

TAIDONG GRAND SLOPE

FROM A TRAFFIC SPINE TO A LIVING LINK

PROJECT STATEMENT

The 3rd Taidong Road is the busiest commercial pedestrian street in the old town of Qingdao in east China, which is a grand slope. The grand slope is currently surrounded by low-rent residences, but it has poor living conditions and lacks of public realm. This project is intended to create new public realm for both the neighborhood and citizens, and stimulate the center of the depressed district by revitalizing the public realm.

By renovating grand slope of Taidong, this project systematically balanced the use of the limited urban public realm by residents and citizens, while creating a series of flexible places to meet new needs emerging with revitalization of the district in the future.
