

Business plan

The chores made fun app helps the busy community by providing reminders that certain tasks need to be done on time. My community always gets busy and forgets to do their chore, for e.g. your neighbourhood stinks when you have maggots in your rubbish bin by the side of the road. This app is a unique app that reminds people to do their chores. It also has a wonderful calendar so you can set the time you want to start to do your chores.

This app prevents you from getting embarrassed. When the customer finishes 1 chore they get points, and depending on how many points they get, the customer gets money from their parents for doing their chores on time. If you are a parent then you don't get paid. People would want to use this app because it helps them to remember to do their chores. Our app is like a reminder app but you get to play music while you're doing your chores. We are going to sell to 7-17 years old. We are trying to sell our app to 35 people. We will make money by selling our app. We will charge people \$0.99. They will pay the first time they purchase our app. It will cost us money to put our app on App Store and it will cost us money to advertise our app on android devices, Apple devices and the internet.

If we started our own business we would work from home and it would cost \$50 per month. We do not have any employees at the moment. we will need to hire an app developer , service / maintenance and conflict resolution personal in future business grows.

We are getting this app to customers, testimonies and developing the product. We will not use social media to advertise our app on android and apple devices and the internet.
