analysis (CMA). It uses real-time big data from trusted private and public sources, comparable market analysis, machine learning, and SRX property indices to calculate a home’s estimated market value in seconds.

Q: What is Transaction-Over-X-Value (TOX)?

A: TOX measures how much a buyer is overpaying or underpaying the SRX Property X-Value’s estimated market value. It is analogous to the previously-used property market’s term of Cash-Over-Valuation (COV). The difference is the “V” is computer-generated. In the report for HDB Resale and Non-Landed Private Resale, the SPI and the median TOX are used complementarily to gauge overall property market sentiments.
